(Philadeiphla Record.) Nothing could so comprehensively disclose the sinuosities of German psychology as the proceedings in regard to Captain Fryatt. The captain

was shot by order of a court-martial on the ground that he had tried to ram a submarine. He got away at the time, but after more than a yea the Germans got him and killed him. This was only of a piece with mos of Germany's conduct during the war and there was no obvious reason why

it should have lain more heavily than many other things on the German con-science. The Provisional Government might have disclaimed all responsibili for what the Imperial Government d. But the Fryatt murder seems to have disquieted Germany more than Miss Cavell's murder, or the deporta-tion of 125,000 Belgians, 6,000 of whom perished, or the sinking of the Lusi

This is true enough, but if only in the small part of the truth involved in the Fryatt case. The German pundit produces as much international law as will vindicate Germany, and ignores the rest, and his countrymen stand awe-struck at the vastness of his erndition. The law of nations provides that a reval vessel in war may summon a merchant vessel to stop submit to search and seizure. submit to search and setzure. If he refuses it is at his own peril. If he tries flight it is lawful to sink him. If he fights he is outside of the law of nations, and in the event of capture may be shot.

But the essential fact in such a case is that he refused a lawful command to stop and be searched. The worst that could happen to him if he were an ememy would be capture. But the German submarines did not summon sels to surrender. They did not call on them to submit to search and seleure. The captain of the Lusitania had no opportunity to save the lives of his passengers and crew by surren-dering; the vessel was simply blown up without warning. In nearly all cases the submarines proceeded in this manner Every merchant knew when he saw a submarine what was in store for him. The submar-ine would only sink him if it could, and it might or might not affordany opportunity for the persons on board to escape. In most cases no opportuni ty was given; the vessel was sunk with all on board unless the crew managed to flee while their vessel was going down, and they might be hundreds of miles from shore and the weather be stormy.

Professor Schuecking and the national court-martial justify the killing of Captain Fryatt by an appeal to that international law which the German submarines treated with contempt from the beginning of the war to the erd. The law is made for foreigners; Germans are always above law

#### An Old English Custom

In the northern counties of England there was practiced at Easter up to at least half a century ago the curious custom of "lifting." It must still exist. I have before me, writes a cor-respondent, a newspaper cutting of 1860 giving an account of an indignant commercial traveler of the ritual to which he was subjected on Easter Tuesday by the maids of a hotel at Crewe. He was placed in a chair, lifted three times and kissed by the merry revelers. It appeared that a like privilege might have been his for the exercising on Easter Monday a privilege which absence made impos re is a remonstrance of a century earlier by a man who was treated by the maids of the Talbot Inn, Shrewsbury, in a similar fashion, but who in addition had to pay a fee. -London Chronicle.

A good story concerning De Valera, the Sinn Fein leader, is going the rounds of London.

It appears that recently a certain London newspaper sent a reporter over to Ireland to take shorthand notes of one of his speeches. The audience objected, but De Valera was all smiles and urbanity.

"Let the gentleman remain," he said. "So far as I am concerned, he is at liberty to report my speech venbatism if it pleases him."

De Valera advanced to the front of the platform. Eyes glistened, ears were all attention, and the reporter's pencil was poised in the air. esowed one more benignant smile on the newspaper man, winked wickedly at his audience, and began his speech—in the Gaelic language.—Pearson's Weekly.

(Winnipeg Free Press.)

That sea-power depends on some thing else besides armor-plate and 17-inch guns is quite unobstrusively mentioned by Admiral Beatty in his remarks and the British squadrons which blockaded the German ports. "Stretched across the waste of waters from west of the Hebrides to the Arctic icefields, these ships kept their watch and ward in weather that had to be experienced to be under-

The stretch of sea the blockaders had to patrol is well described by the admiral as a "waste of waters." The Atlantic, which surges against the fanged coasts of the Western Islands, is the home of Tempests. It spreads, lonesome and sullen, into the frozen zones of the ice-cap, dotted by a few bare rocks, overhung by steely, un-friendly skies, the air too heavily laden with brine, the whole region storm

haunted and alien to man.

In the course of the centuries this wild northern sea has preserved all its characteristics; the blasts of the hurricane filled the sails of the Norsemen's long ships, the ley spray lashed the oarsmen, the black teeth hidden in the curling foam ripped

the timbers and strewed the waves with corpses. This bleak water was one of the highways down which passed the great migrations which peopled northern France and founded Dealing With the Occult.

It was a people compounded of the races who long ago made a highway of this savage sea-track that guarded the British Isles during the war. It is no idle figure of speech to describe the modern Briton as a descendant of the sea-rovers. That, precisely, is what a great many Britons are, and that makes them the wardens of the North Atlantic to-day just as their pirate fathers were its wardens centuries ago, they in their swan-prowed longboats, and the modern Briton in his destroyer.

Battleships are easy of construction brave men are common to all races but the spirit that can thrive on the waters which the blockading fleets had to guard is the spirit on which British sea-power rests. It is not the sea fights, the winning or losing or battles, that will determine the control of the sea. It is the actual ruling of the waves themselves. A chance shot may sink a dreadnought, but the power to dominate by seamanship the wastes of water stretching from the outer Hebrides to the Arctic Ocean—this goes to the foundation of naval supremacy.

An astonishing number of books on occult subjects are being published in these days, especially on lines relating to the future life, the theme taking on a new interest because of the war and its losses. One writer, Prof. W. J. Crawford, of Belfast, is dealing with so-called spirit manifestations in a new way. For one thing, he has a new way. For one thing, he has tried seating the medium on a weighting machine while the manifestation are going on and watching the varying record of her weight. He d that where a chair or table was levitated an increase in her weight al most corresponding to the weight of the piece of furniture was noted. When there were rappings her weight lessened, the amount lost varying with the intensity of the sounds. What these phenomena indicate to his mind or what he expects to prove by then does not appear.

HAITI DEVIL WORSHIP.

#### West Indies Blacks Are Vicious Savages.

Aside from warlike considerations people have become accustomed to being safe that it is something of a shock to learn that only a few hundred miles from the centres of American culture there is an almost savage country, the islands of the West Indies are, as a rule, the abodes of enlightenment where any one, man or woman, may travel without fear of molestation. "But such is not the case in Haiti," says A. Hyatt Verrill, in "the Book of the West Indies." "Here the shortcomings, the failures, the savage in stincts of the blacks have been fed and fostered for centuries. From untamed jungles they were brought in recking, pest-ridden slave ships to starve beneath the lash. Debased, untaught, they rose, and in a resistless wave of black swept the dominating whites from the land. Then were loosened up the pent-up hatred, the und ug lust for revenge, the supressed s. .ery of the African races, and slaughter, rapine, incendiarism, torture and debauchery stalked naked through the stricken land.

Haiti has improved considerably since then, but there is yet much room for improvement. The only wonder is that any vestige of civilization remains, that there is the semblance of rule, of industry, of order in the republic." Among the barbarisms now prevalent in Haiti are voodooism and obeah, the former a kind of devil worship, and the latter a form of witchcraft. "In its most fanatical form voodoism requires human sacrifices, which are accompanied by cannibalistic feasts and unspeakable orgies. ... Obeah, on the other hand, is merely witchcraft with no religious significance whatever, and in its most malignant form consists of poisoning with devilish ingenuity, and in its commonest and least virulent form amounts merely to a lot of nonsense, hocus-pocus and mummery." an almost savage country, the islands o
