

### SANTA CLAUS FLYING ROUND THE EARTH IN HIS NEW AERIAL CAR

Drawn by J. Duncan.

Sometimes Santa Claus is accused of getting old-fashioned. People tell him that the Reindeer are too slow. Last Christmas he surprised the Polar bears by building a flying machine which puts everything else into the shade. This year his car is called the Flying Cracker, and with it he hopes to deliver more presents than ever before. Little children never see Santa Claus, because all his work is done very late at night when the stars are twinkling in the sky and the lights gleaming in the towns.
