If the duty is reduced to 50 per cent. he is obliged to bring down his undue profit proportionately, while there would be much greater chances of importations in that particular line of goods. Even a dullard should be able to understand the difference between a duty that entirely prohibits importation and one so much lower that it would permit some slight degree of competition. As soon as the importation commences there will be a revenue from the duty imposed. If people were only wise enough they would even do away with revenue tariffs and establish absolute free trade everywhere, but time must be given for the necessary enlightenment, and in the meantime tariffs should be restricted to their legitimate purpose of revenue produc-

The Princess Colonna, the Countess Pappenheim and the Princess Hatzfield are three wealthy American women who married titled rakes in Europe for the sake of their titles and now find themselves wishing to be separated from their "noble" husbands. Their cases do not seem to call for much sympathy. It is curious that the wealthy women of Democratic America should seem the most ready to engage in this disagreeable sort of traffic, bartering their money and self-respect for empty baubles.

Thence onward he took the bit in his mouth and made a series of blunders and set aside the spirit and letter of the constitution in every way. The correspon-dent then proceeds to show President Peix-oto's alleged breaches of faith regarding Rio Grande do Sut, by persecuting those who had been engaged in the revolt, which action led to the president's rupture with Admiral Mello, who resigned the office of minister of marine in consequence. Coming rapidly to the history of the Coming rapidly to the history of the present time, the correspondent states that on November 7th the insurgent leaders held a conference on board the warship Aquida-ban and discussed the question of re-estab-lishing the monarchy in Brazil. It was then shown that the states of Pernambuco, Bahia. Santa Catarina, Rio Grande and a majority of the population of Minas Gerace, San Paulo, and an important section of the city of Rio de Janeiro favored a return to the monarchy. It was therefore decided that the efforts of the insurgents should be directed to that end. The fact that Gen. into the habit of adopting rather extraordinary language in dealing with other branches of the government. In his last nessage he had said in regard to civil service that Congress had passed the civil service law, not because it favored it but because Congress was afraid of

popular opinion. He (Mr. Hoar) should like to be at liberty to relate to the President some things which he had heard said by Democrats in his part of the country-men who were quite as honest. quite as distinguished, and quite as high in the public estimation and confidence as any person holding any official position, however illustrious.

Mr. Mills opposed the resolution, and spoke of Mr. Hoar's speech as a case of shelling the woods" before he obtained the information which his resolution called for, and as charging the President with meditating an act of war. Mr. Mills denied the statement and asserted that the executive had respectfully submitted that question to Congress and has given the Congress the information at his disposal, such as he thought i appropriate to submit. The President's action in this matter had been strictly confined within the limits of executive authority. It made no difference that the government which had been overthrown in Hawaii was a monarchy. Caesar was a monarch when Christ said that tribute should be paid to him. It was not a question of the morality of the Queen; or whether her character was such as Caesar would have his wife possess. The question was, "Did the government of the United States interfere to overthrow the government of Hawaii?" If it did, then it was the duty of the President of the United States, the representative of this government, to make prompt restitution, and to reinstate the government which it had overthrown. Mr. Mills was speaking when the morning hour expired, 2 p.m., but on motion of Mr. Hoar, was permitted to proceed. He spoke of the picture presented in the overthrow of the Hawaiian government, the American republic, a power able to cope with all the nations of the earth, standing with its guns shotted to the lips, and turned upon the palace of a poor, half savage, half civilized queen. Why, Why,

he asked, had all this been done, why had the American minister been constantly informing the government about the desirability of the Hawaiian Islands and about the value of the sugar production? It reminded him of that incident in Roman history when Cato, who had been to Carthage, drew from the folds of his toga Carthagenian figs and laid them on the table before the Roman Senate, saying: "This splendid food grows within three days' sail from Rome." "Carthago est delendo." Carthage must fall because she produced fine figs which the Romans wanted, so the Hawaiian Islands should change their government because the sugar planters of Hawaii wanted to obtain the bounty on sugar, to be paid to them out of the pockets of American citizens. Mr. Frye reminded Mr. Mills that the

representatives of Hawaii were entirely villing to have inserted in the treaty a provision that no bounty should be paid n Hawaiian sugar.

Mr. Mills replied that no such proviion had been inserted in the treaty. The American minister, Mr. Stevens, had acted in the spirit of a pirate and buccaneer, and it would be creditable to the peopla . Bold by Lank

rectly or indirectly, in the rethat was not the commission of an act of war?

Mr. Hoar replied that that would depend upon whether the act had been authorized by the government. But even in that case he would not concede that would be the duty of the United States, six months afterwards, to overthrow that condition of things, because that argument would require the restoration of the queen.

Mr. Mills reminded Mr. Hoar that the United States had not acquired Texas from Mexico. Texas had come into the union voluntarily.

Mr. Vilas asserted that for what the President had done, and for what he had instructed his minister to do, he had ample and complete and perfect authoritv.

Mr. Hill (Dem. New York) said he did not propose to discuss the wisdom of the original procedure or the wisdom of what had been recently done by the President's administration. He did not understand that these questions were involved in the resolution. He seldom agreed with the senator from Massachusetts(Mr. Hoar); but he did agree with him in this parti cular, that the resolution was an ordinary and simple one, asking for information from a department of the government relating to a most important matter. It was information for which the American people had looked in the Presi dent's message, and in which they had been disappointed in not, finding there. It had been publicly hinted that instructions had been given to upset this provisional government, by force if necessary. That would bring up the question as to whether the President has the rights by the use of the army or navy, and without the consent of Congress, ty restore the previously existing status, even conceding that the former govern ment of Hawaii had been overthrown b fraud or force. The information asked for in the resolution was asked because the Senate was entitled to it.

Mr. Sherman said Congress had not een treated fair by the President. There was no reason in the world why there should be any secrecy in the ma ter. The President of the United States had no right to declare war. The information should have been given to Con-Tf gress during the extra session. single life was lost in restoring The queen it would be an unlawful act. President should send the correspon to Congress at once, and if, through any act or instruction of his, trouble or physical violence followed in Hawaii, American people would hold him severely responsible.
