AUGUST.—Pursue vigorously your summer work. Finish haying and harvesting. Cut wheat a week or two before dead ripe, and the grain will weigh more, give less bran, and not shell in harvesting. The straw will be worth double. Secure the gleanings by a horse-rake. If it rains, harrow wheat and barley stubble to start the weeds, which plough under as a green crop. Take great pains to have clean seed-wheat, cleaning out all foul stuff, and especially the seeds of that deceitful, invisibly insinuating, rapidly multiplying weed, chess. Some farmers, by great pains every year, have at last totally expelled it from their farms.
