

**HEART SHAPE**

**MIXERS**  
(Made In Canada)  
Noted for rapid and thorough mixing of concrete. Strongly guaranteed. 5000 in use in Canada.

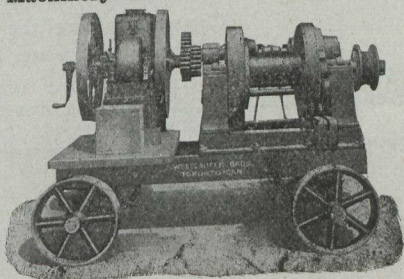

**IMPROVED CONCRETE MACHINERY**

(Made In Canada)

Crushers, Rolls, Brick, Block, Tile Machines, Hoists, Mixers, Road Pavers, Screens, Dump Cars. Full line of Contractors' Machinery and Builders' Supplies, etc.

**HOISTS**

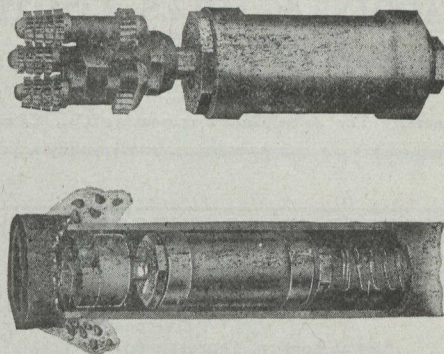

We save you money on your Hoisting Outfits, equipped with gas, steam or electric power, all Made in Canada. Write for Catalogue H. on all our machinery.

**WETTLAUER BROS Limited.**

178 SPADINA AVE. - - TORONTO, ONT.

BRANCHES—MONTREAL, HALIFAX, VANCOUVER WINNIPEG

**LAGONDA BOILER TUBE CLEANERS**

The latest Lagonda Water and Air-Driven Boiler Tube Cleaners are the most powerful and efficient tube cleaners made. They develop higher speed and greater power than has heretofore been secured with any Turbine Cleaner, and their use will materially shorten the time required in cleaning boilers.

These new Lagonda Cleaners are built for all sizes of tubes, either straight or curved, and they can be driven by water, air or steam.

St. Henry, MONTREAL.

Branch Office: Traders Bank Building, Toronto.

**Better Bridges  
At Lower Cost**

There is one outstanding reason why the leading road engineers and contractors have adopted Pedlar's Ferro-Dovetail system of interlocking concrete reinforcement for bridge floors and of extraordinary buildings.

Pedlar's Ferro-Dovetail plates produce such a low load as to make for stronger, more durable, more dependable and lighter construction.

**Pedlar's Ferro - Dovetail Plates**

The plates are laid between the beams or on bearings and the right mixture of concrete is applied and tamped in. On this the paving brick, stone, asphalt or other finish is applied, after which the under side of the metal is plastered

Pedlar's Ferro-Dovetail plates are supplied straight or curved for floors and are therefore desirable for any form of construction. They show no deflection under loads far exceeding any possible requirements.

Made of 28 to 22 gauge steel or anti-corrosive  and formed into a series of ten lateral corrugations dovetailed in shape. The tapered sides of the dovetail shape corrugations make for an infallible clinch for the concrete and plaster. The plates are thus protected from the influence of air, water, gas and acid fumes cannot corrode. Safe and economic. Write today for Pedlar's Ferro-Dovetail Pamphlet M. W.

**The Pedlar People Limited** Established 1861

Head Offices and Factories—OSHAWA, Ontario.

Branches: Montreal, Ottawa, Toronto, London, Winnipeg, and Vancouver.
