

IRON FENCING,
Bank & Office Railings
And all kinds of Iron
Work, address

**Toronto Fence & Ornamental Iron
Works, 73 Adelaide St. West, TORONTO.**

George Savel, contractor employed on the Dominion railway construction says everything is being pushed along rapidly and the progress of the work just now is satisfactory. Grading is being pushed, track laying has commenced, stations are being erected and in level all along the line there is activity and push.

It is understood from an authentic source that the Duluth and Winnipeg Railroad Co. will take no steps of an active nature this year toward the extension of the line. It will take at least sixty days yet to get the road out of the courts, and by that time it will be too late to extend the road to any point this year that would be of any object in the operation of the line. It was the plan in the spring to extend the road 200 miles this season, but the tedious delays had the effect of delaying the project for another year. There have been two surveys made northwest from the present terminus of the line, but neither of them is entirely satisfactory and another will be made.
