

LOST! A LOAD OF DEAD WEIGHT

Belonging to one of the best Soil Pulverizers ever built. Whoever finds it can keep it as its day of usefulness with us is done. In the world famous **Fleury Pulverizer and Packer** with its **New Roller Bearing Tongue Truck**, there is not one ounce weight of needless drag on the draft horses. Note these points in this

Complete Departure from anything else made

The **FLEURY PULVERIZER** with **NEW ROLLER BEARING TONGUE TRUCK**, in sizes 16-22-24, sections with or without Tongue Trucks. We can also supply any of these sizes with **SUB-SOIL WHEELS**

1. The jolting from uneven ground which, through the old rigid poles, fell directly on the horses' necks, is entirely borne by the **FREE OSCILLATING TONGUE TRUCK** which automatically accommodates itself to the slightest deviation of the Pulverizer.

2. **DUST PROOF ROLLER BEARINGS** take the place of the obsolete "friction" equipment of the two main axles and the **TWO DRAFT IRON BEARINGS**. These ARE made absolutely dirt-proof by close-fitting washers screened to both ends of bearing case.

3. The castings in which the roller bearings revolve are accurately **BORED**—not "cored," so that the bearings fit perfectly. In other makes the shafting "takes its chance" in the core of the casting. We use only the finest **REELED** shafting which is **clean and true throughout its entire length**, as distinguished from the common and irregular cast-shafting of competitive machines.

The effect of this revolution at these vital points of a pulverizer must be felt to be fully appreciated. The saving on draft is extraordinary—not to speak of wear and tear on machine. It means more work and better work with half the wear and sweat. It means ease and endurance in place of weight and wear.

Light Draft John Deere Gang Plow

HOW TO SELECT A PLOW. THE RULE OF FOUR.

Plow quality does not improve with age.

An inferior plow does poorer work, is harder to pull, and costs more for repairs every year it is in use.

Because certain things about a plow cannot be changed for the better after you buy it, care and study before buying, is important.

Judging the real worth of a plow is not difficult if four things are kept in mind.

First—Quality of work.
Second—Ease of management.

Third—Lightness of draft.
Fourth—Strength and durability.

WHY THESE FOUR QUALITIES ARE THE TEST.

First—Nothing takes the place of good work. Unless a plow does perfect work you cannot afford to own it, no matter what the price.

Second—Have regard for your own comfort—that pays. Get a plow that is easy to ride, and that can be operated with little effort on your part.

Third—Never work horses harder than necessary. Horseflesh and horsefeed cost money. An extra one-eighth horse-power added to the draft will cost you the price of a plow—very soon.

Fourth—Repairs are expensive—a good plow lasts longer than a poor one.

The Light Draft New Deere—Why it Pulls Easy

Consider five things when judging the draft of a plow. **First**—the shape of the bottom. **Second**—Material out of which it is made. **Third**—Equal weight on all the wheels. **Fourth**—Proper adjustments. **Fifth**—Staunchness of the plow.
