Perhaps no edition of the Bible has ever attained so widespread and immediate popularity as the Big Print Red Letter Edition now offered to readers of this paper. The fact that it is not bulky and awkward in size does not prevent the type from being so clear and large that old people can read the text with ease. Then, again, the red letter feature, by which all the words of Christ stand out from the context, makes it easy to trace His sacred teachings without reference to cumbersome indexes and concordances. Attention is called to the advertisements that may appear from time to time in our columns, as the number allotted to us may not last and we want none of our readers to be disappointed. In using it you are not experimenting, but are supplying to the system the very ingredients from which Nature reconstructs the wasted nervous system.
