

example is likely to be soon followed by the British. Russia has lately abolished the queer head-dress of the Guards, and given a mere Kepi as head-dress to all the infantry of the line. Austria has abolished her Lancers, reduced the number of Hussar uniforms from twelve to one, and has done away with the white tunic of her infantry regiments. The English Household Cavalry are now unmatched in the world for the luxury of their accoutrements, and indeed all her cavalry present a very dashing appearance. They will probably soon be shorn of their fine feathers, on the score of thus obtaining greater efficiency at less cost. As for the drummers of the Guards' life and drum band, the blue fleurs-de-lys on the white braid of their tunics symbolizes nothing less than the sovereignty which the British Crown claimed nominally over France until 1801. Seeing how sensitive our neighbours are, it is almost a wonder that no French ambassador has ever taken offense at these drummers' coats; though, to be sure, the "lilies of France" have ceased to be regarded as national emblems by the French since 1840.

AMERICAN HEALTH PRIMERS.

EDITED BY W. W. KEEN, M. D.,

Fellow College Physicians, Philadelphia.

It is one of the chief merits of the Medical Profession in modern times that its members are in the fore-front of every movement to prevent disease. It is due to them that the Science of what has been happily called "Preventive Medicine" has its existence. Not only in large cities, but in every town and hamlet, the Doctor leads in every effort to eradicate the sources of disease. These efforts have been ably seconded by intelligent and public spirited citizens of many callings. The American Public Health Association and the Social Science Association, with their manifold and most useful influences, are organizations which have sprung from, and still further extend and reinforce, the efforts to improve the public health.

But the great mass of the public scarcely recognize the importance of such efforts, or, if they do, are ignorant of the facts of Anatomy, Physiology, and Hygiene, and of their practical application to the betterment of their health and the prevention of disease. Such knowledge does not come by nature. In most cases, in fact, it is a direct result of the most laborious research and the highest skill. Accordingly, it is the object of this series of American Health Primers to diffuse as widely and as cheaply as possible, among all classes, a knowledge of the elementary facts of Preventive Medicine, and the bearings and applications of the latest and best researches in every branch of Medical, and Hygienic Science. They are not intended (save incidentally) to assist in curing disease, but to teach people how to take care of themselves, their children, their pupils, and their employes.

The series is written from the American standpoint, and with especial reference to our Climate, Architecture, Legislation, and modes of Life; and in all these respects we differ materially from other nations, Sanitary Legislation especially, which in England has made such notable progress, has barely begun with us, and it is hoped that the American Health Primers may assist in developing a public sentiment favorable to proper sanitary laws, especially in our large cities.

The subjects selected are of vital and practical importance in every-day life. They are treated in as popular a style as is consistent with their nature, technical terms being avoided as far as practicable. Each volume, if the subject calls for it, will be fully illustrated, so that the text may be clearly and readily understood by any one heretofore entirely ignorant of the structure and functions of the body. The authors have been selected, with great care, and on account of special fitness, each for his subject, by reason of its previous careful study, either privately or as public teachers.

Dr. W. W. Keen has undertaken the supervision of the series as Editor, but it will be understood that he is not respon-

sible for the statements or opinions of the individual authors. The following volumes are in press and will be issued about once a month.

- I.—HEARING, AND HOW TO KEEP IT, by CHARLES H. BURNETT, M. D., of Philadelphia, Surgeon in charge of the Philadelphia Dispensary for Diseases of the Ear, Aurist to the Presbyterian Hospital, etc.
- II.—LONG LIFE, AND HOW TO REACH IT, by J. G. RICHARDSON, M. D., of Philadelphia, Professor of Hygiene in the University of Pennsylvania, etc.
- III.—SEA AIR AND SEA BATHING, by WILLIAM S. FORBES, M. D., of Philada., Surgeon to the Episcopal Hospital, etc.
- IV.—THE SUMMER AND ITS DISEASES, by JAMES C. WILSON, M. D., of Philadelphia, Lecturer on Physical Diagnosis in Jefferson Medical College, etc.
- V.—EYESIGHT AND HOW TO CARE FOR IT, by GEORGE C. HARLAN, M. D., of Philada., Surgeon to the Wills (Eye) Hospital.
- VI.—THE THROAT AND THE VOICE, by J. SOLIS COHEN, M. D., of Philadelphia, Lecturer on Diseases of the Throat in Jefferson Medical College.
- VII.—THE WINTER AND ITS DANGERS, by HAMILTON OSGOOD, M. D., of Boston, Assistant Editor Boston Medical and Surgical Journal.
- VIII.—THE MOUTH AND THE TEETH, by J. W. WHITE, M. D., D. D. S., of Philadelphia, Editor of the Dental Cosmos.
- IX.—OUR HOMES, by HENRY HARTSHORNE, M. D., of Philada., Formerly Professor of Hygiene in the University of Pennsylvania.
- X.—THE SKIN IN HEALTH AND DISEASE, by L. D. BULKLEY, M. D., of New-York, Physician to the Skin Department of the Demilt Dispensary and of the New York Hospital.
- XI.—BRAIN WORK AND OVERWORK, by H. C. WOOD, JR., M. D., of Philadelphia, Clinical Professor of Nervous Diseases, University of Penna., etc.

Other volumes are in preparation, including the following subjects: "PREVENTABLE DISEASE," "ACCIDENTS AND EMERGENCIES," "TOWNS WE LIVE IN," "DIET IN HEALTH AND DISEASE," "THE ART OF NURSING," "SCHOOL AND INDUSTRIAL HYGIENE," "MENTAL HYGIENE," etc., etc. They will be 16mo in size, neatly printed on tinted paper, and bound in paper covers. Price, 30 cents; flexible cloth, 50 cents.

Lindsay & Blackiston, Publishers.

TWO POPULAR MAGAZINES.

Brilliant Novelties for 1879.

ELLA FARMAN, Editor. D. LOTHROP & Co., Publishers.

WIDE AWAKE

The Illustrated Magazine for Young Folks.

\$2.00 A YEAR.

It is conceded on all sides that Messrs. D. Lothrop & Co. have splendidly accomplished what they set their hearts upon a few years ago, viz: to make a magazine absolutely pure in its moral influence, unrivalled in literary merit, beautiful artistically, and then to furnish it at so low a price that the people could afford to take it.
