following is a poem of singular beauty. The very flow of the system answers Milton's description of music. The "Little riend," whoever she may be, is to be envied her privilege of singular a stainstering angel to one of the best of hearts and most fleed of minds, and she will not bese her reward—for, as Minandon remarks, "A poet's love is immortality," and a poem like his is of itself sufficient to insure it to the subject that inspired is —Western a paper.

WHY DO I LOVE HER SO!

A weary life is mine, at hest—
Few pleasures mine that others chare—
And off, by lonely thoughts opprest,
It seems that I might well despoir;
But when my "Little Friend" I see,
A pleasant thing is life to me.
To know that she is at my side.
To hold her little hand in mine,
To watch her eyes that fouldy shine,
Her cherreb face, that brightens up
With love's intelligence divine—
With this my soul is satisfied,
And drains a pare, refreshing cup
Of calm' and quiet happiness:
In sweet content I then repose
From sorrows's pangs and passion's throes,
Without a wish, save not to stir
From one whose very look can bless!
Some wonder what I find in her
My heart so strangely to impress—
A clever child, they must confess,
But nothing more, for all they see,
Than other children of her age,
Whon scarce one thought of mine engage.
Whence cometh, then, the witchery
That sways me in her sweet control?
They know her not—and none of earth,
Save I, may ever know her worth;
For we have spoken soul to soul,
And met in spirit face to face,
When all her mind's immortal grace,
Love, truth and goodness, come revealed
In beauty from the soul concealed.
Twas in an hour of bitter pain,
When the long agony of years
Was crowded in a moment's space—
When friends seem'd false, and love as vain—
And the wrang heast and burning brain
Could only find relief in tears—
For I desparied of earthly good—
She came—I scarce know whence or how—
Aliste and devents have a second of the care o

and the wrung heart and burning brais
Could only find relief in tears—
For I despaired of earthly good—
She came—I scarce know whence o
A light and glosy round her brow?
Sublimely be satiful the stood;
For all of earth had left her face,
And all of heaven I there might trace
Her look sustained my heart, and chee
Her words my wounded sprits healed
The child, the mortal, disappeared,
And God's own angel stood, revealed
Then did we soul with soof combine.
So, I am hers, and she is mine—
For ever here! for ever mine!
Forth in the world I see her go,
A common child to common eyes—
To mine, a star of Paradise,
Uncarthly, beautiful, divine!
No worder that I have here

BONAPARTE'S OPINION OF HIS TWO WIVES .- Their char-BONAPARTE'S OPINION OF HIS TWO WIVES.—Their characters were diametrically opposite. Nover were there two women less like each other. Josephine had grace, an irrestible seduction, and unreserved devotedness. Maria Louisa had all the timidity of innocence. When I married her, she was a truly virtuous sovice, and very submissive. Josephine would carrifee millions upon her toilet and in her liberalities. Maria Louisa, on the contrary, economised what I gave her, and I was obliged to scold her, in order to induce her to make her expenditure consistent with her rank. Josephine was devoted to me; ahe loved me tenderly—no one ever had a preference to me in her heart. I uniformly held the first place—her children the next. And she was right, for she was the being whom I most loved, and the remembrance of her is still all-powerful in my mind.—Montholon's St. Helena.

GREAT DISCOVERY IN ILLUMINATING AND MOTIVE POWER.—The Railway Times has the following:—"The decomposition of water has at length been obtained, and that at a merely nominal cost, and with unerring precision. This great discovery originating in America, has been perfected by the experiments of an eminent German chemist, and patented in the three kingdoms by Mr. Shepard. The carburetted hydrogen may be formed to any extent, which, while possessing an illuminating power equal to that of coal gas, is expable of being itself applied to the same purpose as steam at a remarkable high pressure. The gas is also capable of producing an amount of caloric equal to that of live coal, and so well and cheaply fitted to act as a combustible agent in the conversion of water into steam. This tremendous power has been for some time eagaging the attention of our most eminent engineers, and will, when sufficiently tested, be experimented upon before the public. If successful, as there is every present appearance of its being, the revolution it must effect in the economic working of railways, and indeed in every branch of trade and manufacture where steam is employed as a motive power, is altogether incalculable. It almost opens to the wondering e where steam is employed as a motive power, is altogether incalculable. It almost opens to the wondering gaze the Utopian vists in which unskilled manual labour shall be no longer necessary. It is sufficient for us, however, to state that several of the railway companies are in treaty with the patentes; and that, consequently, if any thing whatever is capable of being made out of the discovery, the railway interest will possess at once the first benefit and honour in its realization."

THE CRYSTAL PALACE BY MOONLIGHT.—The clear nights and the full bright moon have enabled us to see the Crystal Palace in a new light—that of moonlight, is decertainty, like Melrose, you must see it by moonlight, if you would see it rightly. Under the blue cloudless zure of the heavens, studded with its glittering stareyes, the traveller westward sees its elegant proportions sail out into exquisite relief above the long line of Knightsbridge Barracks, like a delicate caprice of an evening's frost, gracefully disclosing its chaste beauties to its own chaste moon. Approach nearer and a hundred moons sparkle in the tall arched transept, and the "broken light of stars" smile at you through the web of iron net-work, and a silver glitter, chequered by the arms of intervening trees, floats outward till it loses itself in the dark distance of the park.—Leigh Hunt's Journal.

London Presonicals.—It is stated that in London the sales of periodicals are as fullews:—The Family Herald, 175,000: London Journal, 170,000: Reynolds' Miscellany and other works, 55,000: Lloyd's Miscellany and other works, 95,000. Some of the publications sell for three half-pence, and their reputed circulation are these:—Chambers' Journal, 80,000: Eliza Cook's Journal, 15,000: Leigh Hunt's Journal, 6,000: London Labour and Poor, 18,000: Household Words, 80,000: Holyock's and Watson's publications, most of which are sold for two-pence, nearly 13,000.

A century ago, the amount expended in books, periodicals, and newspapers, sid not exceed £100,000 a-year, whereas the sum new so expended annually is calculated at £2,100,000.

JUDSON'S CHEMICAL EXTRACT OF

CHERRY AND LUNGWORT,

Coughs, Colds, Hearsness, Spitting of Blood, Night Sweats, Asthma, Liver Complaints, and CONSUMPTION.

DO NOT NEGLECT IT. Consumption can be and has been cured,

in thousands of cases, by this only certain remedy,

JUDSON'S CHEMICAL EXTRACT OF CHERRY AND LUNGWORT,

and no remedy has ever before been discovered that will certain! Cure Consumption.

The most strongly marked and developed eases of Pulmonary Consumption, where the lungs have become diseased and ulcerated and the ease so utterly hopeless, as to have been pronounced by Physicians and friends, to be past all possibility of recovery, and at times thought to be dying, have been cured by this wounderful remedy, and are now as well and hearty as ever. It is a compound of medications which are peculiarly ad pied to and essentially necessary for the cure of COUGHS AND CONSUMPTION.

Its operation is mild, yet efficacious; it loosens the phlegm which creates so much difficulty, relieves the cough and assists nature to expel from the system all diseased matter by expectoration, producing a delightful change in the breathing and chest, and this, after the preacriptions of the very best medical men and the inventions of kind and sorrowing friends and Nurses, have failed to give the smallest relief to the Consumptives sufferer.

THOUSANDS OF CONSUMPTIVE
persons have been deceived repeatedly in buying medicines which
were said to be infallible cures, but which have proved only pallintipes, but this medicine is not only a pallistive but a cure for
ulcerated lungs. It contains no deleterious Drugs and one trial
will prove its astonishing efficacy better than any assertions or
certificates in curing consumption and all diseases of the Lungs,
such as Spitting of blood, Coughs, pain in the side and chest, sightsuceats, &c. &c.

About 1000 certificates of almost miraculous cures, performed by
this miscine, from some of the first Ductors, Clergymen and Merchant have been sent us for this medicine, but the publication of
them sicks too much like Quackery, [we will show them to any person, calling at our office.]
This medicine will speak for itself and
enough in its own favour wherever it is tired.

Coution—This medicine is put up in a large bottle and you must
find the name of Judson & Co., Proprietors, New York, on the splendid Wrapper around the bottle. All orders must be addressed to

For the cure of Ring-bone, Blood Spavin, Bone Spavin, Windgalls, and Splint-a certain remedy.

CARLTON'S CONDITION POWDERS FOR HORSES AND CATTLE.

The changes of weather and season, with the change of use and feed, have a very great effect upon the blood and sinuous fluids of horses. It is at these changes they require an assistant to nature to throw off any disorder of the fluids of the body that may have been imbibed, and which, if not at "and to, will result in the Yellow water, Heaves, Worms, Botts, &c. All of which will be prevented by giving one of these powders, and will at any time, cure when any symptoms of disease appear, if used in time. They purify the blood, remove all inflammation and fever, loosen the skin, cleanse the water, and invigorate the whole body, enabling them to do more work with the same feed. The action of these powders is direct upon all the secretive glands, and therefore has the same effect upon the Horse, the Ox, the Ass, and all Herhivorous animals—all diseases arising from or producing a bad state of the blood, are speedily cured by them.

Remember and ask for CARLTON'S CONDITION POWDERS, and take no others.

CARLTON'S NERVE AND BONE LINIMENT FOR

HORSES, HORSES,
and for the cure of all diseases of man or beast that require external
application, and for contracted cords and sunseles, strengthens weak
lumbs, and is also used for sprains, bruises, suddle galls, swelled legs,

timos, and is also used for sprains, oraises, saddle galls, sectled legs, sores of all kinds on horses.

Carlon's articles for Horres and Cattle are prepared from the recipe of a very celebrated English Farrier, and will cure in ninety-nine cases out of one hundred of any of the above complaints. They have been used by Farmers, livery-nen, stage proprietors and others with the most marked and decided success.

Caulion.—None can be genuine unless you find the name of J. Carlton Comstock, on the Wrapper of each article.

COMSTOCK'S VERMIFUGE.

This is the most extraordinary remedy for Worms ever used; it effectually eradicates Worms from both Adults and Children. It cannot harm the most delicate infant or strongest Adult, and never fails to completely root out and destroy all kinds of Worms. The cost, 25 cents per bottle, puts it within reach of all, and all parents who are without it, are wantonly exposing the lives of their children to those fell destroyers of youth, "Worms." Look for the name of Comstock & Brother, proprietors, on the Wrapper of each bottle.

# EAST INDIA HAIR DYE.

COLORS THE HAIR, AND WILL NOT THE SKIN. COLORS THE HAIR, AND WILL NOT THE SKIN.

This dye may be applied to the hair over night, the first night turning the lightest Ruo or Gars Hairto a dark brown, and by repeating a second night, to a bright jet black. Any person may, therefore, with the least possible trouble keep his hair any dark shade or perfect black; with a positive assurance that the dye, if applied to the skin will not colour it. By an occasional application, a person turning grey will never be known to have a grey hair. Directions complete with the article. There is no colouring in this statement, as one can easily test.

These facts are warranted by the gentleman who manufactures it, who is the celebrated Chemist, Dr. Comstock, author of Comstack's Chemistry, Philosophy, and other works, and School Books, well known and widely celebrated by the public.

# Deafness.

Use Dr. LARZETTE'S ACCUSTIC OIL, for the cure, of Deafness-Also, all those disagreable noises, like the buzzing of insects, falling of water, whitzing of steam, which are symptoms of approaching deafness. Many persons who have been deaf for ten, fifteen or twenty years, and were subject to use ear trumpets, have after using one or two bottles, thrown aside these trumpets, being made perfectly well. It has cured cases of ten, fifteen, and even thirty years at anding of deafness.

#### Consumption!!!

Every body knows is a flattering disease. It commences and progresses so insidiously, that before one is aware of it, the lungs are a mass of ulcers, then a sudden exposure or change from heat to cold, produces an inflammation, and, in a few days or weeks, it is said, he or she died of hasty Consumption. For all troubled with cough or lung complaint, we would refer to the advertisement on the outside of this paper of Judson's Chemical Extract of "Cherry and Lungwort," which is said to be a certain cure for this awful disease.

#### THE GENUINE OLDRIDGE'S BALM OF COLUMBIA. FOR RESTORING THE HAIR-

If you wish a rich, luxuriant head of hair, free from dandruff and seurf, do not fail to procure the genuine Balm of Columbia. In cases of baldness it will more than exceed your expectations. Many who have lost their hair for twenty years, have had it restored to its original perfection by the use of this belm. Age astac, or condition appears to be no obstacle whatever; it also causes the fluid to flow with which the delicate hair tubes are filled, by which means thousands [whose hair was as grey as the Asiatic Eagle], have had their hair restored to its natural colour by this invaluable remedy.

Caution—Never buy it unless you find the name of Comstock & Co., Proprietors, on the wrapper of each bottle.

PROFESSOR A. G. BARRY'S TRICOPHEROUS or MEDICATED SYRUP—Truth loves an incredulous audience, for if they listen, they are sure to become converts. If there is any man or woman who challenges the statement that Barry's Tricopherous is a specific for cutaneous diseases and injuries, and the best preparation for the hair extant, all that is asked is that he or she will try one twenty-five cent buttle of the fluid, and read the pamphlet in which it is enclosed. Read and make the trial. Truth will then force conviction upon the mind, that all, and more than all, that has been claimed for the preparation by the inventor, is as palpable a fact as the existence of the sun, or changes of day and night. Referring the reader to the thing itself, and the accompanying treatises for a solution of all his doubts, if he entertains any, we will here briefly state what the Tricopherous will do. It will remove scurf and dandruff; it will restore, preserve and beautify the hair; it will prevent it from becoming harsh or gray; it will dispose the hair to curl and render it glossy: it will relieve inflammation, itching and all irritation of the skin; it will crue bites and stings of insects; it will take away the pain of cuts, burns, bruises and sprains; it will allay the pain of hematism and cure headache. For these reasons, it ought never to be absent from the dwelling of any family, and no one should travel without it. Sold in large bottles, piece is sents, at the principal office, 137 Broadway, New York. Forssele by the principal nurchants and druggists throughout the United States and Canada. OR, ARTIFICIAL SLATE.

FIIIIS admirable article has been tested for some years and provided very valuable, becoming a perfect slate, as hard as marble in a few months, completely protecting whatever is coated with it from the action of the teachter and fire—a better fire-proof than tin or zinc. Several Insurance Companies certify they will insure buildings covered with it at a cheaper rate, than if covered with those metals. It is of two colors, the black is best for roofing—the chocointe the best thing ever discovered for sides of either brick or wood, forming a perfect stone coating of a handsome stone or chocolate color, can be casily changed by a little white lead or other coloring matter to suit the taste. There is nothing equal to it for steambout and car decks, and all kinds of iron as it forms a coating nearly as hard as the iron itself, and never cleaves off.

CURE OF A DISORDERED LIVER AND STOMACH, WHEN IN A MOST HOPELESS STATE.

Extract of a Letter from Mr. Matthew Harvey, of Chapel Hall?

Airdrie, Scotland, dated the 15th January, 1850.

To Professor Holloway:
Sir,—Your valuable Pills have been the means, with God's blessing of restoring me to, a state of perfect health, and at a time when I thought I was on the brink of the grave. I had consulted several eniment Brockers, who, after doing what they could for me, stated that they considered my case as hopeless. I ought to say that I had been suffering from a Liver and Stomach complaint of long standing, which during the last two years got as much worse, that every one considered my case as the property of the state of the property of the state of the property of the stomach and right side, I have by their means along cot completely cured, and to the astonishment of myself and every body who knows me, (Signed)

To Professor Holloway.

Sin,—I beg to inform you that for nearly 5 years I hardly knew what it was to have a day's health, suffering from extreme weakness and delility, with constant nervous headaches, gitdiness and sickness of the stomach, together with a great depression of spirits. I used to think that nothing could be east in me, as I had been to many medical men, some of whom, after doing all that was in their power, informed me that they considered that I had some spinal complaint beyond the reach of care, together with a very disordered state of the stomach and liver, making my case so complicated that nothing could be done for me. One day being conseanly ill and in a dejected state, I saw your Pills advertised and resolved to give them a trial, more perhaps from curiosity than with a hope of being cared, however I soon found myself better by taking them—and so I went on perserveing in their use for six months, when, I am happy to say they effected a perfect care.
