

LETTER FROM

J. LLOYD WHITMARSH, Esq., L.R.C.P., L.S.A., C.M.

CLAPTON SQUARE, LONDON, ENG.

DEAR SIR,

For some years I have in my practice used Fellows' Compound Syrup of Hypophosphites, and found it most successful in quickly restoring patients to perfect health who have been suffering from great strain to the system.

It is invaluable as a restorative to lying-in women, and all diseases of exhaustion, as well as in chronic diseases of long standing.

I am able from my own experience to highly recommend its use to the profession.

Yours very truly,

J. LLOYD WHITMARSH.

Syr. Hypophos. Co., Fellows,

CONTAINS

The **Essential Elements** to the Animal Organization—Potash and Lime;

The **Oxidizing Agents**—Iron and Manganese;

The **Tonics**—Quinine and Strychnine; and

The **Vitalizing Constituent**—Phosphorus,

Combined in the form of Syrup, with SLIGHT ALKALINE REACTION.

It differs in effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has sustained a high reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

Its Action is Prompt, stimulating the appetite, and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of **mental and nervous affections**.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Prepared by JAMES I. FELLOWS, Chemist.
