is a type of thousands of young girls who are emerging from the chrysalis stage of their existence, as they enter upon their "teens." Nervous, excitable, irritable, stirred by strange, unknowable forces within them, each a mystery unto herself, our girls need the tenderost care, the most loving, patient oversight, and the aid of Dr. Pierce's Favorite Prescription, to safely carry them through this critical period, during which, in too many lives, alas, are sown the seeds of distressing forms of diseases peculiar to the female sex. But this boon to womankind will prevent all such diseases, or cure them if they have already seized a victim. Woman owes it to herself, to her family, and to her social station, to be well and strong. Let her then not neglect the sure means of cure. "Favorite Prescription" is a legitimate medicine, carefully compounded by an experienced and skillful physician, and adapted to woman's delicate organization. It is purely vegetable in its composition and perfectly harmless in its effects in any condition of the system. Sold by druggists; \$1.00, or six bottles for \$5.00.
