June Air In January

Most any furnace will produce a dry heat—the kind used to dry lumber in a kiln.

But that kind of heat will ruin the health of your family and destroy your furniture.

What month is the balmiest, healthiest, sweetest, most delightful of all the year?

June, of course.

The Sunshine Furnace has been designed, developed and perfected to give to your home in January the same quality of air that you breathe out of doors in June.

The Sunshine Furnace by warming fresh air and charging it with the necessary exact degree of moisture, not only warms but ventilates your home with pure, soft, healthful air every moment of the day.

Above the fuel door of the Sunshine Furnace is a water pan designed with scientific exactness to vaporize into the warm air the precise quantity of moisture necessary to the health and comfort of your family.

In the Sunshine heated home there are no dry, hacking throats, no burning or wrinkling skins, no dust or gas—only pure, humid, balmy, healthful warm air.

Engineering Service Free McClary's own heating engineers are at your service when you buy a Sunshine Furnace, to give you free expert advice on your home-heating requirements. Write to the nearest McClary Branch and ask for particulars about this service. A booklet, "Comfort in the Home," makes clear all the things you want to know about furnaces, and it is sent free on request.
