On the British front the fighting still is confined to raids. British airmen continue their bombing

operations and have accounted for 22 more German airplanes. There has been heavy artillery firing on the American sector north west of Toul, but no infantry action. In aerial combat another German machine has been brought down.

BAD SMASH **NARROWLY**

Shortly before 10 o'clock lastt night an automobile driven by Jack of 22 Fair Avenue was run down by the truck from the East End Fire Station answering an aarm. The fire truck was being driven by Murray, an alarm having been honed in from the corner of Nelson and Wood who was coming down Colborne St., in his car apparantly became confused and lost control of the car. Scraping the side of the fire truck the car crashed into the curbing and a telephone pole and was badly wrecked. The front wheels, and a telephone pole and was guards and radiator were totally smashed and other damage done. Besides the driver there were several ladies in the car but fortunately they escaped uninjured. The truck suffered little damage. A false conception of a practical joke was thus responsible for what might have proved a fatal accident for the alarm proved to be false. The authorities have since learned that it was turned in by an unknown man at the police. box at the corner of Peel and Col-borne streets.

War Garden Bulletin

PRACTICAL DAILY GUIDE FOR VACANT LOT AND BACKYARD GARDENERS ER PRODUCTION CAMPAIGN.

Issued by the Canada Food Board in collaboration with experts on the staff of the Dominion Experimental Farm,

POTATO BUG.

One of the worst enemies the war gardener has to contend with is the potato bug. Where potatoes are well on by this time the over-wintered female potato beetles lay clusters of bright, orange-colored eggs on the underside of the leaves. These soon hatch into the well known dark-colored grubs. There are several generations of the insect during the season and both the grubs and the beetles continue to feed from spring to autumn.
The destruction of the beetles early in the season is important. As soon as they are seen to be present the vines should be sprayed either with Parts Green or arsenate of lead. At Ottawa, the following formula has given satisfaction. has given satisfaction: 8 ounces of Paris Green and 1 1-2 pounds of powdered arsenate of lead to 40 gallons of water. Both Paris Green and arsenate of lead may be used in Bordeaux mixture and if this is done the above proportions are suitable for 40 gallons of the mixture. Poisoned Bordeaux mixture such as this not only destroys potato beetles and grubs but also protects the plants from bright and rot. Applications should be made early in June, when the beetles are first seen; then early in July and again about August 1, 15 and 31.

for no gains although Berlin in its latest report claims progress here and to the south.
