### Judge Wilson Holds That Affidavit for a Recount is Defective.

Fredericton, N. B., Oct. 26.—Judge Wilson this morning delivered judgment in the Sunday-Queen election case, declining to proceed with the recount, and confirming Col. McLean in his seat. The objections made to Luther B. Smith's application for a recount, were—

(1) That the sum of \$100 required under section 193 of the election act, for security of costs, was not deposited with the clerk of the court within four days after that on which the returning officer had made the addition of the votes for the purpose of declaring the candidates elected.

(2) That the judge had no jurisdiction to grant the application outside of the electoral district of Sunbury and Queens.

(3) That the affidavit upon which the second order for a recount was issued was not sufficient to give him jurisdiction in any case.

The first objection was overruled by His Honor. In regard to the second he was of opinion that, as he acted in his judicial capacity, he had no authority to grant an order for recount outside of the electoral district of Sunbury and Queens, and therefore it was defective and the objection made by the respondent's counsel was upheld.

### Worth Looking at and Will Prove That We Grow Great Fruit

#### MEANS MILLIONS

If New Brunswickers Go In for Fruit Culture Intelligently, This Expert Says, They Will Make Money—Read About the Apple Show.

To the Editor of The Telegraph. Sir—Permit me, through the courtesy of your columns, to make a plea on behalf of the work being undertaken towards the development of apple growing in New Brunswick. It has been the unfortunate experience of persons actively interested in apple growing in the province that we have as yet a great many unbelievers in our midst.

To these people the idea that high quality apples may be and are being grown profitably in the province is neither credible nor acceptable. Just why we do not know; we certainly think that they behave as if they were not over eager to concede to their native province the possession of such an agricultural possibility. True, provincial patriotism so far as agriculture is concerned should not find so many people ever willing to award the palm to other provinces and to overlook the merits of their own. Doubtless we are in a measure responsible for that lack of true provincial spirit, in so much as we have not advertised sufficiently the results we have obtained in apple growing and the possibilities indicated thereby. We are, however, now alive to the necessity of constantly and attractively placing before the people the results of our work in this land. Doubtless the people of other lands the possibilities and the advantages of apple growing in New Brunswick, and we believe that so far as our limited funds permit that such is being done.

The apple show to be held at the St. Andrew's rink last year, while it attracted considerable attention and much favorable comment, did not receive the patronage which we were entitled to expect. It was to be held, they did not think that it would be worth going to, or in other words, they did not have enough confidence in the quality of the apples that such an apple show would be as well worth attending as one staged either in Nova Scotia or Ontario. To those who attended such a show, however, the possibilities indicated thereby were, however, now alive to the necessity of constantly and attractively placing before the people the results of our work in this land. Doubtless the people of other lands the possibilities and the advantages of apple growing in New Brunswick, and we believe that so far as our limited funds permit that such is being done.
