

Let us carefully watch the work now being carried on by Mr. Budd, at the State Agricultural College at Ames, Iowa—work of the highest value to the cold climates of Canada; that work which made our trip to Russia a necessity, that is, a necessity to fair progress; a trip which enabled me in part to see with his eyes, and give you in some degree the results of his study and observations.

Let us then follow out this scheme of interchange with our corresponding climates in the old world. The work has some difficulties. However, as we have the North-Western States and the Russians as our allies, the difficulties may be overcome to one great and mutual good.
