

## Bone Spavin

Know it by the lump and the lump—a hard, long growth on the inner side of the hock joint, usually low down and a little forward of the center of the leg—a quick knock with the second toe, and a slight protrusion of the hock joint, bearing the weight on the toe, most noticeable in short-legged horses.

New cases, old and bad cases, the very worst cases, cases where other treatments are resorted to.

**Fleming's Spavin and Kingbone Paste** guaranteed to cure the lameness for good—may or may not take off the lump. Easily used by anybody, and a single application usually does the work—occasionally two required. Write for Free Horse Book before ordering. It gives all the particulars and tells you what to do for other kinds of lameness.

**FLEMING BROS., Chemists,  
37 Front Street, West, Toronto, Can.**

All No. 9 Wire

All No. 9 Wire

The fence to buy is the fence that will turn any kind of stock and last the longest. When we say that fence is the Peerless Woven Wire Fence we have plenty of good reasons why. We want you to know we have a fence that is horse high, bull strong, pig tight. That means a fence made of material that is genuine in quality and so constructed that it will stand double the strain ever required of it. That's the Peerless. The makers of

## Peerless Woven Wire Fence

have been making fences for years. They have learned what material gives longest service what construction stands the wear and tear most successfully, and have embodied all this in the Peerless Fence. No stock can go over, under or through it—it's all in the lock. Can't tip up—down—

nor sidewise, making the most rigid, solid and firm fence possible to build. Big, heavy galvanized hard steel wire perfectly uniform in size is used throughout. It's the economical fence, the life-time fence—the fence upon which you can always rely. Let us send you more reasons why—a post card will bring you our fence book that's full of good common sense fence advice—fence facts that will save you money. It's free, address
