## POTASH

for FIELD, GARDEN, ORCHARD

POTASH promotes maturity and counteracts the effect of an excess of nitrogen in the soil produced by a too heavy application of farmyard manure or from other causes. POTASH is a direct plant food and is indispensable.

Fertilizer Experiment on Radishes by Otto Herold, Waterloo, Ont., 1906

Treatment: Unfertilized  
 Result: Non-saleable

With Potash  
 \$200.00

Without Potash  
 \$20.00 per acre realized

POTASH in the highly concentrated forms of Muriate of Potash and Sulphate of Potash is obtainable of all leading Fertilizer Dealers. Pamphlets treating of the cultivation and fertilization of all farm crops will be sent free on application.

The Dominion Agricultural Offices  
 of the Potash Syndicate

1102, 1105 TEMPLE BUILDING, TORONTO
