Famine and World-Hunger Are on Our Threshold!

in the nations honour, heed! Acquit yourselves like men. As workers on the land, do your duty with all your strength ! -Lloyd George

The Crisis

France, England and Italy in peace times did not depend upon America but on Russia, Roumania and Bulgaria for most of their bread stuffs. With these sources closed the crisis of the hour demands that we see that cur soldiers and the Motherland are fed.

Everyone in Great Britain has been put on limited rations; meat is prohibited one day a week and the making of cakes and pastry has been stopped. Further restrictions are anti-

Bread has gone to 28c per four-pound loaf in England, for the first time since the Cri-mean War.

Lord Devonport, British Food Comptroller, proposes taking authority to search the houses of Great Britain to prevent food hoarding. .

Forty million men, less the casualties, are now on active service.

Twenty million men and women are sup them by service in other war actiporting

In the last analysis, the land is bearing this

One million tons of food-carrying ships have been torpedoed since February 1st, 1917.

on the land. She recently won an All-Comers' Champion prize for plowing,

Germany's hope for victory is in the starvation of Britain through the submarine. Canada's sons will have died in vain if hunger compels the Motherland's surrender.

The land is waiting—the plough is ready— will we make the plough mightler than the sword?

Will we help the acres to save the flag?

World-Hunger Stares Us in the Face

David Lubin, representative of the United States to the International Institute of Agriculture-maintained by forty Governments reports officially to Washington that the food grains of the world on March 31st, 1917, showed a shortage of 150,000,000 bushels below the amount necessary to feed the world until Aug-ust, 1917. He declares it is beyond question that unless a greater acreage is put to crop in 1917 there will be WORLD-HUNGER before the 1918 crop is harvested.

The failure of the grain crop in the Argentine Republic which is ordinarily a great grainexporting nation resulted in an embargo being placed, in March, 1917, upon the export of grains from that country to avert local famine.

The United States Department of Agriculture, in its official report, announces the con-dition of the fall wheat crop (which is twothirds of their total wheat crop) on April 1st, 1917 to be the poorest ever recorded and predicts a yield of 244,000,000 bushels below the crop of 1915. The 1916 crop was poor. Even favorable weather, the wheat crop of the

United States is likely to be the smallest in thirty-five years, not more than 65 per ent. of the -normal rop.

Under date of Ap. ril 10th, Ogden Armour. executive head of Armour & Company, one of the world's largest dealers in food products. stated that unless the United States wishes walk deliberately into a catastrophe, the best brains of the ountry, under Government supervision, must immediately devise means of available acre. is world-wide.

European production is cut in half, the Argentine Republic has suffered droughts. Canada and the United States must wake up!

People are starving to-day in Belgium, in Serbia, in Poland, in Armenia, in many quarters of the globe.

Famine conditions are becoming more wide spread every day.

On these alarming food conditions becom ing known, President Wilson immediately appointed a Food Comptroller for the United States. He selected Herbert C. Hoover, to whom the world is indebted as Chairman of the International Belgium Relief Commission. for his personal direction of the distribution of food among the starving Belgians.

Mr. Hoover is already urging sacrifice and food restrictions, for, as he states, "The war will probably last another year and we shall have all we can do to supply the necessary food to carry our Allies through with their full fighting stamina."

The Problem for Ontario

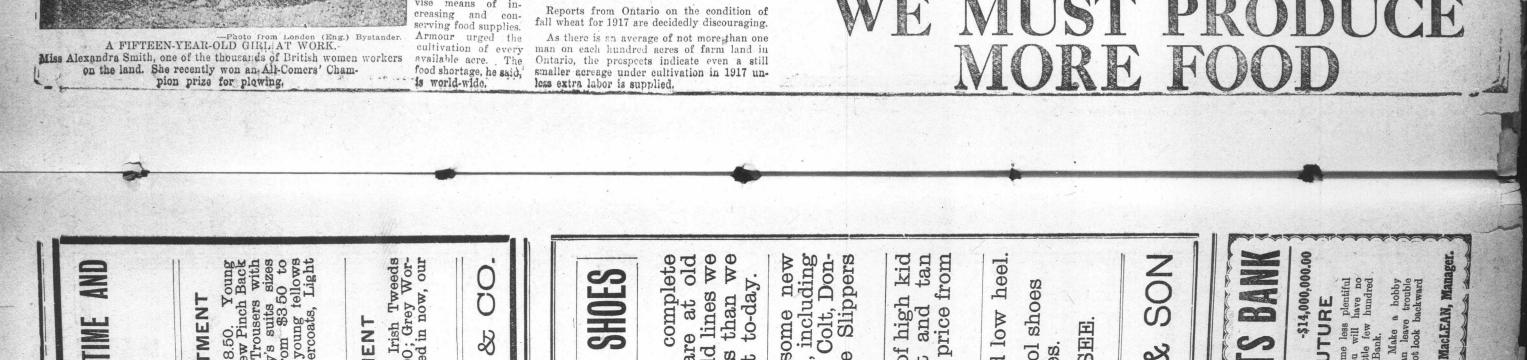

The land under cultivation in Ontario in 1916 was 365.000 acres less than in 1915. Consider how much LESS Ontario produced in 1916 than she raised in 1915:

Acres. Bushels. Acres. Bushels. 704,867 14.942.050 811,185 24,787,011 105,315 9,794,961 Barley and Oats-1916.... 529.886 1915.... 552.318 12.388.969 19.893.129 24,432 7,504,160 Peas and Beans-1916..... 95,542 1915..... 126,943 1,243,979 2,043,049 31,401 799,070 $\begin{array}{c} \text{corn} \longrightarrow \\ 1916.... 258.332 \\ 1915 \\ 309.773 \end{array}$ 12.717,072 51,441 9,043,424 139,523 173,934 7,408,429 34,411 5,858,594 Mangel-W 1916..... 42.793 1915..... 50,799 9,756.015 8.006 15.600.308

Other crops show as critical decline

less extra labor is supplied.

Food Production is the Greatest **Problem the World Faces To-day**

Owing to destruction by submarines, ocean

ships are scarce.

tralia

Why the Call

built and maintained.

It is much easier to protect shipping between Canada and England than on the longer voyages from India or Australia. One vessel can make twice as many trips

from Canada to Britain as from India, and four times as many as from Australia.

Therefore, every ton of food stuffs grown in grown in India or four tons grown in Aus-

to Canada is so Urgent

If this country does not raise a big crop this year, not only will the people of Canada suffer but the Motherland and her Allies will suffer and their military power will be weakened if not paralyzed. Therefore, the right solution of the present war problem comes back to the farm, as to a foundation upon which our whole national and international structure must be

The farmers know that they are the erve, and that the soil on which crops are grown is the strategic ground on which wars are decided. To their care is entrusted the base of supplies.

To enable the farm to do the work two factors are essential. The first is Time. Whatever we are to do must be done at once. Nature waits for no man. The second is Labor. Many farmers cannot plant the acres they would because they cannot get the necessary help. Many are afraid to increase their acreage because they fear they would not be able to cultivate and harvest an unusual crop after they had raised it. If they are to do the work that is essential for them to do. the last man in each city, town and village must be mobilized at once.

Every man not on Active Service can help in every city, town and village are men who by their training on the farm, or by their present occupation, can readily adapt themselves to farm work. These can render no greater service to the Empire at the present time than by answering the call of the farm. Capable men and boys willing to learn should not allow their lack of farm experience to stand in the way

Can the employer render a more signal service in this crisis than by encouraging these men to help the farmer to cultivate every available acre, and by making it easy for them to go?

Ontario's farm lands are waiting-the implements are ready-the equipment is complete-the farmer is willing-all he needs is lahonr

So short is the world's food supply that without increased production many in Canada must go hungry, and even with enormous-Canada is worth to the Motherland two tons ly increased production we cannot expect cheap food. The world is waiting for our hanvoot

> If peace should be declared within a year, the food conditions will be no better, for the accumulated hunger of the Central Empires must be met. This will absorb a large part of the world's supply.

> We do not know when this war shall cease. It is endless-its lengthening out has paralyzed the thought and conception of all men who thought about it and its possible time of clusion. Three months -- six months, we said: nine months, a year, we said; and yet two years and eight months have passed their long dreary and sanguinary length and there is no man who can tell how long this gigantic struggle may vet last.

-From the New York Evening Ma HUNGER TIGHTENING HIS GRIP. Lloyd George, in a letter addressed to farmthroughout the Empire, said :

"The line which the British Empire "holds against the Germans is held by "those who WORK ON THE LAND "as well as by those who fight on land "and sea. If it breaks at any point it "breaks everywhere. In the face of the "enemy the seamen of our Royal naval "and mercantile marine and the sol-"diers gathered from every part of our "Empire hold our line firstly. You work-"ers on land must hold your part of our line as strongly. Every full day's "labor you do helps to shorten the "struggle and bring us nearer victory. "Every idle day, all loitering, lengthens "the struggle and makes defeat more "possible. Therefore, in the nation's "honour, heed! Acquit yourselves like "men, and as workers on land do your "duty with all your strength."

So, for the honor of Canada's soldiers in France—and for the glory of our New-born Nationhood—let it be said of Ontario's citi-zens that, in the hour of our greatest need, their response was worthy of their sons.

We owe a great debt to those who are fight ing for us.
