

PALLISER FURNITURE LTD.

Palliser Furniture began in Winnipeg, Manitoba, in 1944 with a father and three sons assembling wooden household products on their kitchen table. Today, the company employs 1,700 people and produces a wide range of bedroom sets, entertainment and wall units, occasional tables and upholstered furniture.

To date, it has enjoyed a great deal of success in the U.S. market and has opened manufacturing facilities in North Dakota and North Carolina to better service the market. Currently, it has a full-time sales force calling on retailers in all 50 states.

Palliser's contemporary styling, innovative use of laminates, and European flair made a mark in a market saturated with safe, classical designs. And it plans to capitalize on those triumphs by moving into other areas of the global marketplace in the near future.
