Recent Developments in Porcupine-Hollinger on Up-Grade

HOLLINGER WAS BOOSTED HOLLINGER IS INTO THE LEADERSHIP

\$4 Per Minute.

PORCUPINE, April 9.—(From Our Man Up North.)—A triffe over four dollars in gold per minute is the output at the Dome stamp mill, when running full capacity, and with time running into money at this rapid rate, no shutdowns are countenanced. The stamps are pounding day and night without cessation. Clean-ups are

out cessation. Clean-ups are not necessary with the cyanide plant now in operation. The machinery is fast wearing into shape and the very best work is being done.

Two average sized bricks a day can be taken from the mill on the character of the ore now being milled or one large sized one. All the ore is coming from the chutes in the 45-foot level, where 2000 feet of development have been made. Chas. Fox.

Porcupines-

Big Porcupine Issue Advanced Rapidly on Revival of Speculative Enthusiasm - Dome Extension Showed Remarkably Firm Tone- Cohalts Quiet and Comparatively Steady.

World Office, Wednesday Evening, April 10. Hollinger was boosted into the lendership in the mining exchanges to-day, a sharp upturn in the big issue divertiing speculative interest to the highpriced section and cailing attention to the possibilities of some of the Porcus pines which have not yet shared in the general advance. Outside of that particular instance, however, stocks did mot undergo any material change, prices holding generally within a narrow range under a desultory trading

A feature of the day worthy of special comment was the remarkable firmness shown by Dome Extension in the face of its sharp advance at the opening of the week. At its top quotation no-day the shares showed an appreciation in value of 11 points over the price at the close of business here on Thurs-cay last, but despite this big gain, no burdensome liquidation has put in an appearance. The stock sagged for a moment to-day, gitting back to 69 1-2, but later regained yesterday's big record of 72. The last transaction was at 71, and it closed offered there, with bids a point lower.

Scattered Price Changes.

Hollinger was in strong demand, and as the stock was in very scant supply the price mounted rapidly, getting as high as \$12,60, a gain of 60 points, and closing firm with bids in evidence at The advance was evidently inspired by the optimistic news from the stamp mill will be started up within the next three weeks. The buying bore all the earmarks of a short covering movement.

The remainder

did little more than hold its own at the Crown grevious day's figures. In fact, in certain sections a somewhat easier trend was observable, the in no instance did any perceptible weakness develop. Crown Chartered was off again to 32 1-2, Standard dropped to 6, a new kew record for this year, and Rea sold down to 50, closing bid there.

Scattered price changes were all that was evolved in the Cobalts, no activity of any account developing. Rochester was in better demand than usual, and soft up a small fraction; elsewhere cure was observable, tho in no instance did

got up a small fraction; elsewhere quotations were unchanged.

Values at Depth Exceed Those Eighteen-Foot Ore Body Lo-Given in Annual Report -- A Million Dollars in One

As depth is made and new ore shoots tapped it would seem that richer milling todies are being opened up.

Manager Robins is hopeful that the stamp mill will be ready for operation by May 1. At the least he can see nothing now in the way of a start at that date. There will be no hurrabing. The wheels will be set in motion without any ceremony.

A Proper Mine.

The general opinion of the hundreds

A Proper Mine.

The general opinion of the hundreds who visited the mine last week is that the Hollinger underground work is any mine now being operated on the continent. The first level is cut at the 100-foot depth and is go arranged that with little or no difficulty the ore can be holsted thru the main shaft to the elevated tramway and taken to the mill. This level gives the management a very large body to work on, while Army, is 83 years of a second of the hundreds who visited the mine last week is that the Hollinger underground work is General Booth
