#### Those who imagined that President Roosevelt could be flurried into reversing his determination to fulfil the first duty pertaining to his high office reckoned without their host. A weaker man, less resolute and far-seeing, might have succumbed to the pressure placed upon him to say or do something that would ease the situation-the implication, of course, being that he should leave wealthy lawbreakers at liberty to continue the methods and practices which have brought them within reach of the arm of justice. Fortunately for the republic, the president declines to sacrifice the true interests of the state to the oligarchy of industry that are conspiring to control the government. Mr. Roosevelt recognizes that he is, first and last, the executive head of a sovereign people, whose liberty and welfare are menaced by colossal monopolies

ROOSEVELT RESOLUTE

resolved to place themselves above the law. His policy carries no menace to any legitimate interest-indeed it restores the conditions necessary for the protection of the honest and law-abiding trader and investor. Not President Roosevelt nor the state governors and legislatures are responsible for the unrest and disquietude which mark financial circles to-day. As well say that the sanitary expert is the author of the disease whose cause he undertakes to remove by compelling observance of the laws of health. Huge corporate organizations, built up by illegal rebating and by the ruthless crushing of legitimate competition, that lend themselves to manipulation by the apostles of high finance, and unload millions of watered stocks on the unthinking public, are the true authors of the evils that afflict the body politic of the United States. The greatest happiness of the greatest number is the ideal democracy, and it can only be approached by enforcing the laws designed to secure fair dealing and protect the public interest. President Roosevelt has made up his mind that the insolence and arrogance of dishonest corporations must be curbed, and their illegal methods suppressed. He believes he has the people with him, and his belief will not be in vain.

### 

those who wish to smash reform leg- parent to all and the suggestion that islation on both sides of the line. But a public utilities commission be apforewarned is forearmed. Meantime pointed with that object is one that the word is--Gentlemen of the conven- should undoubtedly be acted upon, it

> an apparent neglect of the very work which occasioned the creation of that board.

unfairness it may be premised that the Liberal party have every rea-son to be satisfied with the outcome of the meeting. From a political point of view nothing could have more effectively shown that Mr. Borden is incapable of inspiring enthusiasm among even his Nova Scotia followers. The leader was given a hearty welcome and a brass band rendered inspiring music when he rose to speak, but thereafter the

To the man who is studying Canathat the people have a right to a dian politics, to the elector who share of the increment in value of public franchises. On resuming his seat, Mr. Borden was given an ovahis vote in the coming election to use his vote in the country, to the best advantage of the country,

Political Intelligence

the opinion of the country and of the press on R. L. Borden's opening cam-paign speech will be of interest. The World proposes to present such opin-ions as fast as they come forward. Let us start with The Globe. In its edi-The Mail is against public ownership first, last and always, and in its editorial on the speech it never mentions that topic. Or perhaps it is covered by these opening words: "Different judgments will place diftorial it says: What will chiefly attract atten-

tion in Mr. Borden's speech are its omissions. With the exception of ferent values upon the various planks of the policy formulated yesterday by Mr. Borden." the nationalization of the telephone and telegraph systems there is not But in an editorial note away down

the page it squeezes this in: "A great advance in the direction of the policy of rational public own-ership is the proposal of Mr. Borden a hint of Mr. Maclean's program anywhere. At one time there was every appearance that the leader of the opposition was prepared to go as far as the public ownership and to give us government telephones and operation of railways. It is diffi-cult to catch a whisper of so bold a program now. Indeed, if his pro-posals are scanned it will be seen telegraphs. The British Government has followed this course, and there is no reason why young John Bull should not walk in the footsteps of his faposals are scanned it will be that that they consist almost altogether

public ownership, the argument is not all on one side, and private ownership way along the Port Credit road-and with public control will undoubtedly prove the best solution in many cases, securing, on the one hand, the energy private interest and, on the other, he justice of public supervision. Mr. Borden's proposal of a public utilities came on. The officials had a commission for the Dominion is a in hand and a bit to spare.

most important and progressive step. Toronto Star (Lib.): Apart from generalities, Mr.Borden's platform contains one good plank and two others that are worth considering. There ought to be a system of national telephones and elegraphs. There is no reason why the government should not manage these systems of communication, as it now manages communication by mail ue that the railway companies must have their own systems of telegraphs and telephones, and that these will be established wherever rails are laid, even in the most remote districts. government is also compelled by the force of circumstances to establish telegraphs in remote districts. There is no reason why it should not carry on the business in districts that are well populated and will yield a profit. There would be some advantage in the operation of government railways way commission as a public utilities commission, with wider powers. Such schemes are usually advocated on the ground that they get rid of political influence, but it is difficult to do this without also weakening popular and parliamentary control. Government y commission is, after all, a sort of a Ross rifle. bureaucratic government, and has the Quebec," said a man, after making a defects as well as the advantages of that system. As the Whitney Government has adopted it pretty exten-
