

HOLSTEIN-FRIESIAN NEWS

Farm and Dairy is the leading exponent of dairying in Canada. The great majority of the members of the Canadian Holstein-Friesian Association are readers of the paper. Members of the Association are invited to send items of interest to Holstein breeders for publication in this column.

RIDEAU STOCK FARM OFFERINGS.

RIDEAU STOCK FARM OFFERINGS.
NINE years ago, Mr. John Willoughby of Smith's Falls, started in to establish a herd of pure-bred Holsteins. Mr. Willoughby received the first class prize at the 1905 Canadian exposition under his feet as he went along. But he knew that his eventual success with the "Black and Whites" depended on the foundation stock. His early animals traced direct to dams sired by Sir Admiral Ormsby, with whom practically every Canadian breeder of Holsteins has a direct line. The Rideau herd to-day carry the blood of this sire and practically all of them are of his own breeding. The first sire used at Rideau was a pure-bred sire of the name of "Ottawa dandy" test last week. The next sire was a gd. son of old Pontiac

Kornadyke and out of the 26.65 dam. His present herd sire is Hillcrest Ormsby Count, a son of the 29.017 B. Canadian Champion cow, Count Bawder De Kol, who has just set for G. A. Brethren, Norwood, the new record for both milk and butter per year in the Canadian R.O.P.

From this sire, Hillcrest Ormsby Count, Mr. Willoughby's daughters, particularly the young ones and daughters at the present time. Not only have they the choicest of breeding but being direct descendants of our Canadian champion yearly producer, they will make the finest of sires of foundation stock for any breeder who has the good sense to turn an eye to them. This will do well to turn an eye to Mr. Willoughby's ad, in this issue.

SALE DATES CLAIMED

Fifth annual sale of Southern Ontario Consignment Sale Co., Tillsonburg, Feb. 8. Dispersion Sale of 50 head of Holsteins, C. E. Trebilcock, R.R. No. 6, London, Feb. 10. Norfolk Holstein Breeders' Sale, Simcoe, Feb. 16.—W. A. Mason, Secretary.
Sale of entire breeding herd of Holstein-Friesians.—W. C. Prouze, Tillsonburg, Feb. 15.

Sec.-Treasurer.
Complete Dispersion Sale of 100 head pure
bred Holsteins.—W. C. Stevens, Philips-
ville, May 3.

THE TREBILCOCK SALE AT LONDON,
FEB. 10TH.

FIFTY more head of registered Holsteins ranging from calves to mature cows, will be the offer at the complete dispersion sale of Mr. C. E. Trebilcock at London, on Friday, Feb. 16th. As the Trebilcock farm has been leased for a number of years every animal must go without reserve. In addition to the pure-bred Holsteins, there will be all the other stock on the farm including sows, horses, several registered Jersey's, a number of broiler and game fowls, a number of bantam fowls and a large stock of poultry. The horses, other stock and farm implements, including mowers, binders, manure spreaders—in fact the complete equipment for a 150-acre farm, will go at 10 a.m.

The sale of the Holsteins begins at 1 p.m. Practically the entire herd are of Mr Trebblecocks' own breeding, during the past seven years. The foundation animals for this big herd come from such Holstein breeders as R. F. Hicks, Newtonbrook, C. R. Gies, A. C. Hallman and G. W. Clemons. Victoria Teake secured from the herd of G. W. Clemons, has a history. She was dropped in '99 and is therefore a

producer in record work. As a 4-yr-old she made a record of 27 lbs. considered one of the best records in the country. In 19-yr-old, Victoria made 10,000 lbs. in five months. She is still in the Treblehook herd and although she is now 23 years old, she still shows the vigor and indication of the vigor and vitality from which the Treblehook herd has arisen. A 3-yr-old daughter of Victoria, the Faforit Faforit, is a fine Faforit. Faforit is one of the big cows of the herd and carries the Faforit blood that has been shown in the Treblehook herd. As a 3-yr-old, Faforit Garnet. As a producer of females, there is a 4-yr-old, a 3-yr-old and a yearling heifer in the sale from the Treblehook herd. The 3-yr-old daughter cow, has an official test of 19.13 lbs. She is big and roomy with the capacity for much better size, four females of which are included.

Always on the Job

Buy fence and protection at the same time.

Get away from the idea that wire fence is nothing more than a few wires fastened together; because you'll find in "FROST FENCE" that the wires are put together in such a practical way that "SERVICE" is the outstanding feature. Also that the spacings of laterals and stays are just as they should be for the different styles. You'll find that the "FROST" lock binds more securely, and yet, does not put a weakening kink in the horizontals, as is necessary in other ready woven fences.

FROST FENCE FIRST

We not only make our ready woven fence; but for four years we've made and galvanized all the wire that goes into it. At that time we installed complete wire mills, believing that we were equipped for ten years at least; but the immense popularity of "FROST MADE" Wire has made it necessary to put up another Mill that will double the capacity. This new Mill is now ready for operation.

That is why we know FROST WIRE is good, and that it has the proper hardness, the full 9 gauge and just the amount of galvanizing that will best withstand the rust and still not be so heavy that it will crack off.

Woven Fences and Gates for farm use. Plain Wire and Staples, also Ornamental Fences, Wire and Iron, and complete fence supplies.

New catalogue just from the printers. Get one.
