

Wise Men and Women Know

that most of the sicknesses of life come from inactive bowels and from unhealthy condition of the organs of digestion. If your digestive system is not working right, your food does not nourish you—poor blood and weakness follow; if your bowels are inactive—waste matter poisons the whole system and serious sickness is sure to follow. To take promptly

BEECHAM'S PILLS

is to save yourself trouble and expense. Gentle, but quick; safe, but thorough, they enable the bowels to carry away waste matter naturally and tone up the whole digestive system. They will not injure the most delicate. They help you to get your bowels and your digestive organs in that condition when they can take good care of themselves and of you. Beecham's Pills

The figures in the grand total for 1910 include the estimated crop of the Argentine. This is figured at 27 million quarters. In view of the fact that Argentina produced not more than 15 million quarters in 1909, this estimate seems a shade high. However, even with a substantial reduction in this quarter the world's wheat crop of 1910 will be the second largest reaped in the period covered. The estimate of the Russian crop is probably low.

Preliminary estimates for this country are usually wide of the mark, either too high or too low. Russia last year harvested a crop that figured out to 96,650,000 quarters. Preliminary estimates made in September at about the date the above estimates were made this year, placed the 1909 crop at 73,350,000 quarters. It is probable the estimate is under again this year. It would seem so at least from the rate of the Russian crop is probably low. Russia is shipping wheat.

Australia leads the world in sheep farming, according to the statement of Consul Henry D. Baker, of Sydney, showing the number of sheep in the countries leading in this industry: Australia, 87,043,266; Argentina, 77,581,000; Russia, 58,510,523; United States, 54,631,000; United Kingdom, 30,011,833; New Zealand, 22,449,053; India, 18,029,181; France, 17,461,379; Spain, 16,119,051; Cape of Good Hope, 14,848,795; Uruguay, 13,915,796; Italy, 10,877,000; Austria-Hungary, 10,743,707. The estimated capital value of the Australian flocks is 220,352,400, and the annual gross output of the flocks is estimated at 75 per cent. of the value.

"Mistah Jenkins," asked an old negro of Atlanta, of his employer, "would yo' be so good, sah, as to explain to me 'bout this wireless telegraph business I hears 'em a talkin' 'bout?"

"Why, certainly, Henry," responded the employer, "though I can do so only in a general way, as I myself know little of the subject. The thing consists in sending messages through the air instead of over wires."

"Yassah," said Henry, "I knows 'bout dat; but, sah, what beats me is how dey fasten the air to the poles!"
