Total..... \$12,205

A number of Cotswold sheep were sold at an average of about \$100 each.

HARVESTING CARROTS.—Grind a hoe sharp, and send a hand along between the rows to cut off the tops, while another hand with a team plows a deep furrow along side of the first row, close to the carrots; the next furrow will turn them out. Two boys with a large basket can follow, dig up the carrots, and put them in the wagon. When your carrots are harvested the ground is fall ploughed. This we believe to be a good mode.

SOAPSDUDS.—In days that once were, the soapsuds went to the gutter as regularly as the washing-day way was ended, and there are to many who allow the plan to be followed in the present day. All do not yet seem to have learned that a tubful of strong soapsuds is worth as much as a fertilizer and a wheelbarrow of good manure. Now every bucket of soapsuds will be thrown where it will not be lost. The garden is a good and convenient place to dispose of it, but the roots of grape vines, young trees, or anything of this sort will do as well.

It is estimated that 80,000 persons are employed in the shoe manufactories of Massachusetts. The 218, wholesale and jobbing boot, shoe and leather dealers of Boston, sell yearly \$30,100,000, the 106 hide and leather dealers \$25,650,000, and the retailers \$1,390,000, making an aggregate of \$61,140,000. Four of the shoe-houses do a business of over \$1,000,000, annually, two over \$800,000, nine over \$500,000, and thirty-eight over \$200,000.—Three leather dealers have an annual trade of more than a million, three more than \$800,000, seven more than \$500,000, and thirty-four more than \$200,000.
