## QUESTIONS AND ANSWERS. Miscellaneous.

### FORMALDEHYDE TREATMENT NOT NECESSARY FOR CLEAN POTATOES.

Would you advise treating potatoes intended for seed, whether they show scab or not, with formaldehyde, and would you do it before or after cutting the potatoes? **G. W. A.**

Ans.—If the crop was perfectly clean, and the potatoes have not since been infected with the scab spores by contact with scabby tubers or vessels which have contained such, there can be no object in treating with formaldehyde, but if the least sign of scab is present, it would be well to treat by way of precaution. The treatment is performed before cutting.

### WILD SEEDS—LINE FENCING.

1. A and B are farmers in York County. A buys alsike clover seed from B to sow, and pays B for it. After buying and paying for it, A finds wild seeds in it. Can A compel B to take it back and refund money?

2. What constitutes a line fence for pigs, and what size pigs can run? **Ontario. FARMER.**

Ans.—1. We think so. 2. It would be necessary to see the local township municipal by-laws in order to answer this question. Ask your township clerk to show them to you.

### POULTRY BUSINESS IN COUNTRY VILLAGE.

I am living in a country village, and have an acre or so of land, and think that I would like to start in the poultry business. I would build a henhouse, and have a large yard surrounded with poultry fencing so fowls could not get out, but would have the freedom of the yard. I might keep 50 to 100 laying hens of the best laying strain. What breed would that be? I would like you to tell me how to start up a business of this kind, and would it be profitable, being aware of the fact that I would have to buy all my feed grain, etc.? I would like this business very much as a side line, if I could make it pay. **J. J. Mc.**

Ans.—As an avocation, this business may prove interesting; as a vocation, it would not insure a very fat living, though if well managed it may earn a modest profit over fixed charges and current expenses. We advise commencing in a small way, with not over fifty fowls, and let the business develop naturally along the most advantageous lines. As to the best laying breed, there may be such a one, but nobody knows what it is, or if he does know it, he cannot prove that he knows it. Any of the popular varieties of Minorcas and Leghorns are good egg-producers, though for winter eggs there are probably none superior to the Rocks, Wyandottes, Orpingtons, and Rhode Island Reds.

### MANAGEMENT OF FARM.

Have just commenced on a farm of 150 acres. Twenty-five acres at the back has a creek running across, which is an excellent run for cattle. My family like farming. We have ten cows, ten calves, and twenty head yearlings, some near two years old, seven head of horses (five working). Our expenses are heavy, having to pay \$500 rent and \$150 for help, as the boys are quite young yet, oldest only sixteen. How can I run this farm of pretty heavy clay soil to the best advantage, so as to make honest money, and all I can? **A. P.**

Ans.—The subject of farm management is far too broad for treatment in this column. Besides, we can scarcely presume to advise without more thorough knowledge of the farm; its location, the buildings, and the special tastes and aptitude of the farmer. It would appear, however, that our inquirer would do well to go in quite strongly for dairying, with hog-raising as a side line. The back 25 acres should be seeded down to permanent pasture, although it is a little late to do it this season. Next spring, part of it might be seeded, and the balance (which is presumably already in grass) kept as a grazing ground during the summer of 1909. On the arable portion of the farm, practice a short rotation, raising ten to fifteen or twenty acres of corn for the silo, and some mangels and turnips besides. For fuller instruction follow "The Farmer's Advocate" carefully from week to week.

## FOR 5 YEARS EACH SPRING

## FACE AND SCALP ERUPTIONS

TROUBLED THIS LADY TILL ZAM-BUK CURED.

Miss Mary Levesque, 313 St. Adolphe St., Hochelaga, Montreal writes:—"I have found Zam-Buk an excellent remedy for skin eruptions. Up to this Spring I was bothered for almost five years with a red rash, small pimples and sores on my face and on the scalp thro' the hair. Nothing I used would clear this rash from the skin until I began using Zam-Buk. This salve has effectually and I believe permanently taken off those unsightly pimples and sores from both scalp and face. I shall recommend Zam-Buk to all my friends."

For healing eczema and all skin disease Zam-Buk is without equal. It is good for rheumatism when well rubbed in. Files also yield to Zam-Buk. All stores and druggists, sec. or Zam-Buk Co., Toronto.
