

To Our Readers.

Again we have, the pleasure, by the kindness of our friends throughout B.C.A., of presenting our ILLUSTRATED ANNUAL for 1876; the scroll for which with all its pleasures and pains, successes and reverses, good deeds and shortcomings, is now rolled up and laid by; and here on the opening of its successor, we offer to others, to all, as we hope for ourselves, naught but sunshine and prosperity, and that its record when ended may be a good one and true.

This season, according to promise, we have inserted a set of DYEING RECEIPTS, the most complete ever published; these, with some other minor improvements, and the usual quantity of CHOICE, SELECTED MUSIC, we have every reason to believe, will cause the VICTORIA ANNUAL for 1876, to be even more highly appreciated than its predecessor.

For ourselves we would say this: we have omitted to occupy valuable space, by publishing a long string of CERTIFICATES for our MEDICINES,—as the public knows too well how easily these can be manufactured, *ad libitum*. OUR PREPARATIONS have obtained too strong and favorable a hold through the country; and we can rely upon this, and on the fact that inquiries need only to be made of the nearest Druggist, to ascertain their value and genuineness. On account, however, of a notice in some of the public prints, of more than one fatal case having resulted from the taking of an overdose of HYPOPHOSPHITES (not our manufacture), we would here guarantee to the public, that we do not employ in our COMPOUND SYRUP any *Strychnine* or other poisonous chemical whatever; and we would caution them, in buying, to be always certain to ask for and obtain the VICTORIA HYPOPHOSPHITES, which, as well as being reliable, is also certified to be chemically pure, by one of the highest medical authorities in the Dominion.

VICTORIA CHEMICAL CO.,
TORONTO.

STANDARD PREPARATIONS

OF THE

VICTORIA CHEMICAL COMP'Y.

VICTORIA HYPOPHOSPHITES.

(Compound Syrup of)
