## FIGHTING FOR HAPPINESS

When you get into a frame of mind that makes life seem one tiresome duty after another, with no pleasure in it; when ill-health seems to take all the joy out of life and you worry over things that are really not worth worrying about, then your nervous system is becoming exhausted, and you are on the way to a general breakdown in health. In this condition your health and happiness is worth fighting for.

And good, rich, red blood is what your system needs. It is a hopeless task to try to restore your health while your blood is deficient either in quantity or quality. And remember that no medicine can be of any use to you that does not build up your weak, watery blood.

To build up the blood and strengthen the nerves there is one remedy that has been a household word for more than a generation—Dr. Williams' Pink Pills for Pale People. It is the actual mission of these pills to make new, rich, red blood, which strengthens the nerves and tones the entire system.

They give you a new appetite, make sleep refreshing, put color in the lips and cheeks, and drive away that unnatural tired feeling that oppresses so many people. If you want to experience new health and happiness give Dr. Williams' Pink Pills a fair trial.

You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes, for \$2.50 from The Dr. Williams Medicine Co., Brockville, Ont.
