are floored with cement. These are a few of the commendable features of a farm home designed to reduce household work to a minimum and cater to the comfort of all its

### Illuminating the Farm Home

(Continued from page 6) family saw in their lamp was that it was comparatively cheap. He is not a wealthy man, is this friend of mine. He has a large family to raise and educate and a farm to pay for. and educate and a farm to pay for. "But this light isn't a luxury," ex-claimed my host. "At the price for which you car, get such a light, it is an economical necessity. Why, we have found out in the week we have had it, what a really pleasant evening is " is

Since then I have seen several such lamps, and every one of them seem to have transformed the evening life to have transformed the evening lite of their happy possessors. The prin-ciple or, which they work is simple. The mantle which covers the flame, burns the oil in a blue, non-luminous flame, instead of the vellow flame of the old-fashioned lamp. This blue may be burns than the vellow flame. flame is hotter than the yellow flame, does not require as much oil and does not emit the bad odor. The high quality, beautiful light, I under-stand, is given off by the mantle it-

stand, is given off by the manule it-self when heated to a white glow. These mantles last a long time and cost only a few cents when replaced. Several of our colleges have tested these manule lamps. In looking up their reports recently, I find that one of the best of these new style kero-sene oil lamps, burned for 65 hours, giving a light of over 60 ca. Menower on just one gallon of coal oil. The reading lamp in my own home, where sene on imps, ourned for 66 hours, the kitchen door in the woodshed, is giving a light of over 60 ca. Be-power instance; and the necessity of going an just one gallon of coal oil. The outside through rain and cold avei-reading lamp in my own home, where ed. The excrement is also of ma-we have connections with city electric urial value, much greater, in fac, power, and which I have always con-weight for weight, for weight, for weight, the average sidered excellent, is only 32 candle-op ower. Apparently the former can now have a better light than his one-time enviced city brother, and have ing flowers, cut before frost, will im it cheaper. And what a blessing a well into the winter.
