TORONTO, Ont., April 21.—A conference between C. P. R. and representatives of mechanical staff opened at Winnipeg this morning, and was not concluded. The questions under discussion are the new rules governing work and pay, and the abrogation of the old agreement west of Fort William.

LIQUOR LICENSES LIKELY TO BE REDUCED TO 64

Supreme Court Judges Seem to Favor Contention of the Temperance People in Favor of the Ward System an Interesting Argument.

As to the population of each ward, and that in Prince ward, instead of having fourteen the number will be eleven, and in other wards on the same basis.

The attorney general opened the case before the court, and in his opening statement set forth the facts. He contended that the commission must be under the legislation to be guided in issuing the licenses on the principle of the basis of population and that Prince ward on this basis could be entitled to no more than eleven licenses.

Justice Hanington said: "If this is the interpretation of the act you might have all the licenses in Carleton and make liquor selling on the east side prohibitory, and" Justice Hanington added, "if a man wanted to take an early morning nip he would have to cross the ferry."

Recorder Skinner did not think so. The more legislation against nips, the more nips there were.

Mr. Skinner concluded his argument contending that as long as the 75 licenses were not exceeded, the commission could divide them as they chose.

The attorney general briefly replied, and asked the court to give a decision at an early date.

From the remarks made by the court there is little doubt that the commission will be in favor of the contention made by the attorney general and that the issuing of licenses must be guided
