#### BIG LABOR UNION MEETING

President Gompers States Organized Labor's Attitude on Vocational Education

Richmond, Dec. 9.—President John Hirschman of the Central Trade and Labor Council presided at the labor meeting on industrial education last night in the auditorium of the John Marshall High School. Samuel Gompers, president of the American Federation of Labor, made a address for a large amount of general education for children of all workers. He said in part: "If the high standard of efficiency, the boys and girls of the country must have an opportunity to acquire educated hands and brains, such as may enable them to earn a living in a self-selected vocation and acquire an intelligent understanding of the duties of good citizenship."

"No better investment can be made by taxpayers than to give every youth an opportunity to secure such an education. Such an opportunity is not now within the reach of the great majority of the children of the wage-workers. The present system is inadequate and unsatisfactory. Only a small fraction of the children who enter the lower grades of the schools are able to continue through the grades until they complete the high school course. The reasons which seem to be the prime causes for withdrawal are first, a lack of interest on the part of the pupils; and secondly, on the part of the parents, a disinclination to pay the cost of instruction of a more practical character. The pupils become tired of the work they have in hand and see nothing more inviting in the grades ahead. They are conscious of powers, passions and tastes which the school does not recognize. They long to grasp things with their own hands and test the strength of materials and the magnitude of forces."

Demand for Industrial Education.

"The importance of our subject can not be too highly estimated. The general demand for industrial knowledge and skill and the almost universal interest in the subject manifested by business organizations, boards of trade, labor organizations, as well as by educators and public men, is sufficient proof that the right kind of education for a boy or girl who expects to enter upon an occupation is second only in importance to their having an education at all."

"We must never lose sight of the fact that a large majority of the working people are poor, and because of this they are forced to begin the battle of life at an early age. The need of the day is that something be done for the children of this great wage-working class."

"Formerly the apprenticeship system offered the boy an opportunity to learn a trade and become a thoroughly trained mechanic, but of late years the scheme of specialization has supplanted the old apprenticeship system, even to extreme specialization. It ought to be recognized

that the boy who enters upon a vocational course is second only in importance to their having an education at all."

ANY RESPECTABLE MAN OR Woman can make \$2 to \$4 daily distributing religious literature. Chance for promotion; spare hours may be used.

as a scientific truth that the higher the skill possessed by the mechanic the more valuable is his labor, both to himself and to the community. The more efficient labor becomes the higher wages it should command."

"The one trouble in America today is that too many of our youths who have graduated from the grammar or high school are misfits industrially. If we are to secure industrial supremacy, we must maintain our present standards in the industrial world, we must in some way in our educational system acquire an equivalent to our old apprenticeship system. Organized labor favors that plan of industrial training that will give our boys and girls such a training as will enable them to advance after they are in the industry."

"Organized labor believes that there are pressing educational needs which can be at least partially solved by the introduction of industrial training; it is aware that boys and girls do not always have the opportunity to enter the field of employment which will best contribute to their development either physically, morally or intellectually. Those who are misfits industrially, and who are unable to change from one unskilled occupation to another, and gain but little or nothing in efficiency. Labor believes that industrial education between the ages of fourteen and sixteen

years ought to awaken in these children a new school interest, and so help them to enter the field of employment; it believes that if such industrial training took the children between the ages of fourteen and sixteen, when they are of little value in a business way, at a time when the education they have received is of advantage to them as it goes, but hardly fits them for actual working places, that it would serve to give them the proper training to prepare and work some branch of actual vocational work."

"We believe that as much attention should be given to the proper education of those who are at work in our industries as is now given to those who prepare to enter professional and managerial careers, simply to balance justice and make it necessary to give to the wage-earning classes and the common industries such equivalent as we can for what the present schools are doing for the wealthier classes, as well as to the professional and managing vocations."

## Gained 30 Lbs. in Few Weeks Never Felt So Well

Was Pale, Weak and Thin, and Had Nervous Headaches Before Using Dr. Chase's Nerve Food.

It is truly wonderful what Dr. Chase's Nerve Food does for women who are weak, weary and run down in health. New, rich blood is what is needed in nearly all such cases, and because Dr. Chase's Nerve Food forms new blood it brings cure in the great majority of such ailments.

With an abundance of rich, red blood coursing through the veins the nerves are strengthened and vigor and vitality are carried to every organ of the human body.

With the nerves properly nourished headaches and neuritic pains disappear, appetite improves, digestion is good, you sleep and rest well, and gain in strength and weight.

Everywhere people are talking about this great food cure, which cures in Nature's way, by supplying the ingredients to form new blood, and so overcome weakness and disease by an abundance of vitality. Dr. Chase's Nerve Food, 50c a box, \$1 for \$2.50, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

Mrs. H. Laich, Cannington Manor, Sask., writes:—"You will remember me writing you last spring. Well, I gave up my doctor and began using Dr. Chase's Nerve Food. This treatment cured me rapidly and I was soon myself again. I was pale, thin and weak, suffered from stomach troubles and liver complaint, and frequently had sick, nervous headaches. It was surprising to find that in a few weeks' time I had gained 30 pounds in weight. I never felt so strong and well in all my life. Headaches never bother me any more, and I am grateful for the cure. If people would only give this medicine a fair trial they would certainly be cured."
