A Queer Theft.

Windsor, Ont., Oct. 27.—Clem Cal-
lahan, aged 21 years, of Chicago, and
Herbert Davis were convicted in the
police court yesterday of theft in tak-
ing the horse, Capri Sauce, from its
stable at Windsor race track early
last Saturday morning and running it
over the country roads, to make it
undisturbed on Saturday afternoon.
The men were remanded for sentence.

Moncton, N. B., Oct. 27.—The dele-
gates to the Grand Division, Sons of
Temperance, have returned to their
homes. A resolution was passed at
the final session that the Grand Divi-
sion urge members to endeavor to
have their political parties nominate
candidates of well known temperance
principles, and that they attend non-
naming conventions of their own po-
litical parties and press their views.

Temperance and Politics.

It is not known whether the Bul-
garian and Serbian sovereigns will
meet, but it is certain that political
importance is attached to the unex-
pected journey of King Ferdinand.

Sofia, Bulgaria, Oct. 27.—King Fer-
dinand of Bulgaria, accompanied by
his military suite, arrived today at
Krashevat, Serbia, ninety miles
southeast of Belgrade. He is ostensi-
bly on a botanical research expedi-
tion, but he was received by Crown
Prince Alexander of Serbia.

It is not known whether the Bul-
garian and Serbian sovereigns will
meet, but it is certain that political
importance is attached to the unex-
pected journey of King Ferdinand.

THE BUILDING OF OUR RAILWAYS.

"But," he went on, "we do wonder
whether you are not over-building in
railways. We can understand that
from Fort William to the Rocky
Mountains you can utilize the rail-
ways you are building for there you
are opening up territory which will
be taken up rapidly by settlers. We
can understand too, that when you
needed a larger trans-continental
line to the lakes, it was better to
build another road than to add an
other track to that already existing.
But what we do wonder at is the
building of the lines east from the
western side of the lakes to the eastern
seaboard. We wonder at the con-
struction of the National Transcon-
tinental from Lake Superior to the
Atlantic and also at the project of
the Canadian Northern to build
around the lakes. It may be that you
are only ten years in advance of
us, but even if that is the case, the
cost in interest on your capital
investment will be a heavy charge.
Then too, would it not be better to
spread the period of construction
over a longer period, say twenty in-
stead of five years? A country which
is importing large amounts of capital
is bound to go ahead, but if that cap-
ital comes in a short period, there
is not likely to be a sudden stop-
page of prosperity when the inward
stream stops, and you have to meet
the outward drain yearly? At the
present rate, you are adding about
£1,500,000 to your interest obliga-
tions each year."

Great Britain and Germany.

"What is your opinion of the naval
situation?" asked the Star.

"We do not fear any immediate
trouble," replied Mr. Paish. "It
makes no uncertainty that we do not
know what Germany's object is. If
we knew she was seeking to secure
some proportion between her navy
and her mercantile marine, that
would be all right. But now all we
know is that she is increasing her
navy and her shipyards. We will
meet them, of course, though it will
mean a heavy expenditure. I look
for an increase in the naval estimates
next year of at least seven, and pos-
sibly ten million pounds. In point of
financial ability to meet the drain, we
are in much better position than Ger-
many. They would have to depend
largely on their own people. They
have about £200,000,000 of national
securities which they could unload,
but of their £1,500,000,000 total hold-
ings of foreign securities, a large por-
tion is Russian, which they could not
unload readily. On the other hand, our
holdings of £3,000,000,000 are almost
entirely in Western securities, which
could be sold easily if it were neces-
sary. I do not think, however, that
Paish, "that this will seriously in-
fluence the question. No nation was
ever kept from going to war for lack
of money."

Mr. Paish will remain in Montreal
for several days, after which he will
leave for the West, where he intends
to spend the rest of the autumn.

Gets Light Sentence.

Grand River, Gaspe, Que., Oct. 27.—
Dr. Sampson, who was a few days ago
convicted of manslaughter in connec-
tion with the death of his wife by
poisoning, was today sentenced to two
years imprisonment.

FRANCE TO BUILD

SEVEN DREADNOUGHTS

London, Oct. 27.—A despatch from
Paris to the Pall Mall-Gazette says
the French government has decided
to build seven Dreadnoughts instead
of the four originally planned. These
will be equal in displacement to the
new German Dreadnoughts.

Special credit for the new vessels
will be introduced in the Chambers
after the general election in May,
1910.

NEW SPANISH

MINISTRY TO

END CAMPAIGN

George Paish, of the London

Statist, Discusses Monetary,

Railway and Naval Affairs--

To Tour the Dominion.

Montreal, Oct. 27.—A friendly spy
is amongst us. He is Mr. George
Paish, one of the editors of the Lon-
don Statist, and he is touring the Do-
minion to study the banking, financial,
commercial, railway and agricultural
conditions and prospects. As a finan-
cial specialist, Mr. Paish, who came
to Montreal from New York yester-
day, spent a few days in looking over
the money market in the American
metropolis, and this morning at the
Windsor, he discussed the outlook in
an optimistic strain with The Mon-
treal Star.

"I consider the present monetary
stringency only temporary," said Mr.
Paish. "It is due to an accident that
accident being the shortage in the
cotton crop and the holding back of
American wheat. As a result of the
shortage in cotton and the consequent
higher price, we are paying higher
prices for our cotton to the Egyptian
growers, and as the Egyptians prefer
to get their payments in gold, it has
drawn heavily on the British gold sup-
ply."

Wheat And The Gold Supply.

"The holding back of the American
wheat crop has acted in a similar
way, but indirectly. The American
wheat is drawn upon in advance every
year in order to finance the large tour-
ist traffic. This year, the American
this continent has been held back for
a higher price, I presume, and the
result has been that we have had to
buy wheat from Russia, for which we
have had to pay gold. The monetary
situation being stringent has
aggravated the drain, and as a re-
sult of all these influences the Bank
of England discount rate has been
raised to five per cent. I expect, how-
ever, that in a short time the stream
of gold will set back and the situation
will be relieved. For that reason I do
not anticipate that the present money
stringency will have any serious effect
on the stock market."

In connection with his mission to
this country, Mr. Paish cited the float-
ing of £175,000,000 of Colonial and
foreign securities in the London mar-
ket during the last year, of which
£30,000,000 was for Canada. He then
went on to give expression to some
of the criticisms of Canadian financ-
ing.

"I am no wishful," he began, "to
speak in any way antagonistic to
Canada. We are all much interested
in you and anxious to see you pros-
per."

The Building of Our Railways.

"But," he went on, "we do wonder
whether you are not over-building in
railways. We can understand that
from Fort William to the Rocky
Mountains you can utilize the rail-
ways you are building for there you
are opening up territory which will
be taken up rapidly by settlers. We
can understand too, that when you
needed a larger trans-continental
line to the lakes, it was better to
build another road than to add an
other track to that already existing.
But what we do wonder at is the
building of the lines east from the
western side of the lakes to the eastern
seaboard. We wonder at the con-
struction of the National Transcon-
tinental from Lake Superior to the
