Dorsets. Can supply Dorset sheep of the various ages, of either sex, in pairs not akin, at very reasonable prices, quality considered. **Gilead's Spring Farm,** E. DYMENT, Copetown P. O. Wentworth Co.

GOSSIP.

Mr. Jas. A. Cochrane, Compton, P. Q., writes: "My sale of Shorthorns, at Sherbrooke, on Sept. 7th, was quite successful, in spite of unfavorable weather. The more valuable Scotch cattle were sacrificed, but those of milking strains were nearly all bought by local breeders at fair prices. Had milk records been kept, they would, no doubt, have brought more money."

AT LAST! AT LAST!

A man who is always on the lookout for novelties, says the St. James' Budget, recently asked a dealer in automobiles if there was anything new in machines.

"There's a patented improvement that has just been put on the market," replied the dealer. "A folding horse that fits under the seat."—[Youth's Companion.

T. D. ELLIOTT'S CLYDESDALES AND PERCHERONS.

Mr. T. D. Elliott, of Bolton, Ontario, a station twenty-five miles northwest of Toronto, on the C. P. R., has lately arrived home from Scotland and France with a small but extra choice consignment of Clydesdales and Percherons—all stallions. The Clydesdales are Gallant Barrie, a son of the great sire, Prince Thomas, a bay five-year-old, a very large, quality horse, full of character, with a stylish top, and a flash mover. The other is Baron Fife, a bay three-year-old son of Baron's Pride, dam by Lord Erskine. He is a massive, heavy-muscled, 1,800-lb. colt, that combines size, quality, style and action to a wonderful degree, and is certainly a coming sire, as his individuality and breeding are gilt-edged. In Percherons, there are seven from the leading breeders in France; blacks, browns and greys, two and three years of age, an exceedingly choice lot, personally selected by Mr. Elliott on account of their size, smoothness, action and quality, and they have it all—a rare nice lot. Percherons are certainly gaining in favor in Canada, and there is nothing better to cross on our lighter mares. These horses will be sold right, with a small profit, for a quick turn-over. So buyers should look sharp, if in want of one.

W. E. WRIGHT'S CHESTER WHITES AND SHROPSHIRE.

Mr. W. E. Wright, whose farm, Sunnyside, lies about 1 mile from Glanworth Station, between London and St. Thomas, and 9 miles south of London, is one of the best-known breeders in Ontario, and has always been noted for straight and honest dealing. His specialties are Chester White hogs of the improved bacon type, Shropshire sheep, and Mammoth Bronze turkeys. His Chester Whites were never so numerous, nor of so high a quality, as now; in fact, this is one of the leading herds of that breed in Canada. This year, at Toronto, they carried off a number of the best prizes, and did not get all that was coming to them then. For sale are a number of both sexes, and all ages, pairs not akin. The Shropshires number about 90 head; large, well-covered and in grand condition—strictly a high-class flock. There are about 20 ram lambs and the same number of ewe lambs for sale—a grand good lot. Many of the ram lambs will make high-class herd headers. In Bronze turkeys, there are about 90 for sale, toms and hens; part of them the get of a 40-lb. imported tom, the other stock tom being nearly as large. They are all that could be desired in turkeydom, combining size, quality and perfect colorings. Write Mr. Wright for what you want.

QUESTIONS AND ANSWERS. Miscellaneous.

TREATMENT OF SHALLOW SOIL.

Please give advice on the following: We have a field about 4 acres of poor land. The soil is shallow clay loam, about 4 inches on the rock. It has been in pasture for seven years, but grows very little but wild kinds of grass. It has been sadly neglected. There is good shade and good water in the field. It is near the house and I would like to improve it, to keep it as pasture for cows. I would follow any way you advise to improve, and have plenty of manure ready to put out.

H. R.

Ans.—With so shallow a soil, not much growth need be looked for. We would advise manuring, and not pasturing closely. It might be wise to experiment with a part of the field first. We have not much faith in reseed, but an experiment in that line might be tried also.

T. B.

MOORING-CLOAK BUTTERFLY

I am sending you a specimen of butterfly, numerous among our oaks, and a cocoon. The butterflies started from almost every stock. Kindly tell me what they are, and if they are injurious.

R. F. S.

Ans.—The butterfly—a dark-colored species, with a narrow, yellowish band along the margins of both pairs of wings—is known as the Camberwell Beauty, or Mooring Cloak. The last name is appropriate to its appearance. The butterfly is harmless to the oaks; it cannot eat any part of them, and its larvae feed upon the foliage of poplars and willows. The cocoon is that of a Cecropia moth. When it reached us, a large number of yellowish, fat, footless grubs had emerged from its body. These are the larvae of a parasitic two-winged fly—a Tachina—that had developed in the body of the pupa contained in the cocoon, and had consumed its nutritious contents. These Tachinae serve the useful purpose of holding in check the undue multiplication of such large insects as the one you sent us.

COW FAILING TO COME IN HEAT.

Three-year-old heifer calved about the last of June and has not since come in heat. Can there be anything done to bring her around?

A. T.

Ans.—There is nothing unusual in this case. Give good food, and keep her in the best possible health, and nature will help you out better than anything else. No drug will be of any benefit.

R.

GOSSIP.

CHERRY LANE BERKSHIRES.

Cherry Lane Berkshires rank among the high-class herds of Ontario. They are the property of Mr. Sam Dolson, Alloa P. O., Norval Station, G. T. R., who has been breeding Berkshires for many years, although this is his first introduction to the readers of "The Farmer's Advocate." His Berkshires are second to none. The main stock boar, Norval King 14899, by Colonel Brant, dam by Baron Lee 4th, is a massive, long, deep hog, on clean, heavy bone, and has lots of quality to back him up. His Lieutenant in service is Cherry Lane Joe 16445, a son of his, and out of a daughter of Longfellow 10th of Highclere. This hog won second at Toronto in a very strong class, something that speaks louder than words as to his form and quality. Prominent among the brood sows is the 600-pound daughter of Crown Prince that won third prize at Toronto; a sow of great length, depth, and quality that is now in pig to Norval King. Another of the rare good kind is Cherry Lane Blossom 10388, the dam of Cherry Lane Joe described above, sired by Longfellow 10th of Highclere. This sow won second at Toronto in a very strong class, and two of her daughters also won in the six-months-old class. Enough has been said to convince anyone interested that the herd is gilt-edged, and the dozen or more brood sows are equally as good, many of them being winners. For sale are young stock of both sexes, and pigs of various ages, and pairs not akin can be supplied.

One the lameness and remove the bunch without scarring the horse—have the part looking just as it did before the blemish came.

Fleming's Spavin Cure (Liquid) is a special remedy for soft and semi-solid blemishes—Bos Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It is neither a liniment nor a simple blister, but a remedy unlike any other—doesn't irritate and can't be mistaken. Easy to use, only a little required, and your money back if it ever fails.

Fleming's Vest-Pocket Veterinary Adviser describes and illustrates all kinds of blemishes, and gives you the information you ought to have before ordering or buying any kind of a remedy. Mailed free if you write.

FLEMING BROS., Chemists, 45 Church Street, Toronto, Ontario
