In reckoning up the points of the Maori slugger, Slade, almost everybody notes his large hands, and among non-professionals the remark is frequently heard, "What a terrible blow he must be ble to give with such enormous hands!" That is an erroneous idea. There may be uses for which a hand like a lam is ada; ted, but fighting is not one of them. Nor, indeed, does the size of the hand indicate great stringth. The extremities are most likely to be small, where there is that due proportion between the limbs and body that produces the greatest physical strength. The hand of a puglisht is often enlarged by toil before he becomes a fighter, for the ranks of the sluggers are as a rule, recruited from among young men pursuing severe occupations, such as blocksmithing, moulding, boiler making and should be as small and hard as possible.

enthusiastic over her beautiful model and said that her lines m ant speed and that she could battle with any sterm.

The Atalanta is built from a purely amorican model, even to the elliptical stern. The keel was laid on Dee-mber 10, and is of hammered iron eight inches in depth and two in thickness. The frames sre of ang'e from of the best quality. The length over all is 220 feet 8 inches, and the flush deck extends over 225 fe t. The breadth of beam is 26 feet 4 inches, and the depth 16 feet, although the load-line draught is but 13. The Atalanta has been built for comfort as well as sp. ed, and the freat deck will give ample opportunity for a fine promenade. Several handsome venticator tops, a marrow house amidships, a steam windlass forward, and the necessary emokestacks and skylights alone will break up this upper deck, flurh fr. m stem to stern. There will be two sets of boat davits on each side, from one of which will hang a steam launch.

So much for the deck But little can be said about the contemplated magnificence below, for the designers will say nothing. Even Jay Gould knows on y in a g. neral way what will be done between decks. The dasigns are entirely original. The apartments begin 25 feet abaft the foremast and run aft about 80 feet. Forward is to be an elegant salon, fitted up as a smoking and lounging room. The galley is abaft of this. The stoveripes are to be connected with the snoke-stack, and it is expected that the odors from the kitchen will be carried away in smoke. The galley communicates with the lower deck and with the pantry, which is to be along the port side. Abaft this comes the engine room. The captain has a room in the stern.

Jay Gould's private stateroom will be magnificently fitted up. The main room will be inceder, maple, sycamore, batternut, and California laurel. —Impaired vigor of mind and body, in both male or female, old or young, cured by the timely use of Dr. E. C. nishing of the various cabins and staterooms will be in cedar, maple, sycanfore, butternut, and California laurel.

The Atlanta will have three masts, and will be schooner-rigged. The engine is to have every appliance known to modern mechanics. The yacht will be manned by a captain, two mates, four quartermasters, two boatswains, an engineer and two assistants, three coilers, three cooks, eighteen seamen, and enough servants to bring the crew list up to fifty-two persons. The yacht is to be ready in six weeks, when, it is said, Mr. Gould will have to sign his name to a check for a quarter of a million.

HON. A. MACKENZIE, President. HON. A. MORRIS, M.P.P., J. L. BLAIKIE, Vice-Presidents. WM. McCABE, Managing Director.

GENTLEMEN—We hereby acknowledge the receipt of the sum of fifteen thousand dellars, being in full payment of policy No. 1115, on the life of the late Charles E. Freeman, Barrister, of this city, accidentally drowned in Burlington Bay on February 13. This prompt payment without rebate speaks volumes for the integrity and business management of your Company, the more so that the deceased had only recently been insured, and had merely given his note on one of the Company's forms for the premium which falls due to-day.

We especially desire to commend the Company for its promptness in this case, as the claim papers were only sent into you two days age.

action; also immediately soothing the cough, and effecting entire cures in the most obstinate cases, whether in the acute or chronic forms.

IN ASTHMA—Inhalations immediately arrest the paroxysms and effect entire cures in every case by removing all unnatural obstructions, and by restoring the delicate mucous membrane of the air cells to their normal condition. The cures are usually permanent.

cells to their normal condition. The cures are usually permanent.

IN CONSUMPTION — Inhalations loosen the phlegm, case the cugh, increase the circulation of the blood, assist assimilation, remove consolidation of the lungs, empty and heal cavities with wonderful promptness, arrest hemorrhages, stop all wasting away of the lungs, soothe pain, overcome all shortness of breath, and in fact cure all the earlier and very many of the later stages of Consumption after all hope by other means is last.

We would therefore advise all those who are afficted and have failed in obtaining any permanent relief from other systems, that this is the only means by which permanent cures may be effected.

Over 46,000 cases treated during the past eighteen years for some form of head, throat, or lung troubles.
