

It is one of the modern health adjuncts. Along with the dust and dirt are removed germs, microbes and bacteria; in cleaning carpets and rugs, the air is drawn in a large volume through the fabric—through every fibre of the article itself and after the dust is separated and retained in the bag that air passes through a cloth saturated with a disinfectant allowing the pure, fresh air to escape in the room. What a comfort, what a blessing to the inmates.

In this way it completely removes moths, vermin and insects; the eggs and larva are so minute as to be almost unseen.

Renovates the furnishings—makes them sweet, clean and pure.

Instead of a disease and germ brooding place, your furnishings will be healthful and clean—suitable for close, personal association:
