BONUS TO IRON INDUSTRY URGED WOULD DEVELOP LAKE SUPERIOR REGION AND STIMULATE TRADE

R. R. Gamey Traces Evolution of Iron Mining in Ontario - Price Graws, But Production Has Not Increased - Surveys Show Promising Tracts in Northern Ontario.

The Ontario Legislature yesterday out itself on record as in favor of urging upon the federal government the importance of granting a measure that would stimulate the iron industry of Canada. What form that assistance would take would be left to the discretion of the ministers at Ottawa, but the idea would be to so promote pub-He interest that the iron and steel business, which now languishes, would be placed on an assured and permanent footing. A motion to this effect, proposed by R. R. Gamey of Manitoulin, received the unqualified support of the government and opposition, and was carried after a six-hour discussion with only one voice dissenting.

Remains a Nucleus. The lines of argument advanced by the various speakers united in proving that altho the nucleus of a great industry had been discovered already, the attempts to exploit it had been very feeble. Ministers and members alike recognized that Canada enjoyed the opportunity of becoming a recognized producer of iron and steel products, and expressed the conviction that with encouragement from the federal au-thorities a new impetus would be given

o commercial activities.

The chief benefit which Ontario would derive would consist in the linking up of east and west by the influx of settlers to the Lake Superior region. Here the region bore all the indications of a limitless supply of valuable ore.

OTTAWA, March 12 .- A lively attack was made today in the senate upon Senator Choquette's bill forbidding the publication of the pictures of persons accused of crime or their accomplices, with the penalty of two years in prison for such publication.

Senator Dennis of Halifax said he understood this bill proposed to make crime in Canada of what has heretofore been a perfectly legitimate, harmless matter of daily business, and to cover with odium the twelve hundred newspapers, dealers and booksellers for the manner in which they have conducted their business in the past. He said the bill proposed to make criminals of them and subject them to conviction for felony with two years in the penitentiary if they presumed hereafter to conduct their business according to their own idea along the lines they had carried it along for half a century or more. It proposed what would be perfectly legal and elected: President, John R. Bone (ac-

Hon. Frank Oliver, ex-minister of the interior, started the discussion. He declared that the government had made a nistake in removing the restriction which provides that incoming immlgrants must have \$25 or more in their pessession. Immigration from the United States of a very desirable class had fallen off greatly during the past few years, while on the other hand undesirables were flocking into the country.

Liberal Officials Retained.

Hon. Dr. Roche, the minister of the interior, in a short, pithy speech pointed out that the same officials who had to make it a crime to do in Canada lowing list of officers were declared and charge of the department during the Liberal regime were still in the service. Agreement Understood to Have Been Reached at Conference Last Night-Sum of From Forty to Fifty Millions is Apparently Required.

OTTAWA, March 12.-The World understands that an agreement was reached tonight between the government and the Canadian Northern Railway whereby the government will guarantee the bonds of the railway. Sir William Mackenzie had a conference late tonight with Premier Borden and Hon. W. T. White, minister of finance, and came to terms regarding this important question which has been pending for some time. The agreement of course will be submitted

to parliament
By the terms of the agreement the
government secures the whole Canadian Northern Railway system with all its assets as security.

The money which will be derived from the sale of the bonds is to complete the construction of the Canadian Northern Railway and to make certain betterments in the system. The C.N.R. people have tried to raise the money on their own security both in Wall street and in London, and failed
