

Chemical Weapons

57. The Soviet Union's chemical weapons stockpile poses a massive threat. The Allies are committed to conclude, at the earliest date, a worldwide, comprehensive and effectively verifiable ban on all chemical weapons.

58. All Alliance states subscribe to the prohibitions contained in the Geneva Protocol for the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare. The Paris Conference on the Prohibition of Chemical Weapons reaffirmed the importance of the commitments made under the Geneva Protocol and expressed the unanimous will of the international community to eliminate chemical weapons completely at an early date and thereby to prevent any recourse to their use.

59. The Allies wish to prohibit not only the use of these abhorrent weapons, but also their development, production, stockpiling and transfer, and to achieve the destruction of existing chemical weapons and production facilities in such a way as to ensure the undiminished security of all participants at each stage in the process. Those objectives are being pursued in the Geneva Conference on Disarmament. Pending agreement on a global ban, the Allies will enforce stringent controls on the export of commodities related to chemical weapons production. They will also attempt to stimulate more openness among states about chemical weapons capabilities in order to promote greater confidence in the effectiveness of a global ban.
