

RUSSIAN CHIEF ASKS AID FOR BRITISH LABOR

Red Leader Urges Boycott on Oil and Coal

VISIONS NEW ERA

Says No Power Able To Stop Bolshevism of English Proletariat

CANADIAN PRESS
MOSCOW, May 5.—Moscow's reaction to the general strike in the British Isles is to reserve on the part of officials, ratification in labor and communist circles, and an appeal by Gregory S. Zinoviev, chairman of the executive committee of the Third International to the world's workers calling for united action in aid of the British strikers.

It exhorts the transport workers of all countries not to deliver coal or oil to Great Britain during the strike.

WARNS OF LEADERS

After stating that the greatest danger of the present situation lies in possible treason by labor leaders, who "lead to chaos," the appeal winds up with the following statement:

"This great struggle connotes a new era in class struggle, not alone for England, but for the world proletariat."

The appeal is followed by such slogans as "Energetic, ardent, immediate aid to our British brothers," "Action committees of all countries, with more determined and organized struggle, with all power and all thought to aid English Labor."

STRESSES ULTIMATE EFFECT

M. Zinoviev presumably is uncertain as to the outcome of the immediate issue. He lays stress on the point of its ultimate effect on the world's revolutionary movement, saying "Whatever happens, regardless of the developments of the near future, no one can doubt that the events in England open a new era in England's and the world's labor movement. There is no power able to stop the quick bolshevization of the British proletariat. With the greatest enthusiasm communists the world over support the struggle, not alone in words, but in deeds, they will prove their readiness to form a united front with the social democratic workers, non-party men and even Catholic workers."

30,000 WELSH AND ENGLISH STUDENTS ATTEND COLLEGES

Ratio is One to Every 1,200 of Population, to 400 in Scotland

LONDON, May 4.—Going to a university is not nearly as fashionable in Great Britain as it is in the United States.

In England and Wales the ratio of students to the total population is one to 1,200. In Scotland there is one student to every 400 population, while in the United States the ratio is one to 100.

Dr. Ernest Barker, principal of King's College, London, in a statement to the Central Council of the Association of University Teachers that in his opinion Scotland's high percentage of college students is due to its educational tradition, while in the United States universities have social vogue.

Germany has one university student to every 600 persons, and Dr. Barker said this high average is due to the concentration in the universities on legal training and training for the service of the state.

England and Wales have 30,000 students now and Dr. Barker does not expect that number to increase more than 10,000 in the next two decades.

He expressed the belief that it is desirable for this increased number of students to be scattered among small universities as larger universities are apt to become "an agglutination of separate departments, with teachers too numerous to know one another in addressing audiences of the dimensions of public meetings."

In his opinion, big universities are apt to run to seed in "organization" and the heads of departments may become so consumed in management that they have little time for education. He said the true way for students to learn is to have personal touch with teachers, which may easily be lost in great institutions.

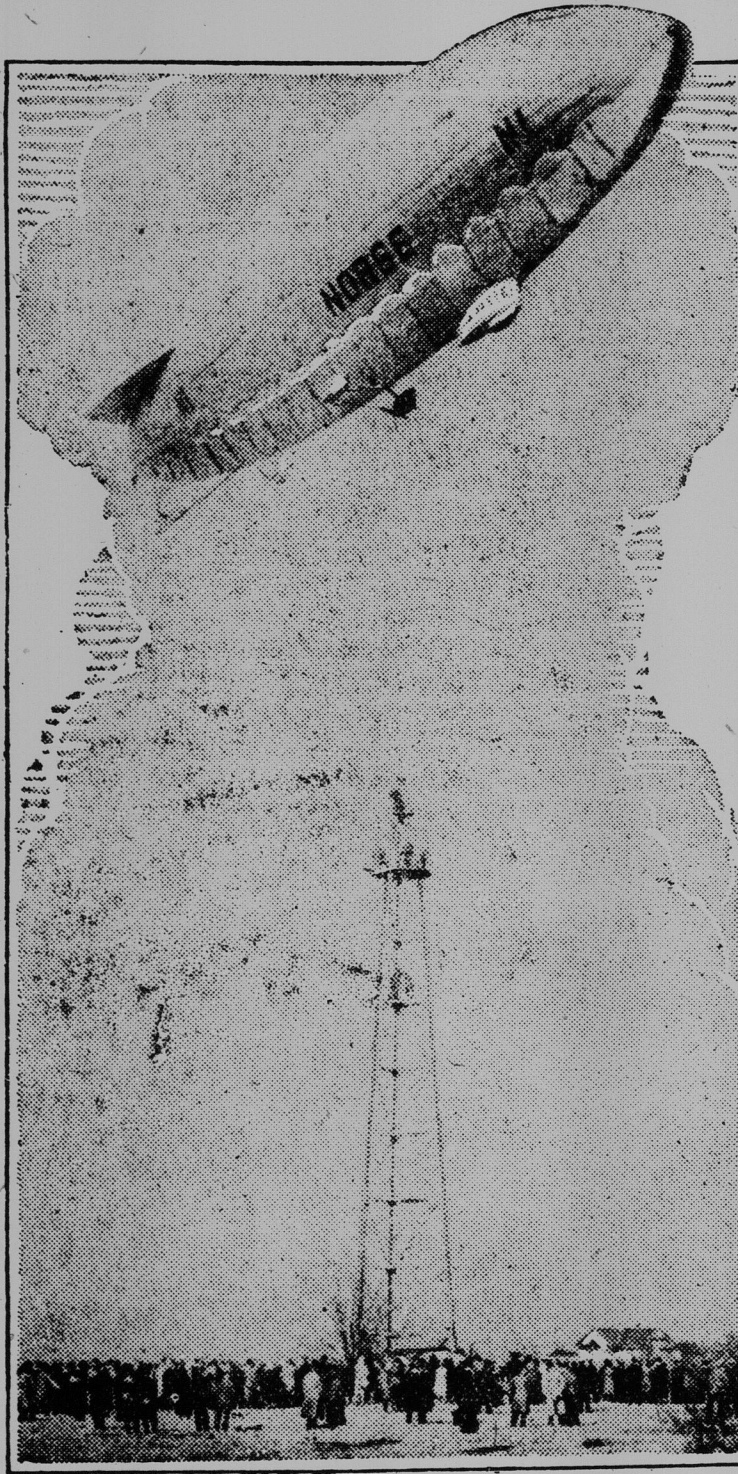

New universities in England are desirable, especially one in the southwest, said Dr. Barker.

HAS 2 RIBS BROKEN

S. S. Steven, of Memel, Albert County, Injured by Colt

HOPWELL HILL, May 4.—S. S. Steven, J. P., a well known farmer in the Memel district, near here, sustained a painful injury on Friday when a refractory colt that he was leading into the barn jammed him up against the side of the stable. Two of Mr. Steven's ribs were broken and his side was quite badly bruised. Dr. Carnwath rendered the necessary attention, being summoned from Riverside, eight miles away.

THE EXPLORING NORGE AT ANCHOR

This striking photo of the Norge, the Amundsen-Ellsworth dirigible, was taken at Leningrad before the start of the final stage of the journey to Spitzbergen, from which point the flight over the pole is to be made.

Chicago Barber, Who Lived As Hermit, Left Half Million

CHICAGO, May 5.—Dan J. Hines, whom he had received an occasional letter, Friday the relatives came to town to claim his body and to look into his safety deposit box. And the things they found there—nearly half a million dollars in gold bonds—revealed the fact that Dan was something more than the familiar barber of La Salle street.

He was a rich man when he died, probably the richest active barber in the world. Through the narrow nose gap of the hot towel applied into the face of distinguished customers, old Dan heard the advice and tips that led him to wise investment and ultimately a fortune.

Some say that he was always penniless, but the young bond salesman of "the street" happen to know that old Hines did a lot of charity work on the side.

NINE NEW SHIPS FOR UNITED FRUIT

Expansion Program Planned as Vice-President Sails on European Trip

NEW YORK, May 4.—A program of new construction which will add a total of nine steamships to its present fleet is in course of development by the United Fruit Co. It was stated officially yesterday. Plans and specifications for four of the nine vessels are already in the hands of American shipyards and alternate proposals covering both steam and Diesel methods of propulsion will be submitted to the owners in the near future. The balance of the program will be carried out abroad.

William Newsome, vice-president of the company, confirmed the report yesterday that the additions to the "Great White Fleet" were under consideration. Mr. Newsome sails tonight on the United States Line steamship Leviathan for a two month's trip to Europe. Mr. Newsome, who has been with the United Fruit Co. for the past 35 years, will devote a large amount of his time to looking over the general business situation abroad, particularly as it has to do with the banana industry. Germany, Spain, Norway, Sweden and Denmark, he stated, are calling for bananas and the company is developing its European fruit business very rapidly. Although 28 ships have been built since the war for the company's West Indies and Central American trade, these latter ships will probably be placed in the New Orleans and Central American service.

RECIPROCATING ENGINES.

The six ships to be built in foreign yards will be approximately 8,000 tons each, propelled by reciprocating steam engines at a speed of 14 knots, while the American vessels will be of 5,000 tons each designed for 15 knots. Passengers and cargo will be carried as on the present steamers. It is understood that the specifications for the ships to be built in America provide for reciprocating engines, with an alternate bid for Diesel machinery.

SUE FOR INSURANCE ON STOCK BURNED IN CAPITAL FIRES

Fredericton Store Has Two Blazes; Incendiarism is Alleged

\$5,000 CLAIMED FOR LOSS OF GROCERIES

Plaintiff Claims Fires Set, But Culprit Unknown to Proprietor

FREDERICTON, May 4.—Before Justice Crockett in the York Bench which opened today, a motion for fire insurance is being argued in a local case in which alleged incendiaries figures, Frank C. Jewett and Kitchen Bros., bring action against the Ocean Accident and Guarantee Co., for amounts which total about \$5,000 for insurance on stock in the grocery store at the intersection of King and Regent streets which was conducted by Mr. Jewett. Two fires occurred in the store, some months apart, the second fire putting an end to the business. At the time incendiary was alleged to have occurred in connection with the fire.

P. J. Hughes, K. C., appeared today for the plaintiff and W. P. Jones, K. C., and J. B. McNair for the defense. Mr. Hughes, in outlining the case for the court and jury, expressed the opinion that incendiary had occurred twice in Jewett's store, but that the proprietor of the store had no knowledge of the incendiary and was entitled to the amount of insurance carried.

JURY CASE

The jury empanelled to try this case is composed of T. V. Monahan, James Pringle, Frank L. Cooper, William Landerson, O. P. Grant, George Emblen and Raymond Hoiyoke.

Frank Jewett, one of the plaintiffs, was on the stand all day and gave evidence concerning value of stock fixtures, etc.

DANIEL McLEAN DIES IN INVERNESS HOME

HALIFAX, May 4.—Hon. Daniel McLean, member of the Legislative Council of Nova Scotia, died at his home in Orangetown, Inverness county, this morning. He was born in Wilmacomb, Inverness county, and was appointed to the Legislative Council in 1918.

The death of Hon. Mr. McLean leaves the Legislative Council with four vacancies, the present number of members being 17 and the quota of seats 21. A bill to abolish the Legislative Council was passed in the Legislative Assembly last session but was defeated in the upper chamber.

STRIKE APPROVED BY FARMERS' UNION

SASKATON, Sask., May 4.—The following cable in connection with the general strike in Great Britain was sent today to the president of the British Trades Union Congress, London, by the Farmers' Union of Canada, from its head office here: "Earnestly wish you success in your fight for economic justice."

The steamer Estonia, from Dantzic and Copenhagen, will land 125 third-class passengers at Halifax on her way to New York.

TUBERS \$6 PER BBL. IN AROOSTOOK, ME.

CARIBOU, Me., May 4.—Roads in Aroostook are practically impassable except in a few places and as far as known no potatoes were hauled to shipping points today. The demand is light and quotations hold at from \$6 to \$7 a barrel. Shipments continue to hold up around 100 carloads a day, shippers having any on hand seeming anxious to move them.

MINE WORKERS ARE SILENT ON STRIKE

HAZELTON, Pa., May 4.—Thomas Kennedy, international secretary-treasurer of the United Mine Workers, today said that until further information is received regarding the British strike no statement or action would be forthcoming from the United Mine Workers.

Bouncing Baby Falls 25 Feet; Escapes Hurts

For Hours Doctors Search Vainly For Injuries; Bay Window Saved Him

BOSTON, May 5.—Every baby is a bouncing baby, according to relatives and friends of the family, but George Osklin, a year and one-half, of South Boston, proved his right to be called a bouncing baby when he fell 25 feet from an attic window, struck the roof of a bay window and bounced off into the yard and was picked up unhurt in any way.

George was visiting with his father at the home of John M. Bonjomin, Somerville. He wandered into the attic and while looking out the window lost his balance and fell.

He was taken to the Somerville Hospital after his fall, and physicians examined for more than an hour, but failed to find any injury resulting from the fall, and his dad took him home.

NEW ARRANGEMENT WITH BESCO IS OFF

Resolution Removed From Newfoundland House's Order Paper

ST. JOHN'S, Nfld., May 4.—Premier Munroe announced in the House of Assembly today that the resolutions embodying a new agreement by the Newfoundland government and the British Empire Steel Corporation operating the iron mines at Wabana, on Bell Island, had been removed from the order paper and intimated that the intention of effecting a new agreement had been abandoned for the present.

J. E. McLaughlin, vice-president of the British Empire Steel Corporation, and the local manager of Bell Island operations, have been in conference with the government several days, but it is understood no agreement was reached. Opposition was expressed locally to the long-term lease contained in the proposed new agreement recently put forward by the corporation. In the meantime the agreement of 1920 will continue in effect.

BRITAIN PUTS STOP TO HORSE RACING

LONDON, May 4.—All horse racing in Great Britain has been ordered stopped by the racing authorities because of the difficulties surrounding the sport caused by the general strike.

PROMINENT NATIVE OF BATHURST DIES

William J. O'Brien, 68, Was Lawyer, Customs Collector, Accountant

BATHURST, May 4.—The death of William J. O'Brien, one of the most prominent of Bathurst's native sons, occurred this morning. Mr. O'Brien had not enjoyed very good health for the last few years, and about six months ago he sustained a fall which no doubt hastened his death. Mr. O'Brien was born at Bathurst sixty-eight years ago, a son of the late John O'Brien, who in the days of wooden ships was one of the largest shipbuilders in northern New Brunswick, and who was, in later years, the leading magistrate in the county.

GRADUATE OF U. N. B.

Mr. O'Brien received his early education in the Bathurst schools and continued his studies at the University of New Brunswick, from which institution he received the degree of B.A. He studied law but gave up his legal career to accept the office of collector of customs of the port of Bathurst, which he held for several years. He later went to British Columbia, where he was employed by the Canadian Pacific Railway. Returning to New Brunswick he held the position of accountant with the Saint John and Quebec Railway. Of late years he has resided in Bathurst.

FUNERAL ON THURSDAY.

Mr. O'Brien is survived by two sisters, Misses Minnie and Elizabeth, with whom he made his home, and one brother, Frank, of Toronto, who is at present visiting his home here. The funeral will take place on Thursday morning at 8:30 o'clock from his late residence, St. Patrick street, to the Sacred Heart church where a high mass of requiem will be celebrated.

The late Mr. O'Brien was one of the outstanding citizens of this town, highly cultured, had traveled widely and was always a very interesting company. He was well versed in early western conditions and also in politics generally. Until recent years he was an active member of the Bathurst Curling Club.

FIRST OF SEASON

PUGWASH, May 1.—The steamer Kapana, 3,100 tons, Captain A. M. Norston, arrived in port at noon today from Miami, Fla., in ballast. En route she called at Norfolk, Va., for bunkers and was delayed for 10 days, owing to ice conditions. She will begin Monday taking on a cargo of deals for the United Kingdom. W. M. McKay, of Saint John, being the shipper.

Do Your Children Belong to the Lifebuoy Brigade?

The dirt and grime, the possible infection that is a part of the daily playtime—these have no terrors for the millions of kiddies whose mothers have learned to know and prize Lifebuoy Soap.

There is no substitute for Lifebuoy, the ultra-refined soap with antiseptic qualities that purify and protect tender skins.

The cleanly health odour quickly vanishes—the protection remains.

Lever Brothers Limited Toronto

Interlocking Tile Features

21% less heat loss than solid brick (Jan. Govan, M.P.A.I.C.).

Safety Load up to 8,000 lbs. per sq. inch. (Testing Laboratory, McGill University).

48 hour immersion test, 2% absorption (same).

Same tile builds wall no furring necessary.

Plaster direct on tile—no furring necessary.

Air pockets prevent condensation of heat, cold or moisture.

Can be plastered with stucco, faced with brick, or left exposed.

Each interlocking unit equals seven bricks in size and weight, can be laid at a fraction of the cost.
