Angus Campbell Says Director and Empire Gowns Will Be Popular.

Do You Like Honest, Square Dealing?

Dr. Pierce's world-famed medicines are put out under the belief that publicity is the best possible guaranty of merit, and that the most intelligent people generally want to know what they take into their stomachs, whether it be as food, drink or medicine.

What Do They Care? This question is often asked concerning Dr. Pierce's medicines.

The answer is that "Golden Medical Discovery" is a most potent alterative or blood-purifier, and tonic or invigorator, and acts especially favorably in a curative and healing way upon all the mucous lining surfaces of the nasal passages, throat, bronchial tubes, stomach, bowels and bladder, curing a large per cent. of catarrhal cases whether the disease affects the nasal passages, the throat, the bronchial tubes, the stomach, the bladder, the uterus or other pelvic organs.

There is a badge of honesty on every bottle of Dr. Pierce's medicines in the full list of its ingredients fully stated as correct under solemn oath.

No other medicines put up for general use through drug stores can make claim to any such distinction, and none other than Dr. Pierce's medicines have any such professional endorsement of their ingredients. Such professional endorsement should have far more weight with the afflicted than any amount of lay, or non-professional, endorsement, or testimonials.

Of course, the exact proportion of each ingredient used in Dr. Pierce's medicines as well as the working formula or manner of preparing the same, and the specially devised apparatus and appliances employed in their manufacture, are withheld from publicity that Dr. Pierce's proprietary rights may be fully protected from such unprincipled imitations as might be piratically inclined.

The preparation of these medicines without the use of a drop of alcohol, so

generally employed and yet so harmful, in the long run, to most invalids when its use is long continued, he does not care to give away his scientific and exact processes for preparing these medicines, but he does want to deal in the most open manner with all his patrons and without knowing anything of the properties and harmful character of the agents employed. They believe that health is too sacred a heritage to be tampered with, and that people should not take medicines that are not of the kind that they are kept in ignorance of.

Dr. Pierce's medicines are made wholly from the roots of plants found growing in the depths of our American forests. They are so compounded that they cannot do harm in any case, even to the most delicate woman or child. By open publicity Dr. Pierce has taken his medicines out of the list of secret nostrums, of doubtful merit, and made them REMEDIES OF KNOWN COMPOSITION. They are therefore, in a class all by themselves, being absolutely and in every sense non-secret.

By this bold step Dr. Pierce has shown that he is not afraid to subject them to the fullest scrutiny.
