GIRL MAILED BY "ROOSEVELT" PANTHERS

Nearly a Tragedy in Marine Gardens When the Animals Got in a Terrible Rage.

London, Aug. 10.—A girl animal tamer, Miss Alice, was attacked and badly mauled by two "Roosevelt" panthers in the Marine Gardens at Portobello, the seaside resort near Edinburgh.

She was taking the animals from the cages to the arena for the performance at the time. The panthers were in a sullen humor, and resented her efforts to coax them along the passage leading to the arena. They hung back and suddenly sprang on her, bearing her to the ground.

The large crowd present were horrified to hear screams coming from the passage. The manager rushed to the girl's rescue, firing his revolver, which was loaded with blank cartridges, while others, with iron bars, after a fierce struggle, thrust the infuriated animals off their victim who by this time had swooned.

The girl was badly lacerated on the chest, thigh, and scalp, and was covered with blood. Last night her condition was reported to be rather worse, and it was feared that complications might ensue.

PRINTERS GATHERING FOR CONVENTION

St. Joseph, Mo., Aug. 9.—Union printers from every state of the Union, Canada and Mexico have begun to arrive here to attend the International convention, which opens Monday. A special train of seven coaches bearing delegates and visitors arrived over the Chicago Great Western, and carried big delegations from Chicago, and Minneapolis and delegates from Indianapolis, Newark, Providence, New York, Boston, Toronto, Muncie, Ind.; Waterloo and Marshalltown, Iowa; Fargo, N. D., and Sioux Falls, S. D.

McGUIGAN NOT GOING TO THE SOO WORKS

Toronto, Aug. 9.—Mr. F. H. McGuigan, in answer to a report published today, said that there was no possibility of his soon becoming identified with the Lake Superior Corporation as its head, at the solicitation of powerful London financial interests, who desire to have a practical railway man associated with the enterprise.

The report was that Mr. McGuigan, who is at present engaged building the power line from Niagara Falls to Toronto, was offered \$25,000 a year to join the corporation, and conduct a progressive policy in connection with the development of the various industries, and also an active railway policy, including the extension of the Algoma Central Railway to the Trans-Continental line.

Atrocious Murder of a Young Girl

Rochester, N. Y., Aug. 9.—Buried in a grave, the body of Miss Anna Schumacher, a 17-year-old girl, was discovered this morning in a lonely spot above the border at the river bank, close to the Holy Sepulchre Cemetery. She left her home in this city on Saturday afternoon to put flowers on the graves of her father and sister. When she did not return a search was instituted, and the body of the girl was found this morning at the place indicated.

The body was in a frightful condition. It was literally covered with

blood and wounds. There were several wounds on the head, evidently made by the hands of the assailant. At the autopsy held this afternoon by the coroner's physician, it was ascertained that the girl came to her death by strangulation, the bones of her throat being broken and crushed.

The autopsy also showed that the young girl had been criminally assaulted before she was strangled. Public sentiment is aroused to fever height, and the police force of the city, as well as the constables of the surrounding towns, are looking for clues that will lead to the arrest of the murderer.

Pekin Surrenders to the Mikado

Pekin, Aug. 9.—The Chinese foreign board and the grand council have been in consecutive conference with Prince Chun, the regent on the Japanese situation since the issuance of Japan's note announcing her intention of proceeding immediately with the reconstruction of the Antung-Mukden railroad, without China's co-operation. The regent showed great anxiety at Japan's attitude of coercion, which was supported by Great Britain.

The Associated Press tonight learned that China has virtually unconditionally conceded to Japan's demand that the railroad be made of standard gauge and is willing to accept any reasonable

compromise, but is debarred from giving a treaty consent on account of Japan's suspicious attitude in forcing on the gauge, claiming for the Antung line advantages existing on the South Manchurian Railroad and through the refusal to negotiate the privileges in the region. However, the note said, if Japan was determined to go ahead with the construction of the road China was defenceless.

Fort William Dockmen Walk Out

Port Arthur, Aug. 9.—Five hundred freight dockers employed in the C. P. R. sheds at Fort William walked out on strike this morning. They demand a raise from 17 1/2 cents an hour for day and 22 cents for night to 22 cents and 25 cents.

The Assiniboia, of the C. P. R. line, arrived this morning from Owen Sound with a large load of package freight, and efforts are being made to get her

unloaded by the checkers and crew in time to leave tomorrow afternoon on regular time. No attempts are being made to unload other freight boats in the sheds.

The men walked out without any formal notice. There are no indications of any trouble in the sheds at Port Arthur, where the same wages are being paid, but if the strike is successful at Fort William it will doubtless be duplicated here.

STOCKHOLM'S STRIKE ON VERGE OF COLLAPSE

Strikers Fail to Stop All Street Traffic as Threatened.

Stockholm, Aug. 9.—The streets of Stockholm today presented a livelier aspect than on any day since the general strike began. Many carts and street cars were moving through the streets, despite the threats of the strikers to stop all traffic. King Gustave drove through the city today, passing before the strikers' headquarters. He was without an escort.

The gas and electric plants are working without interruption, and tonight it seems doubtful whether the employees of the railroads will join the movement. Rumors are again in circulation concerning a probable collapse of the strike, the workmen being dissatisfied with the speeches and the methods employed by their leaders in carrying it on.

HOT IN NEW YORK

Several Deaths and Many Prostrations Are Reported.

New York, July 9.—The official thermometer of the local weather bureau registered 82 degrees at 3 o'clock this afternoon, the hottest day of the summer and within three degrees of the hottest August day ever recorded here by the department. In the succeeding hour the mercury fell four degrees and at sunset a refreshing breeze sprang up, but parks, recreation places, city docks and open spots are crowded to night with sleepers, watched over by the police, and the temperature was still hovering above 70.

Tens of thousands sought Coney Island and the beaches for relief, but it was 95 degrees at Coney Island when it was 93 in New York.

Prostrations were continually being reported, and five persons—four of them infants and one an old man—died from the heat at the seashore.

D. B. MCKINNON DEAD

Was One of the Oldest and Best-Known Men of Huron.

Blyth, Aug. 9.—D. B. McKinnon, one of the best known citizens of Huron County, died here on Saturday, Aug. 7, in his 73rd year.

The deceased was born in 1836 in the county of Halton, and early entered mercantile life in Milton and later in Brampton. In 1861 Mr. McKinnon removed to Blyth, where he has since resided. For many years he was in constant life, but retired a few years ago, continuing the office of postmaster, an appointment he received in 1874. The deceased was active in everything pertaining to the welfare of this community. He was a member of the first council of this municipality and worked energetically for the building of the London and Wingham Railroad.

In 1867 he married Mary F. Atkinson, who died seven years ago. He is survived by one son, J. S. McKinnon, of Toronto, and one daughter, Mrs. Dr. Milne, who resides here. Two brothers and one sister survive, being S. F. McKinnon, Toronto; M. F. McKinnon, in Saskatchewan, and Mrs. James Mullin, Lucknow.

Mr. McKinnon was a staunch Presbyterian, and it is a somewhat peculiar coincidence that he served continuously on the board of management throughout the pastorate of Dr. McLean, which lasted 40 years, and retired from active work simultaneously with Dr. McLean. The funeral is on Tuesday and is under the auspices of the Masonic order.

BACK TO McMASTER.

Montreal, Aug. 9.—After a brief ministry of sixteen months Rev. C. R. Duncan has resigned his charge of the Baptist Church at Sherbrooke, Que., to continue his college course at McMaster University, Toronto. Rev. Mr. Duncan will sever his connection with the church on Sept. 19.

THE POWERS INTERVENE IN CRETAN CRISIS

Turkey Warned Not to Take Action Threatening Disturbance of Peace.

Athens, Aug. 9.—The Greek Government today replied to the Turkish minister's formal reply to the Porte's note of several days ago, which asked Greece to express her disapproval of the annexation agitation in Crete and formally to declare that she had no ambitions regarding the island.

The reply protests formally against the complaints contained in the Turkish note, and gives instances of Greece's constant endeavors to maintain frank and friendly relations with Turkey and to keep closer the bonds uniting the two countries.

The note declares Greece has done and still wishes to do all in her power for the peaceful settlement of the Cretan question. In the Cretan question, the note continues, the Turkish Government itself several times has taken occasion to say that the conduct of Greece has been frank and loyal. The note says that Greece can only leave the question of Crete to the protecting powers and conform to their decision. The note repeats the assurance that Greece, being in no way implicated in the annexation movement in Crete, will preserve the same correct and loyal attitude as in the past.

Vienna, Aug. 9.—The Austrian ambassador at Constantinople is actively endeavoring to prevent the Cretan crisis from reaching a point where the Greek Government appears to have solicited the good offices of Austria, and the latter has instructed her ambassador at Constantinople to represent to the Porte that any action threatening the disturbance of peace will result in alienating the sympathies of the four protecting powers.

CANADA TO SEND TEAM TO SEA GIRT MATCH

Ottawa, Aug. 9.—Canada will send a team to Seattle this autumn to shoot for the Palma trophy. The trophy was won from the United States some years ago by Canada, who lost it to England, and two years ago the United States won it by defeating England and Canada. The Dominion now wants it again.

A GREAT GATHERING AT BARN RAISING

Westminster Farmer Erects a Fine Structure—Helper's Narrow Escape.

Glanworth, Aug. 9.—Mr. David Jackson, of lot 19, con. 5, Westminster, erected a fine barn today. The barn is a two-story structure, composed of a receptacle for the bovines, composed of the product of Lebanon, 40x54 feet, with an annex 28x34 feet, lying upon a cement wall 9 1/2 feet high. The huge edifice was erected on Saturday afternoon, when about 75 stalwarts mustered, under the diplomacy of Mr. Peter Johnson, with Mr. James Clark, a veteran first lieutenant. A similar number was captained by Mr. E. Jenkins. After the huge bents were securely moored, the contestants seized the ponderous plates and pulleys simultaneously at a given signal without a semblance of danger, seemingly while chaos reigned supremely, when Mr. Caleb Millson was precipitated a distance of about 40 feet, and was borne away to a grassy place, where he lay for some time. He was picked up by Mr. Johnson, who carried him to the barn, where he was laid down on a bed of straw. Mr. Millson had no bones broken.

The contestants under Mr. Jenkins met with a crushing defeat. A daily spread was served on the lawn, by a galaxy of matrons and maidens, including Misses Eva Learn, Grace Manning, Della Manning, Lena Mann, Annie Simpson, Reta McPherson, Myrtle Hunt, May Manning, and Mrs. Crinklaw, Mrs. House, Mrs. Hill, Mrs. Bates, and Mrs. Pison, in all fully fifty.

Messrs. William E. Mann, of Chi-

TUESDAY, PROBS:

FAIR AND COOL.

SMALLMAN & INGRAM LIMITED

DUNDAS AND RICHMOND STREETS.

It's Reaping Time at This Store

The farmer is busy with the harvest, reaping the bountiful crops, for he knows the grain must be cut when it is ripe, even if he does not need it until winter.

It's just the same at this store. You must reap the bargains when they are ripe. It's harvest-time now with us, and many harvesters are reaping bountifully from the money-saving crops in every field in this store. And nothing in the world, other than the great savings, could induce people to buy as many are doing—more than you need for the present season. But unlike the farmer, our harvest of bargains is seasonable merchandise—wearing apparel that is needed right now, and will also be needed another season, which, to buy then, would cost you in most cases double.

August, of All Months, Is the Bargain Harvest With Us—the Month of the Greatest Opportunities of the Year.

For instance, all SUMMER PARASOLS at prices about 50 per cent less than their value.

Dress Muslins at Half-Price, 15c, 25c and 50c qualities 7 1/2c, 12 1/2c and 25c

We have a fairly good shipment now on sale. They come direct from the manufacturer in Ireland to us. Get your share this week. If you don't want a dozen, take 4 for 25c.

WEST AISLE—MAIN FLOOR.

UNNAMED HEROES ARE NUMEROUS

Simple Chronicles of Brave Deeds Performed by Workmen.

Something like 200 feet above the level of the River two men were working on the top of the Manhattan tower of the Queensboro Bridge one day not long before the great structure was completed. Ten feet below them half a dozen more workmen were engaged, and farther down in the unfinished framework, at various distances apart, others, perhaps two-score in all, toiled each at his own particular task. They were all of a high physical and mental type, as men must necessarily be who work at bridge construction or in the erection of our modern skyscrapers. A solid workman, or one lacking in bodily strength or in nerve, has no place among the clear-eyed and sure-footed craftsmen who handle steel and iron high in air, under conditions whereby a misstep means a certain and terrible death.

A strut or brace (being a steel beam of several tons weight), in two grasp of a huge derrick was lowered on the day in question to its proper position in the structure of the tower top, the business of the two men working there being to guide it into place. Before the great weight of steel, on this occasion, could be securely fastened after the derrick had loosened its grip, it began to slip, for a reason that has not been explained, and the utmost efforts of the two failed to prevent its sliding toward the edge of the open space below. There was no danger to them, for they stood on a platform of the way and watch it plunge downward. The men at work below were in imminent peril, however, for, should the mass of steel fall, it could not fail to carry many of them down with it. There was no time for consultation with each other on the part of the two workmen at the top of the tower, nor even for reflection. It would be only a matter of the fraction of a second for the steel beam to acquire such momentum that no effort of theirs could prevent its going over. Shouting to the others below, the two men above seized the ponderous strut, and, by almost superhuman exertion, succeeded in deflecting it so that it caught on the projecting arm of a girder that was securely riveted in the structure. As they guided it toward this temporary easement, each man saw that one of his hands must be caught between it and the girder-arm upon which it was necessary to rest it until it could be got under control, unless they chose to allow it to fall. There was plenty of time to let go, but the lives of the workers below were dependent upon those above holding on. "I'll stick if you do," gasped one of the brave fellows, as they strained every muscle of their stalwart bodies against the terrible weight.

TOUCHED 60,000 VOLTS.

Syracuse, Aug. 9.—Frederick Song came in contact with a wire carrying 60,000 volts of electricity at the substation of the Niagara, Lockport and Ontario Power Company, near this city, this morning. There was a report like that from a gun and a flash of fire from his body as he fell less than 20 feet to the ground from the top of a 20-foot ladder. Flames shot from his body for several minutes before they were extinguished with water. The body was horribly burned. Song was 30 years old and married.

According to an authority on the best features of a sea bath is a salt water inadvertently swallowed bath. It is said to be a wonderful tonic. In many cases it is said to biliousness when all food preparations have failed. It is peculiarly effective in ordinary cases of indigestion, disordered stomach and insomnia, and has been known to produce excellent results in many cases of dyspepsia.

Hands Ground. The other nodded, and the two held on grimly until their comrades could swarm up the ladders and again attach the derrick grips to the mighty beam, and in the meantime a hand of each of the heroes was ground off at the wrist.

On another building that is not yet
