BORING FOR OIL.

Premier Emmerson Signs Agreement With Boston Capitalists.

Wells to be Sunk Next Month in Four Counties-Albert Co. Cannelite Deposits to be Worked at Once.

Monoton Transcript, Aug. 12.) The Transcript learns that on Monday last the Hon. Mr. Emmerson, premier of New Brunswick, and Matthew Lodge of Moncton went to Boston in connection with the mineral oil exploration proposals. They were accompanied by Prof. Shaler of Harvard iniversity, who had been in this vicinity for the week preceding. During his stay here the professor drew his final conclusions and decisions from the information and data collected during the past few months by his subordinates who have been making a careful survey. It is understood that Prof. Shaler from these conclusions reported favorably to his principals in Boston as to the territory and its prospects. That report may be more pregnant with importance to the future of Moncton than any other report made since the day "the Bend" was decided upon as the neadquarters of 'he Intercolonial railway.

It was in consequence of that favorable report that Premier Emmerson felt it necessary to visit Boston, with Mr. Lodge, as representing the New Brunswick Mineral Oil and Natural Gas company. They met the capitalists interested, and found that Prof. Shalers' report was such they were ready to proceed with the practical work at once. Indeed they seemed to be so impressed by the outlook that their interest was manifestly deep; and an agreement was signed between them and the New Brunswick company. Under this agreement the Boston people are to expend within the time prescribed by the act \$200,000 in exploring for oil and natural gas in this territory. An order was given for the necessary oil boring plant, and as such plant is easily available it is anticlpated it will be on the grounds within two or three weeks and boring commenced by the first of September.
One of the first borings will be made
in the vicinity of Moncton, on a site
determined by Prof. Shaler. The work will be done under local superintenc-

Four preliminary borings will be made immediately in different parts of the province. The first will be in this county in the vizinity of Moncton; the second in Albert county; the third in Kent and the fourth in Gloucester. The object of these widely scattered preliminary borings is, if possible, to locate the outer boundaries of the oil territory of which Moncton is believed territory of which Moncton is believed to be the centre; and not so much at the outset with the expectation of striking ary great permanent flow of oil. The great store of oil is believed to think that the medical, legal or business profession presents a brighter aspect than farming. I care not where you find men, nor what their occupation, they have their cares and worbe in the basin, of which this city is the centre, but the store is believed to be at an enormous depth. A feat-ure of the agreemnt made which will uld oil be discovered its refining and the manufacture of by-products from the same

must be done in the province. It may be added that the dispose of the interests in the cannelite de-posits at Bakimore, Albert county, has been made, and that work will be commenced there within a few days. Mr. Lodge has been authorized to employ the necessary men. Large quantities of the cannel will be shipped to Boston to make preliminary tests for by-

FARR HEARD FROM.

Drunk, and Spent a Night in Oshawa

Local Grits Knew His Identity and Discussed Measures for His Safety.

Huron election before the house of commons committee on elections has, left many trains of evidence undevelopcommons committee on elections has left many trains of evidence undeveloped. Since the rising of the committee mew evidence in connection with the wanderings of the missing witness, James Farr, is cropping up every day.

Last Monday, it will be remembered, James Nelson and Thomas Marshall, of 414 Charch street swore that Farr James Farr, is cropping up every day.
Last Monday, it will be remembered,
James Nelson and Thomas Marshall,
of 414 Church street, swore that Farr first went away some time during the week of July 23rd, saying that he was going to Goderich. Subsequently he turned up again very drunk, and stated that he had been down in South Ontario with Organizer Vance. From what has cropped up since it transpires that Farr was telling the truth.

GRITS KNEW WHO HE WAS. Farr was not only in South Ontario, but he was in the common jail at Oshawa for a night, and it can only have been owing to the desire of the Ontario government's officials that he hould escape that he was not laid by the heels then and there.

Farr, it appears, went to Oshawa on July 27 or 28. Some liberals down here knew who he was, and were aringing to have him stay there quietly. Farr, however, at once proceeded to make the round of the hotels and displayed meney and checks in a very lavish manner. The local politicians then became fearful lest he should get the party into trouble with his wild habits. A council of war was held in the evening to device and the evening to devise some means of shipping him into some quiet place, Organizer Vance having presumably impressed on them the importance of preventing Farr from betraying himself into the hands of the enemy.

THE VISITOR ARRESTED. While the good politicians were deliberating ever the matter, dire news
was brought in. Farr had managed to
consume more liquor, and had suddenly developed feroclous characteristics.
He had net the town constable on the
main street, and on being requested to
behave himself had commenced to fight

ing in mind that the dignity of farm
life depend upon the education and
life depend upon the education
life depend upon the education and
life depend upon the education

with the official. The latter promptly put his assailant under arrest, having no idea of the importance of his cap-ture. When Farr was searched a considerable amount of money and a check were found on his person, thus con-firming the evidence submitted at Ottawa as to the fact that the liberal party made it worth Farr's while to go away. The man gave a fictitious name, but next day admitted his iden-

The Oshawa liberals, learning that their guest was in jail, concluded to let him stay there and sober up. Next morning he was arraigned before Magistrate Merton, under his assumed name. That official refused to proceed with the constable's charge of disorderly conduct, and at once freed the prisoner. Farr quickly left town, and was next seen in Toronto.

From the fact that Farr sought securing in South Octavic its part he

clusion in South Ontario it may be safely assumed that he took part in the election of Hon. John Dryden some months before, and returned to his former haunts because he would be likely to have friends there.

AGRICULTURAL EDUCATION. By W. S. Blair, Horticulturist of Maritime Experimental Farm, Nappan, N. S.

(For The Sun.)

Considerable has been waid and written on the question of agricultural education. Indeed, it might truthfully be said that after all the farmer is a humorous character. He takes lots of advice and says very little. There is, nowever, one thing quite certain, and that is; that the man who thinks correctly about his work and acts upon the judgment thus formed is the most

The training one receives at college, or the information obtained from books is useful only as a book (containing more or less knowledge, according to our industry) upon which we can draw for material that will enable us to form correct judgment in our operations. We become educated as life goes on, finishing only at its close. It stands to reason if we do not have a fund of knowledge bearing upon our work that our practice must at times be at fault. It is these mis-takes we want, if at all possible, to avoid.

If we think an agricultural college will make good farmers of us we are much mistaken. That is only part of the equipment. If we have not agricultural colleges to go to let us make the best of prevailing conditions and adapt ourselves to them. There is no doubt but that sooner or later well equipped institutions for teaching the sciences bearing upon agriculture will be established in New Brunswick. In the meantime we can materially advance ourselves by an honest application of energy along certain lines.

It seems to me that the average man is not successful without plenty of

good hard work. It is a great mistake has his, and lots of them; but not more than any other class of individuals. They enjoy much that those in other cannot enjoy, and in many cases could have a much happier ex-istence if they only thought so. In farm practice it is necessary to

rely upon ones own judgment. It is impossible to farm successfully other-wise. Therefore to adapt ourselves to our environment is of paramount im-portance. This can be done much more easily than the majority of peo-ple think, and a scientific training at college is not at all necessary. We can college is not at all necessary. We can outside of college by persistent effort obtain sufficient knowledge of the sciences interwoven (that combine to make agriculture one of the greatest studies of the present day) and thereby make farm life much more attractive and profitable than it is now.

Some of the most scientific, as well as skilled practical men are turning out popular editions bearing upon almost every phase of farming. In these books subjects are treated in such a comprehensive manner that soon one is capable of grasping many of the fundamental principles bearing of the fundamental principles bearing upon his profession. By studying these works we arrive at an understanding of the reason for certain (Friday's Toronto Mail.)

The sudden break in the taking of testimony is connection with the West (Co., The MacMillan Co., and A. T. De La Mare Ptg. and Pub. Co., all of

> ist clubs in our rural districts would be a move in the right direction. In almost any country place a sufficient number of boys and girls can be found to form such a club. To make such clubs a success would require a definite system of work. A central head should be established whose duty it would be to organize such clubs; visit and address them as often as possible, and issue at stated times bulletins and leaflets bearing upon important matters in farm work. bulletins and issue at stated times bulletins and leaflets bearing upon important matters in farm work. These clubs could be supplied with a library of the best literature bearing upon agriculture. In this way the young people on the farm would become greatly interested along the line of their life work. Then their thoughts would be towards nature and the farm, and the possibilities of their profession would be revealed. The members of such clubs would be required to have stated meetings, and subject matter for discussion could be supplied from the central office. The influence of such clubs would soon be felt on the farm and a new interest would be awakened amongst the young people in rural districts.
>
> To do such work successfully an outlay is necessary, and as it is the duty of the province to stimulate such, we naturally look in that direction for aid. It should be the aim of every farmer to sleve to his profession bear.

COURT NEWS.

At the sitting of the equity court, yesterday morning, the following cases were disposed of:
In Kronkite v. Miller (two cases considered together), Judge Barker or-dered the injunctions in both cases to be confinued until hearing. The ques-tion of costs was reserved. In People's Trust Co. of Brooklyn v.

In People's Trust Co. of Brooklyn v. Salisbury and Harvey Railway et al, on motion of Dr. Stockton, Q. C., and by consent of Dr. Alward, Q. C., and H. F. Puddington, who appeared for the defendants, the bill was ordered to be taken pro confesso. Damages were assessed at \$359,889.74 up to August 15th, 1899. The usual order for foreclosure and sale with leave of all parties to bid at the sale was made In G. O. King v. Keith and McLean, the report of the referee was confirmed on motion of M. G. Teed, Q. C.

In Sharp v. Fawcett, on motion of H. A. Powell, Q. C., the report of the referee was confirmed and ordered to be filed. In Mayes v. Turner et al, on motion of H. A. Powell, Q. C., bill was ordered to be taken pro confesso.

In Smith v. Wilson et al, on motion of W. B. Chandler, Q. C., the bill was taken pro confesso and damages assessed at \$138.81 up to August 14, and foreclosure and sale with leave to bid ordanad

motion of S. B. Bustin the bill was or-dered to be taken pro confesso and the amount due assessed at \$1,040. Foreclosure and sale with leave to bid was ordered. In chambers, before Judge Forber

In W. E. Earle v. Holden et al, on

In chambers, before Judge Forbes, in McNutt v. Hinchy, the hearing of an application to change the venue from St. John to York, was adjourned until a later date. A. George Blair for the defendant and Scott E. Morrill for the plaintiff.

In McDonald v. McGrath, the hearing of an application made to set aside a garnishee order, was postponed until Monday on account of the illness of D. Mullin, Q. C. J. L. Carleton, Q. C., for the defendant.

Finn v. Whitney et al was set down to be tried before Judge Forbes without a jury some time the last of the month. The defendants reside in Moncton. They were members of a

plaintin and W. B. Chandler, Q. C., for the defendants.

CONCERNING BISHOPS.

Today, August 15, is the anniversary of the consecration of the Right Rev. James Roberts, D. D., bishop of Chatham. The ceremony took place in 1860 at Charlottetown, P. E. I. The late Bishop McIntyre, of that place, was also consecrated at the same time. The Globe extends its congratulations to the venerable prelate, and hopes that he may live many years to preside over the diocese that he has so wisely governed.

When the consecration of the coadjutor bishop for this diocese, takes place at the Cathedral it will be the second time for that imposing ceremony to occur within its walls. The consecration of Bishop Sweeny took place in the Cathedral on April 18, 1860, and the officiating prelate was Archbishop Connolly of Halifax. He was assisted by Bishop Fitzpatrick of Boston, and Bishop McKinnon of Arichat, N. S. The prelates were aided by Revs. John and James Quinn, T. Cornolly, J. J. Nugent, E. J. Dunphy, P. Farrell, James Vereker, J. O'Regan of this province, and Fathers Power, Gear, Hennedy and Dr. Cameron of Nova Scotia. Since that Synday Nova Scotia. Since that Sunday morning the three prelates and eight of the clergymen have been removed to their reward. Besides Bishop Sweeny there are only four now living of the ecclesiastics who were within the sanctuary rails on that day, viz., Bishop Cameron of Antigonish, N. S.; Monsignor Connolly, V. G. of this Bishop Cameron of Antigonish, N. S.;
Monsignor Connolly, V. G., of this
city; Rev. P. Farrell of Petersville,
and Rev. J. J. Nugent of Madawaska.
It is, perhaps, worth noting that, with
two exceptions, all the bishops then
in the United States, from Maine to
California, in 1860, have passed away
since the accession of Dr. Sweeny.
Bishop Isadore Verga, who died at
Rome on Thursday last was born in
1832 and made cardinal in 1834. He is 1832 and made cardinal in 1884. He is 1832 and made cardinal in 1834. He is the seventh member of the Sacred college to die in the last six months.

Monsignor Antonio Valbonesi, who was recently consecrated titular Bishop of Argus and auxiliary to Cardinal Verga, is the youngest bishop of the whole Catholic hierarchy. His lordship was born in 1868 and is therefore only 31 years of are fore only 31 years of age.

## Children Cry for CASTORIA

GOOD FORTUNE OF A FORMER ST. JOHN BOY.

Fred W. Campbell of New York, who is spending his vacation in Water-borough, Q. C., has received word that he has won the diamond medal awarded by the Window Artists' Association of America. Mr. Campbell is the window dresser for H. C. F. Koch & Co., of W. 125th street, New York city. Mr. Campbell had one hundred and seventy-six photos of different designs of ing room. The second class dining saloon and most of the berths are on the saloon deck, and a second class music room and smoking room have also been provided, and there also a plentiful supply of baths for the second class passengers. The comfort of the third class also has not been neglected, and all modern improvements have been introduced for these I assengers, who will be mostly berthed in four berth rooms instead of the old style.

enty-six photos of different designs of window dressing in the competition. In all there were between six thousand of between six and seven hundred competitors Mr. Campbell took the first prize. Besides winning the medal, Mr. Campbell has been elected president of the National Association of Window Artists, and the latter honor entitles him to a free trip to the Paris the second medal Mr. Campbell has won this year. He secured the other the second medal Mr. Campbell has won this year. He secured the other from New York and Chicago, being away ahead of all competitors. This makes nine medals Mr. Campbell has won in all. Mr. Campbell was born in St. John and left when young, going to Boston, and afterwards to New York. He is a grandson of John Frederickson, late of the customs, and nephew of Mrs. Henry Graham, Union street.

WOMEN AS INVENTORS. Some of the most valuable, as well as important inventions have been patented to women, among which may be numbered the first cook stove, a permutation lock having 3,000 different combinations, a machine for making screws (invented by a little girl), which revolutionized that industry, and the valuable Burden process of making horse shoes which resulted in making horse-shoes, which resulted in a saving over the old process of many millions of dollars per year.

The first patent to a woman was granted in 1808, and since then the

number has increased to many thou-sands. These facts are interesting not only because indicating the rapid and almost marvelous growth of woman's intellect, but also from the fact that the inventive genius of women invades fields one would scarcely credit her with any interest, much less knowledge. We would not be surprised that a hat-pin, corset, glove-fastener, etc., should be invented by women, but when we learn that such inventions as telescopes, making marble from lime-stone, dams and reservoirs are evolved, people begin to be These facts are interesting not voirs are evolved, people begin to be

interested.

In Canada, also, women are becoming interested in inventions, as is evidenced by the number of women applicants seeking patents through Marion & Marion of Montreal.

TO VISIT HALLEAX.

Lord and Lady Minto will arrive in Halifax on Monday, 21st inst., and will remain for five days. The genwill remain for five days. The general, admiral and lieut, governor will entertain the vice-regal party at dinner, and a reception will be held in the province building. A concert will be given in the Public Gardens on the evening of the 24th. The governor general and Lady Minto on leaving Halifax will proceed to Quebec, where they will make a short stay, after which Lady Minto will leave on a visit to England.—Globe.

Cook's Cotton Root Con is successfully used monthl 10,000 Ledies. Safe, effectual. I

The International hotel at Bathurst was burned early Tuesday morning. It was owned by James Buchanan.

Schr. Arthur M. Gibson has been chartered to load lumber at Pascagouls for Gibara and Matanzas.

J. W. Peck of Hopewell Hill, Albert Co., has arrived in the city and has entered the Currie Business University

Scott E. Morrill and H. A. McKeown, M. P. P., will leave on Saturday for Toronto to attend the semi-annual meeting of the high court Ancient Order of Foresters.

The various local Orange lodges will

assemble at their hall, Germain street, on Sunday afternoon at 2 o'clock for the purpose o' attending divine service at St. James ohurch.

So far as quality goes, the potatoes that have reached St. John this season are far below the average. The best, and they are not very good, are

work, spent Monday in the city. Miss Graham left on the Prince Edward en route to New York, where she will take up her residence with a brother, engaged in newspaper work there.

G. R. Bent and Mrs. Bent, formerly of this city, now of San Jose, California, are the guests of Dr. Sheffield, Princess street. This is the second visit of Mr. Bent during his fourteen years absence. He has been very successful in commercial life in his western home and is carrying on a large business.

Some anxiety is felt by friends in Carleton concerning Charles Sherman, the solo cornetist of the band, who has not been seen since last Wednes-day. Mr. Sherman went to the Knights of Pythias excursion with the band, and was seen the next morning at Indiantown. Since then he has disap-

The Hampton Reading Room Association are preparing a grand concert for Tuesday evening, August 22nd, consisting of vocal and instrumental music and readings. Mrs. J. J. Ryan, Mrs. J. M. Barnes and Prof. Campbell are among those taking part. Proceeds in aid of plane that is being placed in the reading room.

The brilliant lighting of White's candy store attracted quite a large crowd last night. It was the first discrowd last right. It was the first dis-play in this city of the Washington Incandescent Kerosene light, and was in every way a success. The appar-atus is connection with this light is very simple and has many commend-able features lacking in other systems of lighting. To run a 1500 candleof lighting. To run a 1500 candle-power lamp would cost at the present price of oil about two cents an hour. Three of such lamps were on exhibi-tion last night, and their soft, steady light was much admired. The dis-pley was in charge of D. P. Gosline of Sussex and F. R. White of Boston.

Among those who have lately forwarded their names as delegates to the Brotherhood of St. Andrew convention, to be held here this month, are Rev. Canon Sweeney, D. D., of Toronto, Rev. H. R. Hulse of New York, Wm. W. Ward of Salem, Ohio, and E. F. Austin of Toledo, Ohio, The total number of names is now one hundred and twenty-five. This will probably be increased by about twenty-five more and these, with the local men, who number upwards of one hundred, will make a large and influential at-

The large excursion party gotten up by Red Cross Lodge, Knights of Pythias, of Boston, Mass., will leave for the provincial trip about the 20th inst. It is expected there will be about 600 in the crowd, and up to Saturday last 450 had booked for the trip, including about 75 to 100 ladies. The excursion will patronize the Dominion Atlantic Railway Co., stopping first at Yarmouth, then Halifax, then Digby, and then contains the containing the creditors to individually exercise their option as to which offer they would accept.

A young man named William Currey, employed in G. A. Knodell's printing office, net with a painful accident yesterday morning. He got his hand lammed in one of the presses, and it was so badly crushed that it burst. The young man was sent to burst. mion Atlantic Railway Co., stopping first at Yarmouth, then Halifax, then Digby, and then crossing over here, arriving on the afternoon of the 25th or 26th. They bring all their tents, etc., with them, and will camp out on the Barracks grounds, having secured the privilege of using the drill shed for the ladies' tents, should there be head weather

A very sad drowning accident happened at Green Head last evening, about seven o'clock. Dorothy, the twelve year old daughter of Jas, Armstrong, book-keeper in J. Sealy's, and connected with the lime works at Green Head, has been staying, along with the rest of the family at the home of relatives in that place.

At about seven o'clock Dorothy went down with a man named John Emery to the kiln, where he was to attend to the fires. While Emery was at his work the liftle ari must have strayed to the pier and by some mischance fallen over, for when the man had completed his work at the kiln, nothing could be seen of the child save the hat floating on the water. Emery at once raised an alarm, and every effort was made to obtain the body. Grappling irons were speedily secured, and after about half an hour's work the body was brought to the surface by James Lunney.

GRAVE OF THE ENGLISHMAN.

What marks the earth's far boundaries, Proclaims the march of man O'er the fields of distant countries? 'Tis the grave of the Englishman.

What shows the steps of progress, With freedom in the van, The plauting of new nations? 'Tis the grave of the Englishman.

For the Union Jack brings freedon Its folds the world's winds fan. But sarth's toll, paid not seldom, Is the grave of the Englishman.

Far and wide his bones are resting After life's hard race he's ran, A humble mound attesting, "Tis the grave of an Englishman.

nd the ocean claims its victims.

As the mighty waste we scan,
We can hear the billows tolling
O'er the grave of the English

For empire has its burdens, And the work our sires began Has in many distant gardens Left the grave of the Englishman.

But we're proud to do our duty,
Of our place in nature's plan
There's the flower of manhood's beauty
In the grave of an Englishman.
—W. Stanley Shaw.
Lime Street Chambers, London, E. C.,
July 20, 1899.

A CHAPTER ON PICKLES.

Ripe cucumbers or watermion rind make an acceptable relies structed with either hot or cold joints. Out the pared rind into thick silces. Boil one ounce of alum in one gallor. of water, spour it on the rinds, and let the stand in it several hours on the back of the stove. Take out into cold water, and the list hist. The many friends in St. John who have been made so welcome in his hospitable home, will sympathize with the family in their bereavement.

Freddie Uiley, the Montreal boy soprano, who electrified St. John musical lovers by his star concerts in Centenary church, some months ago, is dead. He was the leading chorister of St. James Methodist church, Montreal. Master Ulley fell a victim te typhoid fever.

Miss Margaret Graham, at one time connected with the Halifax Herald, and very well known throughout Nova. Scotia for her bright, clever work, spent Monday in the city. Miss

stuffed Peppers—Select the large bell peppers. Cut around the stem, remove it and take out all the seeds. For the stuffing use two quarts of chopped cabbage, a cupful of white mustard seed, three tablespoonfuls of salt, half a cupful of grated horse-radish. Fill each pepper with part of this mixture, and into each one put a small onion and a little cucumber. Tie the stem on again, put the pepper in a jar and cover with cold vinegar. A little sugar may be added if desired.

Pickled cauliflower—Take two cauliflowers, cut up; one pint of small onions, three medium selzed red peppers. Dissolve half a pint of salt in water enough to cover the vegetables, and let them stand over night. In the morning drain them. Heat two quarts of vinegar with four tablespoonfuls of mustard until it boils. Add the vegetables and boil for about fifteen minutes, or until a fork can be thrust through the cauliflower.

Stuffed mangoes are decorative as well as appetizing. Use small green muskmelons or cantaloupes. Cut a small square from the side of each one, and, with a teaspoon, scrape out all the seeds. Make a brine of one pint of sait to a gallon of water. Cover the mangoes with it while it bolls. Let them stand two days; hen drain them and stuff with the same mixture as is used for peppers. Pour bolling vinegar, over them, using in it a bit of alum.

A LEADING BRANCH It is hardly necessary to say that bookkeeping is a leading branch of instruction in s. commercial school. A knowledge of accounts is, in fact, the first necessity for any one who would be successful in business, whether as an employe or a principal. The Currie Business University use all the latest and most approved systems in teaching this subject.

A meeting of the creditors of F. L. Worden, the Sidney street grocer, was held yesterday morning at the office of H. H. Pickett. A statement submitted to the meeting showed liabilities of about \$6,000 and assets about \$2,000. A compromise offer of 20 cents cash or 30 cents by notes payable November 1 and January 1 was submit-

A young man named William Currey, employed in G. A. Knodell's printing office, met with a painful accident yesterday morning. He got his hand jammed in one of the presses, and it was so badly crushed that it burst. The young man was sent to the hospital, and a careful investigation showed that no bones had been broken. It will take some time for the injury It will take some time for the injury to heal, but the doctors hope to prevent any stiffness.

Yesterday morning between 8 and 9 o'clock Charles McHugh's horse, with o'clock Charles McHugh's horse, with cart attached, backed over Quinn's wharf and alighted on a schooner about 15 feet below. The horse mir-aculously escaped injury. The cart was at once hoisted to the wharf, and the horse was allowed to remain on the schooner until the tide conveniently erved for it to be taken off the ves
