BUSINESS NOTICE

SCARLETT'S Lumber Surveyors' Scale Card for all lengths up to fifty feet and all diameters up to twenty four inches. These scales are printed on ordinary cardboard, at five cents each and the other on heavy mounting board, at ten cents each.

Miramichi Advance.

The Astute and Mysterious Sir John. The Government organs have discovered indications of Sir John A. Macdonald's intent to pass a liquor law...

The October Bank Statement. The official statement of the banks in Canada for the month of October, which was published in the Canada Gazette of November 11th, has been placed in the hands of the public.

Miramichi Lumber Shipments. The Miramichi lumber-shipment season is practically closed, and we are, therefore, in a position, this week, to give the shipments for the season.

General Notices and News. The arrival of shipping in Quebec in 1882 up to 6th inst, numbered 553 sailing vessels of 447,022 tons, as compared with 639 vessels of 496,635 tons in the like period of 1881.

Palings and timber-shipped. Besides the above there were miscellaneous items of which the total for our wood shipments for the first time, was 103,213 square feet for spools, 106,156 broom handles, 119,635 cubic feet brushwood, 2,471 ft. cloth boards, 87,000 box shingles, 729 square frames, 19,940 slate laths, 40,080 laths, 32 spars, etc., chiefly shipped by Messrs. Guy, Bevan & Co.

Comparing the Miramichi shipments of the last two seasons we find them as follows: Vessels. S.F. Deals. Timber. Total. 1881-82 151,265 128,200,275 2,148,535 2,543,000 1882-83 103,213 106,156 1,196,355 1,405,724

Comparing the lumber shipments of Bathurst with those of last year we find the results as follows: S.F. Deals. Timber. Total. 1881-82 14,729 1,228 696,987 1,244,936 1882-83 14,729 1,228 696,987 1,244,936

Comparing the lumber shipments of Bathurst in 1881 were, therefore, 16,107,371 a. f. and in 1882, 17,816,784 a. f., an increase of 1,650,413 for the season just closed.

Grindstones were shipped from the outpost of New Brandon under the survey of the collector at Bathurst to the United States during the season of 1882 as follows, viz: No. of Grindstones. Value. 1,500 \$10,000 2,000 15,000 3,000 20,000

It will not be considered out of place, we hope, if we presume to ask you, a few months ago, of the very early construction of the proposed bridge over the Southwest Miramichi, that below the Railway bridge, when they intend to

show, in a practical way that their promises were made in good faith. If those gentlemen were in earnest it is not the people of both sides of the river and those guarantee the fact. The season of the year when bridge-lumber can be procured to advantage is now upon us, and it is disappointing to find there are no signs of the advertisements for tenders which were promised long ago.

The crew remained by the ship until eleven o'clock next day when she broke up in four pieces. There are only four saved out of a crew of twenty—chief engineer Hutchinson and McLachlan, Townsend and Martin. The others were drowned trying to get ashore.

The United States House of Representatives consists of 123 Republicans, 106 Democrats and 6 Independents. In the Senate there are now 37 Democrats and 37 Republicans with one Independent with a whole vote for the season, at least, by his duties at the bar. He says the matches he has on hand are too important to be trifled with, as in meeting Ross and Kennedy he considers he shall lose but two best corners in America. Replying to the question, if he had other engagements next season he said he knows of no others yet. "But Lee and I will row double and will accept all matches we can get on."

A circular just issued by D. Pottinger, Esq., Chief Supt. I. C. R. to station masters and Conductors reads: "Passengers must not be carried on special freight trains, and ticket agents must not sell tickets to persons who wish to travel by such trains." This order will most seriously affect the business of towns along the line with country districts and show that management does not care to carry heavy local traffic if promoted and local trade benefited by the road or not.

While many of the papers of the Dominion have been making light of the exodus and misrepresenting it grossly and not at all ingeniously, the Bishop of Quebec has considered it sufficiently serious to make it the subject of a pastoral letter. He deplores the departure of young people from Quebec and exhorts them to do as their fathers did, make homes for themselves in the wilderness. His Lordship says the life of a farmer, even in the backwoods, is a life of usefulness to the life of a factory hand in the large cities of the United States.

A paper lately read before the Societe de Biologie foretwards results which may be of great use to agriculturists. A series of experiments were reported, in which it was shown that the value of dried blood as an aliment for cattle when it is finely powdered and sprinkled into their ordinary vegetable diet. The method has thus far proved very successful with sheep, and in a few cases have been reported of delicate calves being reared to health by this means. As a means for utilizing the enormous waste from slaughter houses, its economic value is apparent.

The Commonwealth of the case of the imprisonment of Dwyer Gray, had presented to its several reports; first, that law by a majority of the committee which stated that Judge Lawson acted within his jurisdiction in imprisoning Gray; second, by Mr. Dillwyn, remarks upon the present state of the law of contempt; third, by Irish members of the Committee, suggesting certain alterations in the law and reducing upon the conduct of Judge Lawson. After some discussion, the committee decided there was no occasion for the Commons to take further notice of the matter.

Ernest Grace of Bremen, Germany, discovered, a year ago, a process for preserving fish and meat for several weeks in their fresh condition. Negotiations have been in progress between him and W. H. Rogers, Esq., Fishery Inspector for Nova Scotia, and a sample barrel of haddock has been received by the latter, which was sent over the downfall on Oct. 16. The fish will be opened at Halifax in a few days, before a number of gentlemen who propose to form a company to use the process, and if the fish prove satisfactory Mr. Rogers will have his company organized at once for the preservation and shipping of meat and fish, including lobsters, boiled and unboiled.

An important decision has lately been delivered in New York by Judge Nelson of the United States Court. In an suit brought against the Providence Steamship Company, the Judge decided that Long Island Sound is not partly in the territory of the State of New York and partly in the State of Connecticut, but that it is a portion of the Atlantic Ocean, and is not, therefore, subject to the laws regulating inland waters. If sustained, the result is loss of interest in the valuable fisheries in the Sound open not only to the fishermen of the United States, but of Canada. Hereafter the fishermen of Connecticut and those of New York had the monopoly of the Sound.

Rufus S. Merrill and others, of Massachusetts; John A. Fish and Freeman W. Washon, St. John; John R. Elliott and A. H. Whitney of Moncton, have filed in the office of the Provincial Secretary a memorandum of association for the incorporation of a company to be styled "The Saint John's Petroleum Company of New Brunswick," for the purpose of buying, leasing and selling of oil and mineral lands; and the producing, selling and transporting of petroleum oil and mineral oils and minerals; with a capital of \$100,000, to be divided into four thousand shares of \$25 each; and stating that the office or principal place of business of the said company will be established at Dorchester.

A Toronto despatch of 16th to the Globe says—Edward Hanlan returned to Toronto last evening. It is impossible for him to look better. Being questioned regarding the reports of the American newspapers to the effect that he intended to leave Toronto and settle in New York, he replied that he had no intention of leaving Toronto. He had no idea as to the source from which the report originated. Inducements had been offered to him to take up his residence in New York, but he felt he could not leave his Canadian home, and all the known antagonists against accidents in the mine. After a horseback journey of 325 miles from El Paso, in which they were menaced all the way by a lightning which fairly started to satisfy the promise. The board consisted

of wretched fare in roofless adobe pens, and the mine was so dangerous that the natives would not work in it. The shaft was 600 feet deep, and the descent had to be made on a Mexican ladder, which is merely a notched pole, or in the latticework of the shaft. The shaft was raised by ropes. The Nova Scotians refused to work, and were imprisoned for breaking their contract. Then they escaped, and started across the plain on foot, but were overtaken by a military company, and two were killed. At the end of a year and a half of hardship, they have been released, and are on their way home.

On Tuesday afternoon of last week Mrs. W. L. Pettit, wife of the father of the First National Bank of Fort Wayne, apparently died and the undertaker took charge of the body. Arrangements were making for the funeral, and watchers sitting with the supposed corpse. At 10 o'clock at night a faint sigh was heard coming from the body. The watchers started to their feet with alarm, stepped to her side, found her eyes were wide open, while in a voice that was scarcely an audible whisper she recognized them and asked for her husband. For a moment the attendants were speechless with wonder at this resurrection of the dead; then, with the revulsion of the rest of the almost screamed with excitement. The husband came in haste, and with joy unspeakable clasped again his living wife in his arms. The doctor was sent for, as he was so much astonished at the fact of the husband at beholding living what in his exact medical science he had declared dead. He administered the proper restoratives, and the patient rapidly recovered, and was declared at a late hour to be in a most hopeful condition.

The Egyptian committee of inquiry up to 15th inst, had examined 135 witnesses, and interrogated 128 rebel prisoners. Mussa Akad and Suleiman Daoud arrived at Cairo and were imprisoned in the old Barracks building. They will be tried separately on charges of complicity in the burning of Alexandria. Suleiman Daoud was examined before the committee on 15th. He admitted that he gave the order to fire Alexandria, but alleged that he had received peremptory orders to do so from Arabi Pasha, who, when a general confederation was not at first apparent, sent Mahmood Sami several times with instructions to Suliman to fire more points at a time. Suliman further alleged that, when the Rebel place was surrounded by troops on July 12, Arabi ordered him to murder the Khedive, threatening to comply, he was treated with cordiality, and thereupon, accompanied by four soldiers, he started for the palace, but on the way he met Sultan Pasha, who prevailed upon him to return and discuss the matter with Arabi. It is stated that Arabi, who commanded the troops surrounding Ramleh, has given evidence which corroborates that of Suliman Daoud.

The most contemptible fraud that has been practiced upon farmers and others in the last few years is the selling of immense quantities of worthless horse and cattle powder. There is only one kind now known in this country that are unadulterated and those are Sheridan's.

General Business. WINTER FRUIT. TO ARRIVE. 100 BBL'S WINTER APPLES such as Baldwins, Greenings, Fairbanks, etc. 1 Keg Green Malaga GRAPES. ORANGES, FIGS, etc. LEAVING THEIR ORDERS, as goods were particularly selected by Subscriber, and prices are likely to be lower than usual.

W. S. Loggie. PATENTS. We continue to act as solicitors for patents, trade-marks, copyrights, etc., for the United States, and to obtain patents in Canada, England, France, Germany and all other countries. Action by mail free. No charge for examination of model or drawing. Action by mail free. Patents obtained through us are noted in the GAZETTE OF PATENTS, and in the most influential newspaper of each country published in the world. The charge of a note every year is understood. This law is published WEEKLY at \$2.50 a year, and is the best and most complete work on the subject. It contains, besides, engineering works and other departments of mechanical science. It is a necessary, single copy by mail, 10 cents. Address: Wm. & Co., publishers of Scientific American, 231 Broadway, New York. Handbook about patents mailed free.
