#### "EVIL DAYS."

A mighty boom is being assiduously worked up by the Liberal press and the party bosses to give Premier Laurier a big welcome on his return from his trip across the Atlantic. Ostensibly it is being proclaimed as a non-partisan public affair, but in reality it is being arranged to turn public attention from the rank scandals of certain of the Laurier Cabinet Ministers. It may be said in reply that that is only a Tory view of it, but let the thinking reader peruse these editorial comments from the Montreal Witness, a Liberal newspaper which after making obeisance to Sir Wilfrid, says:

"Sir Wilfrid Laurier upon his re turn finds himself confronted with a task heavy enough to frighten a man less brave and less noble. There were reasons for his having been unwilling to forsake his place at the helm at home. No one can deny that the Canadian Liberal party has fallen upon evil days. No doubt it is largely responsible for our present condition of prosperity, but na tions and parties as well as men sometimes in gaining the whole world lose their own souls. Once the Liberal party was the foe of privilege, the enemy of corruption, the friend of all the sturdy virtues that go to the upbuilding of a nation's character. It came into pow-

tion's character. It came into power im support of these ideals. He is a bold man who would deny that of late there have been many departures from them and a general lowering of tone which acts as dry rot."

This is a frank confession by a powerfully independent Grit paper, points out the Brockville Times, that the Liberal Government of Canada is in rotten shape, and that Sir Wilfrid Laarier is expected to clean it up. It is a pious hope, but it will never be realized. Sir Wilfrid would like to do so, but he can program do it than King Canute.

Continued From Page One.

rangements, and award the contract for this work.

Mr. McArthur stated that the Internal Management committee had the supplying of McKeough School and the Collegiate with coal, but on account of some of the tenders being for the delivery of the coal in the basements of the buildings and some not, the committee had thought it wis to keep the tenders from publication. The committee had also under consideration the proposition to have McKeough School heated with natural gas. He moved, seconded by Mr. Morley, that the matter be left over for the time being.—Carried. It was moved by Messrs. McArno more do it than King Canuts could sweep back the sea. The Laurier regime is on the downward path and will continue going down until the fast approaching end.

#### ONTARIO AND MANITOBA WHEAT

A few years ago, before wheat-growing in the Great West had reached anything like its present proportions, Ontario farmers cart d their own what to the nearest mill, and during the grinding talk dopolities with their neighbors till the time to return contentedly with feed or flour for home use. If at that time some soothsayer had predicted that in some sections of the province wheat growing would be abandoned on account of Western competition, and that farmers would refuse to accept flour made from their own wheat to the nearest mill, refuse to accept flour made from their own wheat when Manitoba flour was available, they would have smiled pityingly on the poor deluded

But this decline in the market is But this decline in the market is exactly what has happened to the Ontario farmer. Millers are now able to run only eight or ten hours a day, with the result that feed costs nearly double what it did in the days before the Western competition had cut into the market. It is safe to assert that during the last twenty years farmers of Onlast twenty years farmers of Ontario have lost millions through the decline in the demand for Ontario flour in this province.

While here in Ontario, Western flour has gained an enviable ascen-

flour has gained an enviable ascen-dancy, enterprising Ontario millers have been able to compete successfully with Western flour in the Maritime Provinces, where Ontario blended flours have captured the market. Enough Western wheat added to the finely flavored, nourishing Ontario wheat to bring up the percentage of gluten to the proper strength, and now, even in On-Enough Western wheat is per strength, and now, even in On-tario the most popular loaf sold by the largest firm of bakers is made of Ontario blended flour, and the public have been quick to respond wherever the new bread is put upon

the market, as it is now shipped daily to a number of towns throughout Ontario.

What has won the unprejudiced approval of the Eastern Provinces ought to be well worth the attention. ought to be well worth the attention of the Ontario farmers, whose interests are best served by doing all in their power to encourage the sale of Ontario wheat. As the new flours find their way into general use through the homes of Ontario, the wheat market will improve, and stockmen may expect to secure bran and shorts at a more reasonable figure. Increased demand for Ontario blended flour will doubtless have a great deal to do in evening up the difference in prices between Ontario and Manitoba wheat.

# \*\*\*\*\*\*\* NOTES FROM ERIEAU

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

school-a clever man with a most extended and inestimable experience. He represents a company, of which he is chief engineer and managing director, which has an undisputed re-putation as a high class concern, so that, all things considered, Chathan is fortunate in securing this contract

with him.

Ald. Potter, in opening the question and in introducing his by-law to ratify the agreement and contract, that the committee had met explaned that the committee had met Mr. Read, with the city solicitor, and the superintendent of the elec-tric light department, Mr. Jones. Mr. Jones was unable to be present at the meeting, as he—Ald, Potter—had tried to get him, but was unable to do so. Mr. Jones had received a copy of the contract, however, and had not made any complaint to the It was moved by Messrs. McAr-thur and Brackin, that 100 feet of new hose, at a cost of \$10, be pur-chased for McK-cough School.—Carcommittee.

The Mayor thought that it would be perfectly proper to go on and pass the by-law even if the superintendent had not made a report, especially after the conference in the city solicitor's office when Mr. Jones

Mr. McArthur also introduced a matter of some importance, which brought a compliment to him from the chairman for his thoughtfulness. This was with regard to the weighing of coal which is purchased for the city schools. Mr. McArthur thought that all coal used for city purposes should be weighed on the city scales free of cost. This would insure the Board a proper weight.

Mr. Richards—I think Mr. McArthur's idea is a good one, and

posed to the present contract.

Ald Potter—We have a good agreement. We met in the solicitor's office when all of the clauses were fought out, and the engineer was present and at that time he offered no chieftings. thur's idea is a good one, and should be acted upon. Mr McArthur thought that this
