The Londoners, aided by Manager Black, defeated eight of the latter's players at Tecumseh Park yesterday afternoon. At the end of six innings, the eight Leafs looked like winners. The score stood 2 to 1 in their favor, and in running it up a close contest had taken place. Then the Leafs' manager became a factor in the game, and the tables were turned. The home players may have purposely avoided hitting to the right field until such a move seemed necessary, as a last resource, and they may not have realized that the door was open there. It doesn't matter which. At any rate, it was in the seventh inning that the sphere was first sent Blackward, and the manner in which the talkative George "fell down," marked him as a busy man for the rest of the game. Two sensational muffs were placed to his credit in the eighth, and victory for the Londoners was clinched.

Cooper was responsible for Guelph's first run. He threw wild to Schwartz at first. Otherwise his work was excellent. He caught Damoth asleep on first in the third inning. The visitors' second run was made by Sechrist's single and steal, and a clean hit by Damoth. Sliever and Kostal did the umpiring. Popkay watched the game from the stand. A 15-minute shower interrupted the third inning. Score:

PROROGATION

The Ceremonies Shorter Than Usual—The Governor-General's Speech.

Ottawa, Aug. 12.—The military display at the prorogation ceremonies yesterday was more than usually imposing. An innovation which enhanced the effect of the military pageant was the trim guard of the Royal Canadian Regiment of Infantry, formed up on either side of the vestibule leading from the main door to the senate entrance. Lord Minto was visibly pleased with the soldierlike manner in which these Canadian regulars performed the salute as he passed along.

Next to his excellency in the viceregal procession towards the red chamber, Lady Minto walked, regally costumed in a gown of silver-gray, trimmed with glittering passementerie. Lady Minto occupied a seat in the first row to the right of the throne, and beside her sat the premier's comely wife. Lady Laurier wore a rich dress of mauve silk with rade old lace. Pretty street costumes in the prevailing summer tints graced the "floor," compensating in effect for the paucity of attendance of ladies, due no doubt to the uncertainty which prevailed almost to the last hour as to the exact time of prorogation.

The ceremonies were somewhat shorter than usual by reason of the small numbers of measures requiring to be read, the bulk of the bills passed during the session having previously received the royal consent. These preliminaries over, his excellency delivered the brief speech from the throne. Lord Minto said:

"Honorable Gentlemen of the Senate, Gentlemen of the House of Commons: In relieving you of your duties during this prorogated session, I desire to thank you for the diligent attention you have given to the many important measures which have been submitted for your consideration. I am glad to observe that the action of Canada in deciding to unite with the mother country and Australian colonies in the construction of a Pacific cable has met with general approval. I congratulate you on the evidence of continued prosperity that prevails in all parts of the Dominion and which has stimulated the formation of so many companies, having for their object the development of enterprises that will tend to increase the wealth of this country."

"Gentlemen of the House of Commons: I thank you in her Majesty's name for the supplies you have granted for the public service."

"Honorable Gentlemen of the Senate, Gentlemen of the House of Commons: In bidding you farewell, I desire to express the hope that Canada may long continue to enjoy the prosperity that at present prevails."

WORLD'S COPPER

Rockefellers Want to Corner It—All the Mines To Be Bought Up.

New York, Aug. 12.—A copper trust that will control the output of the world is the latest scheme of the Rockefeller world and their associates in the Standard Oil Company. Wall street heard of it yesterday, and it may not be long before the public will learn of the increased price of copper, the only metal in the world whose supply cannot meet the demand.

The plans of the millionaires in the deal in the absorption of several rich companies that have heretofore held out against the formation of the trust. During the last month several mines have been quietly bought up by Amalgamated Copper Company. When all these mines are secured the great concern will reach out abroad to gobble up all the mines of the world. Once these mines have come under one control, the price of copper will be sharply advanced.
