Declaration of Principles

The Federal Council of Churches which concluded its quadrennial meeting in the city of Chicago, set forth the following platform as the Declaration of Social Service Principles, declaring that the churches must stand:

"For equal rights and complete justice for all men in all stations of life."
"For the protection of the family by the simple standard of purity, uniform divorce laws, proper regulation of marriage, and proper housing."

"For the fullest possible development for every child, especially by the provision of proper education and recreation."

"For the abolishment of child labor."
"For such regulation of the condition of toil for women as shall safeguard the physical and moral health of the community."

"For the abatement and prevention of poverty."

"For the protection of the individual and society from the social economic and moral waste of the liquor traffic."

"For the conservation of health."

"For the protection of the worker from dangerous machinery, occupational disease, and mortality."

"For the right of all men to the opportunity for self-maintenance, for safeguarding this right against encroachments of every kind, and for the protection of workers from the hardships of enforced unemployment."

"For suitable provision for the old age of the workers, and for those incapacitated by injury."

"For the principle of conciliation and arbitration in industrial disputes."

"For a release from employment one day in seven."

"For the gradual and reasonable reduction of the hours of labor to the lowest practicable point, and for that degree of leisure for all which is a condition of the highest human life."

"For a living wage as a minimum in every industry, and of the highest wage that each industry can afford."

"For the most equitable division of the product of industry that can ultimately be devised."

"The Council has no legislative authority, but by delegation expresses the opinion of all the Protestant Churches—through the Protestant Episcopal Church is unofficially represented—and represents nearly eighteen millions of communicants. Such a declaration is a most stirring and promising sign of the times. It places emphasis on the 'second and great commandment,' as a social programme, but these churches stand for the 'first and great commandment also,' and would be the first to recognize the utility of this programme without personal religion."

"The tea basket was the first to go," explained Miss Watson. "A large can of lubricating oil soon followed it, a hat I had taken with me, I found to be unnecessary, my motor-cyclist's cap sufficing. A despatch-case went the way of the coffee and one by one, superfluous tools were left behind."

"Farm Engines Used Everywhere"

"Greatly to my surprise, I found that I could buy the extra two tons of gasoline which I thought I would have to have by me, for I found that in even the most isolated parts of South Africa I was never very far from a store of gasoline, which is used by the farmers for their engines."

"Of course, I did all I could to avoid the big rivers, but the 'dongas' which are irregular channels made by the tropical rains, were a difficulty. None of the sluice (streams) are bridged, and the water courses are sometimes very deep. I found that I had to choose between going gently through the water in which case there was no impetus to carry the machine up the sharp ascent at the other side, or 'rushing' it. I chose 'rushing' it as more exciting and also as more effective, although I frequently got wringing wet in the process, and incidentally had rather a bad spill through trying to 'rush' a steep water course at Majuba, where the road crosses Laing's Nek at a height of 500 feet. Near Fourteen Streams I all but cycled into the Vaal during a violent thunder storm."

"America Cup"

Mr. Charles Nicholson (of the Gosport yacht-building firm of Camper and Nicholson) is already at work on the design of the shamrock IV, Sir Thomas Lipton's new yacht, with which (having induced the New York Yacht Club to modify their rules) he will make another effort next year to bring back the America Cup.

Mr. Charles Nicholson says the new boat will not be an extreme type of yacht, with an enormous sail area and exaggerated beam and draught in proportion to length, which have been features of previous Shamrocks, but will be more like yachts now constructed to British rules of measurement with a fairly big body. She will have a comparatively shallow draught, and not be a freak.

Meanwhile something like a bombshell has been dropped into New York yachting circles by the action of Mr. Nat Herreshoff, the designer and builder of defenders for the America Cup for twenty years, who has tentatively declined to enter into competition for designing the defender of the Cup.

The members of the yacht-building syndicate, therefore, at a conference with Mr. Herreshoff, visited Mr. B. B. Crowninshield, of Boston, who designed the Independence, the unsuccessful candidate for selection as Cup defender at the last trials.

"I have found Dodd's Kidney Pills very beneficial," Mrs. Cowen states. "If anything I can say will help any sufferer I am glad to add my testimonial to what has already been said."

"The kidneys strain all the refuse material out of the blood. If they are out of order this refuse remains in the blood, and becomes poison. That's why sound kidneys mean pure blood and good health. Dodd's Kidney Pills make sound kidneys."

The Kind You Have Always Bought

Bears the Signature of *Dr. J. C. Watson*

Pat and Mike were crossing the Bay on a ferry boat. They were watching intently a big dredging barge that was sending its mammoth scoops under the water and bringing up tons of mud.

"Pat," says Mike, "wouldn't yez loike to be a-workin' over there on that mud digger?"

"Yes," says Pat, "but, begorra, O'd hate to be one of the fellows under the water that's fillin' up them shovels."

FROM GREAT LAKES TO THE ROCKIES

Women Sing the Praises of Dodd's Kidney Pills

Saskatchewan Lady adds her testimony to what has already been said of the Great work Dodd's Kidney Pills are doing.

Caesarsville Sask. June 9 (Special).—The scarcity of female help in a new country subjects the women of the prairies to unusual strain, and careful observation has established the fact that this strain first makes itself felt in the kidneys. For this reason Dodd's Kidney Pills are making an enviable reputation from the Great Lakes to the foothills of the Rockies.

Everywhere you will find women singing the praises of the great Canadian kidney remedy that has banished their pains and weakness, and brought them back to health. Among the many is Mrs. Edgar Cowen, an estimable lady of this place.

"I have found Dodd's Kidney Pills very beneficial," Mrs. Cowen states. "If anything I can say will help any sufferer I am glad to add my testimonial to what has already been said."

"The kidneys strain all the refuse material out of the blood. If they are out of order this refuse remains in the blood, and becomes poison. That's why sound kidneys mean pure blood and good health. Dodd's Kidney Pills make sound kidneys."

Confesses Murder After Many Years

Vancouver, May 28.—Claiming that twenty-one years ago in London, Eng., he strangled his infant son, only two days old, to death, Gelp Grange, a middle-aged Englishman, one-time sergeant in the army, appeared at the police station Saturday night and surrendered himself to Desk Sergeant Hunter. During these years, while he has been stationed in the out-of-the-way places of the earth, Grange claims that his crime has followed him, and at last, to secure peace, he has been forced to confess.

On the strength of his story the sergeant ordered his arrest and at the present time he is being detained pending medical examination and a reply from the Metropolitan police of London.

Approaching the wicket at the desk sergeant's office shortly after ten o'clock, Grange told of the unwelcome entry into this world of his little son. The birth occurred on January 10, 1894. What to do with the little child was a question which oppressed both father and mother, and finally the impending diagnosis left the father in a moment of passion to strangle it.

Following the crime, Grange, who was then a private in a fusilier regiment, says he was sent to India, and ever since has served in the Orient and other places, where he has endeavored to forget his deed. This, however, proved impossible.

Gasoline Commonly Used in Interior of Africa

The first woman to run a motor-cycle in Africa was Mrs. Sutton, the married daughter of the patriot and old Boer general, Cronje.

Another intrepid woman, Mrs. E. L. C. Watson, has just returned to London from an adventurous 2,000 mile trip on a motor cycle from the Cape to Pretoria.

Wearing neat riding breeches a habit coat, and high lace-up boots, a motor-cyclist's peaked cap, and taking with her a complete traveller's outfit, Miss Watson started from the Cape on her 2 1/2 horse-power motor-cycle. Bit by bit the nice outfit had to be thrown to the four winds, for comfort, she found, must be sacrificed to lightness on a long journey.

"The tea basket was the first to go," explained Miss Watson. "A large can of lubricating oil soon followed it, a hat I had taken with me, I found to be unnecessary, my motor-cyclist's cap sufficing. A despatch-case went the way of the coffee and one by one, superfluous tools were left behind."

Farm Engines Used Everywhere

"Greatly to my surprise, I found that I could buy the extra two tons of gasoline which I thought I would have to have by me, for I found that in even the most isolated parts of South Africa I was never very far from a store of gasoline, which is used by the farmers for their engines."

"Of course, I did all I could to avoid the big rivers, but the 'dongas' which are irregular channels made by the tropical rains, were a difficulty. None of the sluice (streams) are bridged, and the water courses are sometimes very deep. I found that I had to choose between going gently through the water in which case there was no impetus to carry the machine up the sharp ascent at the other side, or 'rushing' it. I chose 'rushing' it as more exciting and also as more effective, although I frequently got wringing wet in the process, and incidentally had rather a bad spill through trying to 'rush' a steep water course at Majuba, where the road crosses Laing's Nek at a height of 500 feet. Near Fourteen Streams I all but cycled into the Vaal during a violent thunder storm."

America Cup

Mr. Charles Nicholson (of the Gosport yacht-building firm of Camper and Nicholson) is already at work on the design of the shamrock IV, Sir Thomas Lipton's new yacht, with which (having induced the New York Yacht Club to modify their rules) he will make another effort next year to bring back the America Cup.

Mr. Charles Nicholson says the new boat will not be an extreme type of yacht, with an enormous sail area and exaggerated beam and draught in proportion to length, which have been features of previous Shamrocks, but will be more like yachts now constructed to British rules of measurement with a fairly big body. She will have a comparatively shallow draught, and not be a freak.

Meanwhile something like a bombshell has been dropped into New York yachting circles by the action of Mr. Nat Herreshoff, the designer and builder of defenders for the America Cup for twenty years, who has tentatively declined to enter into competition for designing the defender of the Cup.

The members of the yacht-building syndicate, therefore, at a conference with Mr. Herreshoff, visited Mr. B. B. Crowninshield, of Boston, who designed the Independence, the unsuccessful candidate for selection as Cup defender at the last trials.

Cheaper Oil Fuel

London.—By an invention patented by the British Motor Cab company it is hoped to end the London taxicab strike, now going on for eleven weeks.

The invention has an interest for all users of the automobile as it makes possible the regular use of cheaper fuel than petrol. Petrol fumes less than half the constituents of the new fuel, which experiments, it is stated, give a higher mileage per gallon than pure petrol. The cost price is stated to be 10½d per gallon, 2½d less than the price the taxicab companies are asking from the men for petrol.

The new fuel is useless for the purpose of starting the engines, but that difficulty is overcome by the construction of an apparatus which is supplied with pure petrol from a small independent tank, and used only for the purpose of starting the engine.

The consulting engineer of the Royal Automobile Club has reported the apparatus to be simple and effective, and not liable either to disarrangement or to any danger, and that it is applicable to any kind of petrol engine as used in motor vehicles.

Man's Debt To Animals

I have observed that before men can be gentle and broad-minded with each other, they are always gentle and broad-minded about beasts. These dumb things, so beautiful (even the plain ones) in their different ways, and so touching in their dumbness, do draw us to magnanimity, and help the wings of our hearts to grow. No, I don't think I exaggerate, my friend; God knows I don't want to. . . . But I feel—I seem to know that most of us, deep down, really love these furred and feathered creatures that cannot save themselves from us—that are like our own children, because they are helpless; that are in a way sacred, because in them we watch, and through them we understand, those greatest blessings of the earth—Beauty and Freedom. They give us so much, they ask nothing from us. What can we do in return but spare them all the suffering we can? No, my friend, I do not think—whether for the sakes of our own—that I exaggerate.

JOHN GALS-WORTHY.

Work for Each

No one of my fellows can do that special work for me which I have come into the world to do: he may do a higher work, but he cannot do my work. I cannot hand over my work to him, any more than I can hand over my responsibilities or my gifts. I must do . . . my work. I may do little or I may do much. That matters not. It must be my own work.—Ruskin

MOTHER OF LARGE FAMILY

Tells How She Keeps Her Health—Happiness For Those Who Take Her Advice.

Scottville, Mich.—"I want to tell you how much good Lydia E. Pinkham's Vegetable Compound has done me. I live on a farm and have worked very hard. I am forty-five years old, and am the mother of thirteen children. Many people think it strange that I am not broken down with hard work and the care of my family, but I tell them of my good friend, Lydia E. Pinkham's Vegetable Compound, and that there will be no backache and bearing down pains for them if they will take it as I have. I am scarcely ever without it in the house."

"I will say also that I think there is no better medicine to be found for young girls."

My eldest daughter has taken Lydia E. Pinkham's Vegetable Compound for painful periods and irregularity, and it has helped her.

"I am always ready and willing to speak a good word for Lydia E. Pinkham's Vegetable Compound. I tell every one I meet that I owe my health and happiness to your wonderful medicine."

—Mrs. J. G. JOHNSON, Scottville, Mich., R. F. D. 3.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and today holds the record of being the most successful remedy for women's ailments known.
