CRITICAL NOTICES OF SEVERAL OF THE LEADING JOURNALS.*

* Mr. Martin possesses eminent qualifications for the task he has undertaken,—he has not merely a taste but a passion for statistics; a sheet of figures is to him as delightful as a landscape of Claude's to a virtuoso, and he frames tables with as much facility as if Babbage's calculating engine formed part of his mental machinery. Connected for many years with the colonies, he has acquired a thorough knowledge of colonial and commercial policy—an economist of no mean order, he has arranged and digested that knowledge so as to afford information and guidance for the future. Above all, imbued with the purest principles of philanthropy, his aim, in all his publications, has been to point out the best means for increasing the amount of human happiness.—*Athenaeum, March, 1834.*

* A work of extraordinary industry and great utility. Mr. Martin exhibits a very rare talent for grasping extensive subjects, for seizing with rapidity upon their distinguishing features, and for collecting evidences and illustrations to strengthen and illuminate his work.—*Atlas, March, 1834.*

* This is a work of great research, well and ably written, clear and lucid in its arrangement, and correct in the statements which it embodies. To a great extent, too, it may be considered a desideratum, filling up as it does a blank in the literature of the country.—*Globe, March, 1834.*

* An elaborate work, full of tables of every description calculated to illustrate the wealth, produce, military resources, and trade of these extensive and important possessions, and systematically and lucidly arranged so as to give at once a complete view of our colonies.—*Courier.*

* Many other equally favourable critiques have appeared in the public press, but not being noted down at the time, the names of the Journals and the date have escaped the publisher's memory.
