WHAT THE
FARMER
CAN DO WITH
CONCRETE

**"My Book is worn out—
send me another"**

From all over Canada requests have come from farmers for a second copy of this most useful of all farm books. Over 100,000 farmers have discovered by reading it, how they can greatly increase the value of their farms with but little cash outlay. It has shown them how to turn the idle hours of Winter to immediate profit. In the new edition of the book—just published—there are 90 pages of practical suggestions. Write for your copy—it will be sent to you free and without placing you under any obligation whatever.

**"I could not have done without it
this Summer, as help is so scarce"**

Here is the experience of one of the scores of dairy farmers for whom the

EMPIRE Mechanical Milker

is taking the place of the farm help they can no longer get, and enabling them to keep their herds together and take advantage of the prevailing high prices.

R. R. No. 3, INGERSOLL, ONT.

Gentlemen:—

I have used one of your "Empire Milkers" since early last April, on from 30 to 45 cows continually, and can find no injurious effects on the cows. They seemed to like it from the first time, and I think gave rather more milk than with the best hand milking. Easy cows seemed less inclined to leak, and hard ones gradually became easier.

I have sent the milk a number of years to the Borden Condenser Company, and have had no complaints. I have just followed the instructions for keeping it clean. I could not not have done without it this summer, as help is so scarce. I may say further that I have been milking cows for over 50 years, and have been in the milk business nearly that length of time. I have had no previous experience with milking machines, but have had very little trouble or expense for repairs. I have used it on heifers never milked before, with perfect satisfaction, no matter how small their teats were.

The Milker has been of more practical value to me than I ever expected.

WILLIAM COLYER.

We will be glad to send you Booklets showing exactly how the Empire Mechanical Milker works, and telling the experience which dozens of prominent dairy farmers have had with it. Address Dept. C

**Hundreds of
Men Make
Good Money**

Giving part, or full time to contract tile ditching. You can do the same thing! An ideal

occupation for farmers, threshermen and all others seeking a business of their own. Thousands of wet acres need scores of miles of tile drains to make them profitable. Hundreds of these acres lie within your easy reach. There's ditching a-plenty you can obtain if you but go after it, and the Buckeye Traction Ditcher is the machine that will do it economically and return you a better profit than a 75 acre farm. The

"A Perfect Trench at One Cut"
BUCKEYE
Traction Ditcher

will do more ditching in a day than 15 men and at a fraction of the cost. Operates successfully in ordinary winter weather. Cuts a perfect ditch, true to grade, ready for the tile immediately.

Here's a couple of letters, one from a man who made almost \$50 a day with a "Buckeye."

"The machine I bought of you is a money maker. Will average 125 to 200 rods per day at 35c a rod. My operating cost is about \$10 per day leaving me a net profit around \$50."
L. I. FAIRMAN, Broadhead, Wis.

"Last year I dug 11,071 rods of ditch for which I received \$2254.90. Labor, oil, repairs and shipping expenses were \$544.72 leaving a net profit of \$1710.20. I had only one helper."
ROY E. JOLEY, Merrill, Mich.

Naturally soil conditions vary and prices per rod are not always the same: but there's no doubt about your making good money with a "Buckeye."

Write for "Book of Facts," telling what these ditchers have actually done and earned for many owners. Give your soil conditions and size ditches you wish to cut—we'll tell you the size machine to do this work. Our service department will gladly help you, as it has others, to get started right in the highly profitable field of contract tile ditching.

Good Plowing Done Here

TAKE a simple type of two-wheeled sulky plow like the **Oliver 26**, equip it with a suitable bottom, and put it into the hands of an Eastern Canadian plowman. There is an unfailing recipe for good plowing. The **Oliver 26** sulky handles like a two-wheeled cart. It has a pole shift that changes instantly the landing of the beam, making it as easy as can be for the operator to straighten crooked furrows, to turn short corners or to plow side hills. The land wheel has a range of lift that insures good work on rough ground, around dead furrows, and in finishing out a land. No plow made works better on rough, uneven land or can be backed more easily. It has a horse lift that eases the work of the plowman without tiring the horses. There is no handier plow than this sturdy **Oliver 26**.

Other **Oliver** plows from engine and riding gangs down to walking plows, complete a line in which you can find any particular plow you may happen to need—a plow that will help your reputation as a good plowman and good farmer—at a price you can afford to pay. May we send you our folders telling all about **Oliver** plows for Eastern Canada? Write to the nearest branch house.
