

on the poor man." He recommended that each state and province make its own vaccine and antitoxin, and is satisfied they can make a purer quality.

THE FINAL RESOLUTIONS OF CONGRESS ARE:

*Resolved*, That the attention of the states and central governments be called to the importance of proper laws for the obligatory notification by medical attendants to proper health authorities, of all cases of tuberculosis coming to their notice, and for the registration of such cases in order to enable the authorities to put in operation measures for prevention.

That the utmost efforts should be continued in the struggle against tuberculosis to prevent the conveyance from man to man as the most important source of the disease.

That preventive measures be continued against bovine tuberculosis, and that the possibility of the propagation of this to man be recognized.

That we urge upon the public and upon all governments the establishment (1) of hospitals for the treatment of advanced cases of tuberculosis.

(2) The establishment of sanatoria for curable cases of tuberculosis.

(3) The establishment of dispensaries and night and day camps for ambulant cases of tuberculosis, which cannot enter hospitals and sanatoria.

That this Congress indorse such well-considered legislation for the regulation of factories and workshops, the abolition of premature and injurious labor of women and children, and the securing of sanitary dwellings as will increase the resisting power of the community to tuberculosis and other diseases.

That instruction in personal and school hygiene should be given by properly qualified medical instructors.

That colleges and universities should be urged to establish courses in hygiene and sanitation, and also to include these subjects among their entrance requirements in order to stimulate useful elementary instruction in the lower schools.

That the Congress indorse and recommends the establishment of playgrounds as an important means of preventing tuberculosis through their influence upon health and resistance to disease.
