

No Agents in Newfoundland

DESIRING to set at rest certain rumors which we are advised, are now current, we hereby announce that no agents are acting for us in Newfoundland in any capacity whatsoever. Any such representations are utterly false.

Our direct wire service extends to each of the large mining camps in Northern Ontario, including Porcupine, Kirkland Lake, Cobalt, Sudbury and North Bay. Any person in Newfoundland desiring the latest and most authentic news of actual operations at any of the large gold, silver or nickel mines should write us direct.

WRITE FOR THE MARKET DESPATCH.

Our information, which is issued weekly in The Market Despatch, is widely sought after and recognized as most dependable for the making of lucrative investments in the mining market. Free upon application.

Evacuation of Corfu has Begun.

Greece Hands Back the Islands of Imbros and Tenedos to Turkey--Canada's Refunding Loan of \$172,000,000 is Being Successfully Floated--American Liner Lexington Ashore.

CANADA'S REFUNDING LOAN GOING WELL.

TORONTO, Sept. 21. Subscriptions to the new Dominion of Canada refunding loan totalled fifty-eight million dollars to-night, exceeding the preliminary offering by eight million dollars. Dealers in charge of marketing expressed complete satisfaction with the character of response and predicted the entire amount of one hundred and seventy-two million dollars required by the Government to refund the 1923 victory bond issue which matures on November first would be raised in weeks without difficulty. Outside of the time financing the present offering represents the most important piece of financing ever undertaken in the Dominion.

TURKEY GETS ISLANDS BACK.

CONSTANTINOPLE, Sept. 21. The islands of Imbros and Tenedos, at the entrance of the Dardanelles, were handed over yesterday by Greece to Turkish authorities. These islands comprise the last portion of Greek territory, occupied by Greece, which has to be returned to Turkey in conformity with the Lausanne Treaty.

ITALY EVACUATING CORFU.

LONDON, Sept. 21. Although the conference of Ambassadors fixed Sept. 27th as the date for the Italian evacuation of Corfu, the Italians actually began evacuation to-night. Artillery brigades, guns and ammunition have already been embarked.

PASSENGER LINER ASHORE.

PROVIDENCE, R.I., Sept. 21. The Colonial Line passenger steamer Lexington ran ashore in thick fog in Narragansett Bay early this morning and her passengers were transferred to a steamer that came to her assistance and brought the refugees to this city. The Lexington was not apparently in danger.

BERKELEY PROPOSAL TO HELP NEWS PAPERS.

NEW YORK, Sept. 21. A basis for the formulation of a working agreement to resume publication, submitted at a meeting of the New York Newspaper Publishers Association by George Berry, President of the International Pressmen and Journeymen Union, was an for discussion at a meeting of the publishers on Tuesday. The proposal followed Berry's declaration in declaring the charter of the local union suspended because of the walkout without sanction of the parent body.

PREMIERS TO RECEIVE FREEDOM OF LONDON.

LONDON, Sept. 21. Arrangements have been completed for a triple presentation of the Freedom of the City of London, on Oct. 12, to the Guild Hall, to Premier MacKenzie King of Canada, Premier Bruce of Buxton, and Premier Stanley Baldwin of Great Britain.

FROM MARRIAGE FESTIVITIES TO DEATH BED.

NORTH SYDNEY, Sept. 21. To be called upon to officiate at the death bed of his brother.

er, only to arrive too late to see him alive, was the saddening experience of Noah Johnson of North Sydney, who was married last evening to Miss Esther Cairnes. Shortly before midnight he was called to Glace Bay where his brother died before he arrived.

FURTHER TROUBLE IN COAL AREA.

HAZELTON, Pa., Sept. 21. All operations of the Lehigh and Wilkesbarre Coal Company, three collieries and four strippings near here, were tied up to-day by a strike of eighteen hundred men and boys over disagreement on the recently established eight hour shift for workers who heretofore were on duty twelve hours.

PRINCE EXPERIENCES SEPTENNIAL SNOW STORM.

HIGH RIVER, Alberta, Sept. 21. Enjoying the sight of a real Alberta September snow storm, Lord Rentfrew put in a quiet morning around E.P. Ranch to-day.

SHARE FOR SHARE.

TORONTO, Sept. 21. Share for share of the Bank of Commerce stock for that of the Bank of Hamilton which the Commerce is absorbing will be offered by directors of the latter, it was definitely announced. This follows a complete inspection of the Bank of Hamilton assets by Commerce officials.

Standardize the Cure.

Editor Evening Telegram.

Dear Sir--As you see this box which you have received contains fish. I have sent them to you as a sample of the quality that we should be sending from this country each succeeding year unless the weather is exceptionally bad for curing. As you know we have always talked a good deal about our markets and what ought to be done towards protecting our trade within those markets. We talk a great deal each year on the curse of the consignment system and worry ourselves thin in trying to hatch out a remedy when we ought to have sense enough to know that the protection or retention rather of our markets can be literally secured for ever by sending out a quality of fish like or even nearly like the sample (if they haven't got damp) you have before you. If we but made up our minds to do this we would quickly restore confidence in our customers and before we could realize it the curse of the system of consignment would pass out automatically. To me it has always been a source of much irritation to find fish buyers paying the man who has taken no pains with his product, either in cleaning or drying considerably more than the person who practically worries himself over every detail of the process. The buyer pays him extra for his carelessness because by an overdose of salt and refusal to dry his fish properly he gains surprisingly in weight and therefore his returns are much higher. To put it plainly fish buyers all along have stuck to a system of penalizing the man who keeps open the bare possibility of selling our fish at all. The consequence is that those who produce a good quality of fish are getting tired of trying to maintain a reputation for products for which there is no recompense. There is certainly small consolation in the fact that his extra labors sell the other fellows laborers in the market, and of course irritation is the obvious result of bad fish keeping in a position where no one will dream of buying from us at all until what we have to sell has been very expensively conveyed to their very doorstep. Those of us who have given any thought to the matter know better than to blame the fishermen. Just as long as laxity and indifference took profitable very few men will take a stride to get out of it, but if fish buyers only realized their duty toward the maintenance of our fishing industry, and kept in view a fair conception of justice to the men who take extra trouble to produce a good article much of our worries about foreign competition and consignment would be a thing of the past. It is quite true that every fisherman cannot expect every year to turn out a special quality of fish. There are different things to be considered. For instance abnormally bad weather; changing from one quality of salt to another, or engaging salters who have previously had little or no experience, but in spite of all difficulties instead of exporting fish, the greater part of which is inferior we could, and in our own interest we should, be selling an article that would bring us credit; but before this can be done the individual fisherman must be paid according to the quality of his fish and the merchant risk himself of the very damaging expedient of mixing good and bad qualities. As you know, doubtless, there has been much controversy over the best kind of salt to use to insure a good quality of fish. Just at present I am offering no opinion on this matter. I give up the hope that publications created expressly for fishermen and fishing interests will ever do much to benefit either; consequently I am leaving you the option of a guess from a study of the fish sent you as to what kind of salt I am using. A possible awakening of interest is my object and incidentally an explanation by further correspondence.

Yours truly,
FISHERMAN.

KNOWLING'S SHOWROOMS

WET WEATHER GOODS

KNOWLING'S SHOWROOMS

Ladies' and Children's Oil Coats, Hats, Umbrellas, Mackintoshes, Raglans

NEW GOODS

Children's Raglans

Trapped by a Tongue.

THE CHAMELEON'S LEGS ARE SLOW, BUT ITS TONGUE IS ONE OF THE FASTEST THINGS ON EARTH.

The chameleon, as everyone knows, has a wonderful way of changing its colour to suit its surroundings, but scientists all agree that the most remarkable thing about it is its tongue. This can only be seen properly when in use. The length of the chameleon's tongue is astonishing. When out to its full extent it is of exactly the same length as the chameleon itself, yet, when not in use, it can be packed away neatly inside the mouth. It is somewhat club shaped, widening out towards the tip, which is covered with a sticky substance. When attacking its prey the chameleon creeps forward stealthily, its movements being almost imperceptible. When six or seven inches from the hunter stops and, after fixing the prey with its eye, to be sure of its aim and range, cautiously opens its mouth. Out shoots its tongue, and is drawn back into its mouth with the victim sticking to the tip. The whole operation is carried out at lightning speed. Swivel Eyes. The chameleon is an insect-eater and quite an expert in catching flies, butterflies, moths, and even grasshoppers. Its enormous eyes are so set in their sockets that they can be rolled in all directions, acting independently of each other. The eyeballs are conical in shape, which greatly adds to the quaint appearance of the animal. Its habit of changing colour is well known. This change is partly voluntary and partly a response to heat and cold, light and shade. The normal daylight colour is greenish, with brown spots. This makes the chameleon almost invisible in the shrubberies in which it usually lives. It is very inactive when on the ground. This is due to the peculiar shape of the foot, the toes of which are tied together into two bundles on each foot. They are formed thus to enable it to maintain a secure hold on the branches of trees. Its movements are ungainly, and it walks in a slow, deliberate way that is particularly exasperating to watch. In fact, all its activity seems concentrated in its tongue. Particular attention has been paid to the several important trap shoots of the Dominion, and accounts of the B.C.R.A., the Bisle Team in England, a write up of which is given by Major Crowe, the Maritime Trap shoot, and the O.R.A. are all contained in the October issue.

Rod and Gun.

One of the treats in store for the sportsman in Rod and Gun in Canada in the October issue is a story by H. C. Duffus on "Bear Hunting up Bute Inlet, B.C.," which is written in a particularly readable manner. Bonycastle Dale has a good article on the "Virginia Deer of Nova Scotia," while F. V. Williams and Martin Hunter and Martin Hunter have two good stories in this issue. Guns and ammunition is particularly well filled with articles by men such as A. A. Haines, E. T. D. Francis, and R. Leckie-Ewing, all well known to Rod and Gun readers. Robert Page Lincoln, J. W. Winson, and F. H. Walker have good departments, while "Along the Trapline," edited by M. U. Bates opens again in the October issue.

PET MILK

You will be asked to pay a little higher price for Three Flowers face powder than is charged for some powder, but this little extra charge is more than offset by the superior quality of Three Flowers. Ask the woman who uses it.—sept22,11

MUTT AND JEFF

EVIDENTLY MUTT FORGOT TO DUCK HIS BEAN.

—By Rud Fisher.
