

31 Years Older Than The Dominion of Canada

AS the name implies, The Bank of British North America was established long before the Provinces united and became the Dominion of Canada. The sound, progressive management which has made it a power in Canadian finance makes it the bank for your account.

CALM AND CANVASSING THE KING OF BRITISH ARMY; AN IDEAL COMMANDER

British Headquarters, France, June 5.—(Correspondence of the Associated Press.)—No military leader is more averse to publicity or works more silently than Sir Douglas Haig, the British commander-in-chief in France. The man who is important for the offensive is his patience, and yet again patience while the new munition factories begin to produce and he continues his building. His generals say that he never tells them his plans; only what they are to do.

Probably not one man out of ten of the million or more under his command would recognize him if they saw him. Not given to reviews or any kind of display, this quiet and studious Scotsman was the choice of the progressive, practical, driving element of the army as the one fit by equipment, training and experience to succeed Sir John French. At 55 he is nine years younger than Sir John and ten years younger than Joffre or Von Hindenburg.

How He Entered Army. There is a story that he entered the army as the result of a boyish wager. He went through Oxford with distinction before he went to the military school at Sandhurst. His choice of army was the cavalry, which he had no little to do in far in this war. But no sooner had he received his commission, later in life than most officers because of the time that he had spent at Sandhurst, than he set out with the thoroughness of the student to master every branch of his profession.

"It was in Berlin in the nineties that I met Gen. Haig, who was studying German and the German army," said an Englishman. "I was struck by his industry—not a brilliant man, perhaps, but a sound and well-balanced one. A little hesitant of speech, but he did say what he meant to the heart of things."

He studied the French army, too, and the history of all campaigns with the systematic thoroughness that he applied to everything. The same was true of his pastimes as his profession. Whether he had talent for it or not he made himself a first-class golf player, though the form which he developed did not excite the envy of those who were in the army.

At the British Army Staff College, where officers learn organization, he was a marked man before he acted as chief-of-staff to Gen. French in South Africa in the operations that made his reputation. He was a soldier, though the public had hardly heard of his reserved, unobtrusive work.

A Great Organizer. Of the men of command rank in the British army in August, 1914, he and Sir William Robertson—another student of the staff college—were the two who had risen from the ranks, and now chief-of-staff to the commander-in-chief. They were the two who were appraised by the generation of officers who had developed since South Africa as having large bodies of troops on the scene of continental warfare. They were not the magnetic, dashing leader type, but organizers.

Going out in command of the first army of the British expeditionary force, Sir Douglas had seventeen months' experience, Mons, Ypres and Loos, of the warfare of the western front—which all agree is the toughest school any soldier has ever known.

There was no doubt who commanded the first army. It was Haig. He was a figurehead for the work of an able chief-of-staff. The training of his bandy his name about, did not detract from his personality to the public though he was to the army.

When anyone asked at the front who was the best man to take the army forward, the answer was almost invariably "Haig." He had not captured the army's imagination, but his reason. The tribute was one to brains.

The new army was arriving in great numbers from England, and the training of the new army was a task of the highest importance. The training of the new army was a task of the highest importance. The training of the new army was a task of the highest importance.

Where He Stays. A wisp of a flag and two sentries designate the entrance to the chateau smaller than that occupied by many divisions, which is the headquarters of the commander-in-chief. Any one who expects to be ushered into offices with aides running in and out of doors and telephone bells ringing will be disappointed. No place could be farther removed from the struggle of the trenches, and yet in the army zone.

The only occupants of the chateau beside Sir Douglas are his private secretary and his aides, who are "rocks," which is the army word for officers who have been wounded and are not fit for the physical exposure of the trenches. In other words if a younger wish to become an aide he must have fought, and then have the decision of a doctor that he cannot stand living in cellar-like "dugouts."

The hour of any appointment is exact to the minute, and whoever has one at his chateau is expected to be there in the minute, general headquarters' time. There is little ceremony. Life at that small chateau has a real soldierly atmosphere. As the day wears on, the places the food on the sideboard and everyone takes his plate and helps himself. Few guests come. Sir Douglas keeps his time to himself, for his work and his own voice of reason.

An Out-of-Door Man. One of the aides received the caller; and a minute later the man with iron-grey hair and moustache, sturdy, athletic build, slightly above medium height, who comes into the hall could not be mistaken, whether in or out of uniform, for anything but a soldier, though something about the well-chiseled regular features also suggests the scholar.

"Oxford and Sandhurst and India," said one of his admirers, "and hard work at a desk when he was not taking exercise in the open air best describe him." In one of the rooms of the ground-floor the walls are hung with maps, including a series which have been covered on a roller. Any portion of the front in all its details may be referred to in a moment. In the centre of the room a desk; and against the wall a table with more maps and drawings and some of those strange photographs from aéro-

FINANCIAL AND COMMERCIAL

THE LOCAL MARKET

Strawberries were very plentiful on the local market today, scarcely a farmer being without a crate for sale on his wagon. The quantity brought in, and the poor demand seriously affected prices, which rapidly fell several cents, being quoted at 10c per box, wholesale, and at 11c and 12c, retail. These prices show a further weakening as the morning passes.

Hay was scarce this morning, less than a dozen loads being brought in. There was practically no demand for hay, other grains were slow and prices were firm.

Vegetables were low and not many were brought in.

GRAIN.
Winnipeg, June 26.—Winnipeg wheat closed today from 3c up to 3c lower.

Chicago, June 27.—Higher cable quotations and free buying on the part of the local market have caused a marked advance today in the value of wheat. For the time being the trade conditions, and the improvement in weather fact that the world's available stock today was the largest ever recorded for June.

Opening prices, which ranged from 45¢ to 46¢ high at 2 1/2c, 1 1/2c, 1 1/2c, were followed by an additional upturn and then a moderate reaction.
